# 1. Introduction to SUR

The Surveillance and Utilization Review (SUR) subsystem provides the capability to identify potential fraud and/or abuse candidates. The modular design of the solution enables detection components to accept data directly from the interChange DSS. The SUR Components are:

- Episode Treatment Grouper (ETG);
- Random Sample Generator; and
- DSSProfiler.

These components are accessed through the DSSNavigator. The Data Warehouse is populated with data from interChange, which allows the Data Warehouse to source data to the Random Sample application, Targeted Queries and the DSSProfiler process. Having everything contained within the Data Warehouse helps to ensure that all of the data used to identify a suspect list comes from the same source and speeds verification.

## 1.1 Episode Treatment Grouper (ETG)

The Episode Treatment Grouper (ETG) integrated in the SUR subsystem allows for measuring the effect of health care services on cost and quality. The ETG solution does this by identifying episodes of care, which encompass all health care services provided to an individual patient during a single illness. An episode of care is defined as all clinically related services for a single illness and a discrete diagnostic condition from the onset of symptoms until treatment is complete. Episodes of care provide a clinically meaningful unit of measuring both the cost and quality of patient care.

## 1.2 Random Sample Generator

The Data Warehouse also provides the ability to generate summary reports from a statistically valid random sampling process. The random sample process is initiated and accessed through browser-based windows from the Data Warehouse web site.

Through this web site, users can specify if they want to sample claims for providers or recipients, and they can specify the date ranges and other filter conditions such as specific claim types or code values. The results from the sample are stored in the Data Warehouse where the results can be reported on summary web screens or from reports generated through the Data Warehouse.

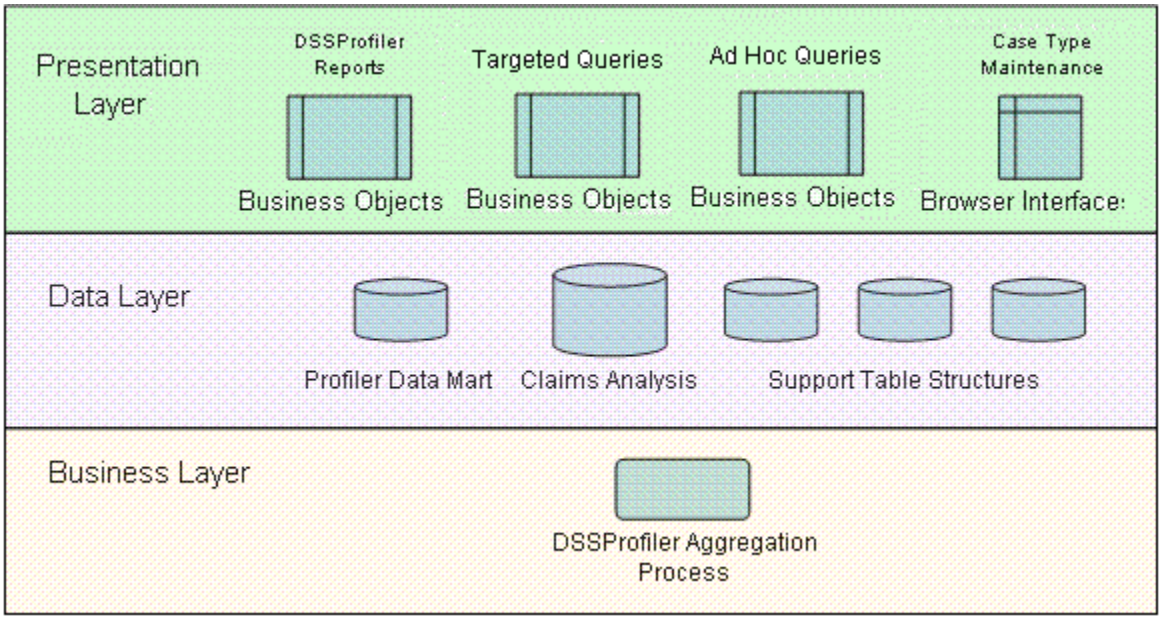
## 1.3 DSSProfiler

The DSSProfiler is made up of three layers: presentation, data and business. These layers interface with each other to provide the tools and data necessary for fraud and abuse monitoring.



### 1.3.1 Presentation Layer

The presentation layer is comprised of Business Objects and a Browser Interface.

Business Objects is the main tool used to run and review DSSProfiler reports. This tool allows the user to define many of the parameters used to create a report with the requested data. The data presented is based on the aggregation totals run during the previous quarterly process.

The Business Objects tool is also used to run targeted and ad hoc queries. Targeted queries are established reports where the user may re-fresh data when needed. Ad hoc queries allows the user to develop a query as needed.

The Browser Interface allows the user access to the Case Type Maintenance windows. Case Types can be added, deleted and updated through the Case Type Maintenance windows.

### 1.3.2 Data Layer

The data layer is comprised of the DSSProfiler Data Mart, Claims Analysis, and Support Table Structures.

The DSSProfiler Data Mart contains all the aggregations produced by the quarterly run of the DSSProfiler. Summaries of each Case Type within each Peer Group, Report Category (Claim Types) and Aggregation Type (Type of claim – Fee for Service (FFS), Encounter or both) are included within the tables of the data mart. By storing the aggregates at these levels, the user can run many reports looking at data in many different ways.

The Claims Analysis Data Mart is utilized to gather the claims information for the DSSProfiler to aggregate in the quarterly process.

© 2019 DXC Technology Company. All rights reserved.

The Support Table Structures provide extra data for reports and queries. This data includes provider and recipient demographic data, descriptions and other data not normally found on specific claims tables.

### 1.3.3 Business Layer

The Business Layer is comprised of the DSSProfiler Aggregation Process.

The DSSProfiler aggregation process runs once a quarter. This process summarizes data based on claims from the previous 12 months. The aggregations are created by processing each claim against the user defined Case Types and accumulating data as necessary. The aggregations are then saved in the DSSProfiler Data Mart.

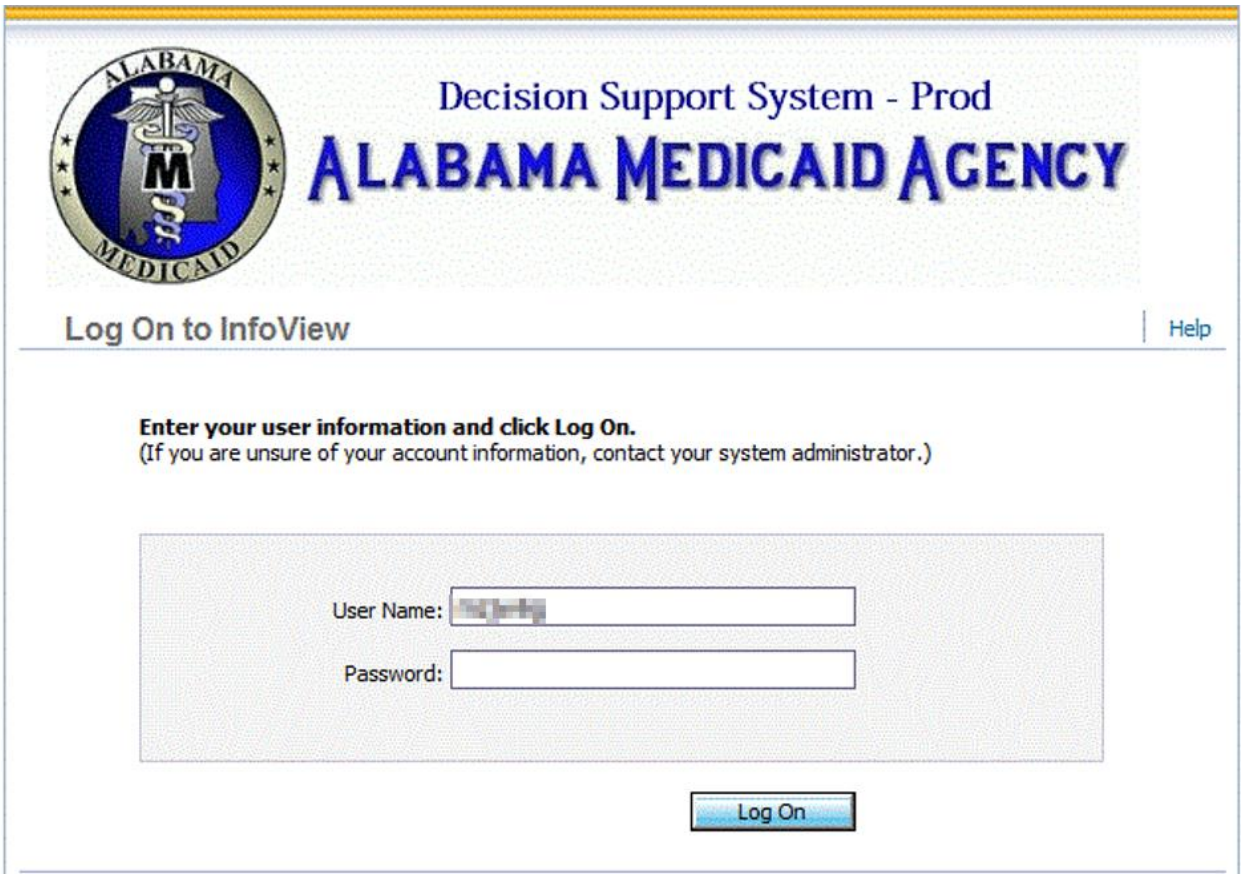
# 2. Internal Web Pages

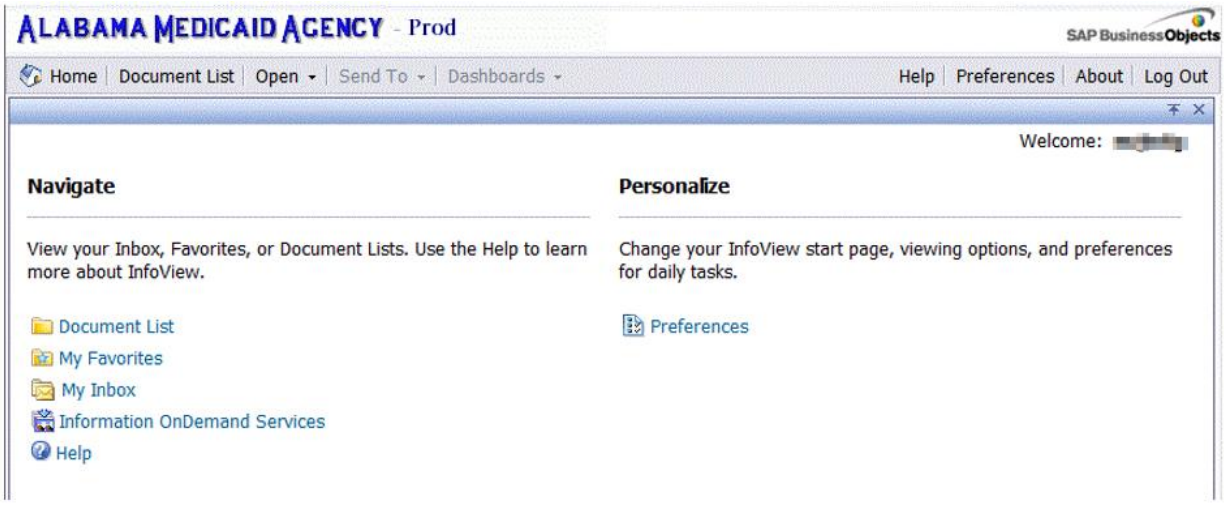
## 2.1 Accessing the SUR DSSProfiler Application

Log on to the InfoView DSSNavigator.

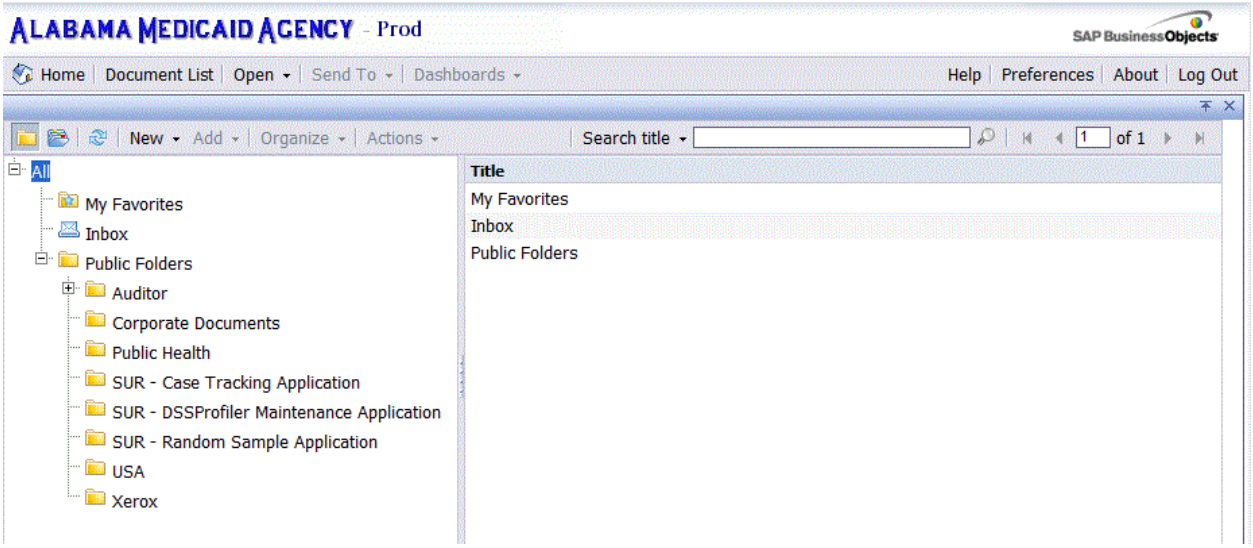


A Welcome window is displayed.

© 2019 DXC Technology Company. All rights reserved.



Click on “Document List” and then expand “Public Folders” and a list of applications is displayed as unopened folders.

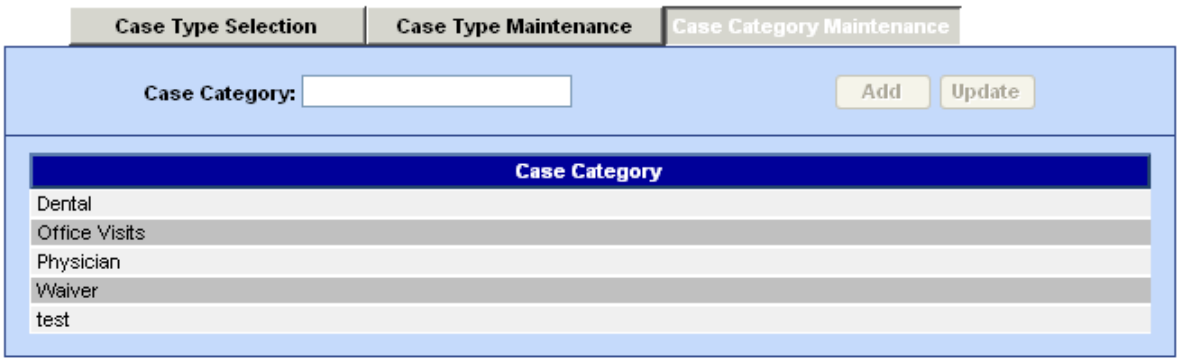


Click on one of the folders to start an application, in this case the “SUR – DSSProfiler Maintenance Application”.

### 2.1.1 Case Category Maintenance

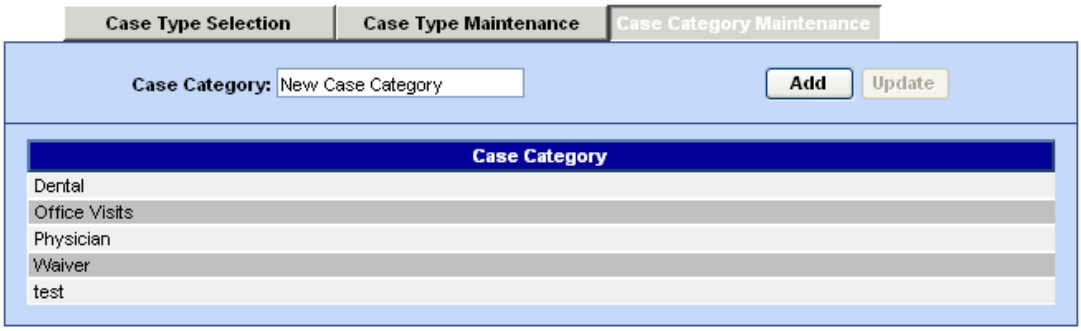
From the Document List window select the hyperlink for “Case Type Maintenance”; then select the Case Category Maintenance tab at the top. A case category is used to group or create subsets for case types and case groups within a report category. Use the Case Category Maintenance window to view, add or delete Case Categories.

© 2019 DXC Technology Company. All rights reserved.



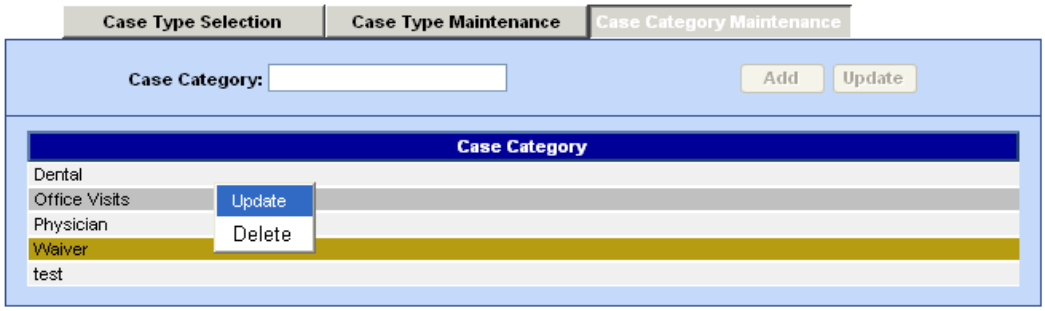
### 2.1.1.1 To Add a New Case Category

Place the cursor in the Case Category field and enter the name. After the first position of the name is entered, the Add button is activated. Select the **Add** button to create a new Case Category. A window displays stating the Case Category was added successfully, select **OK**. The new Case Category is added to the list.



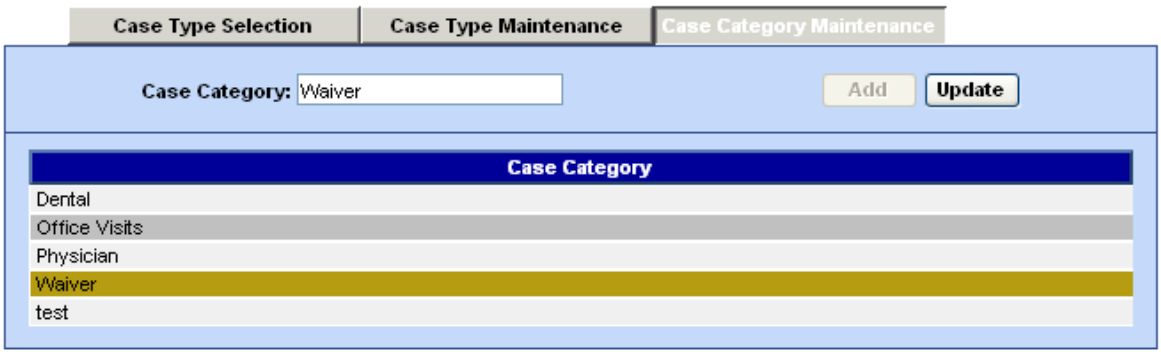
### 2.1.1.2 To Update a Case Category

To make an update to an existing Case Category, highlight the Case Category and right click the mouse; then select **Update**.



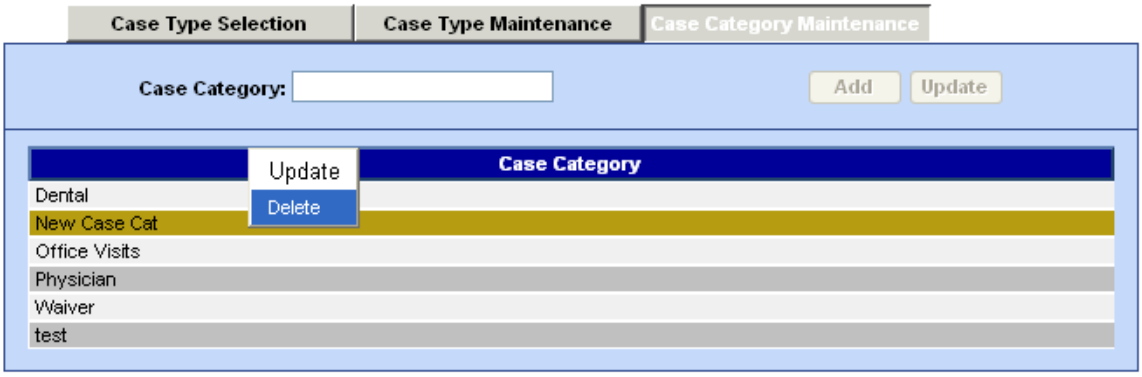
The Case Category Maintenance window is re-displayed with the Update button available. The user may update the Case Category name and select **Update**. A window displays stating the Case Category was updated successfully, select **OK**.

© 2019 DXC Technology Company. All rights reserved.



### 2.1.1.3 To Delete a Case Category

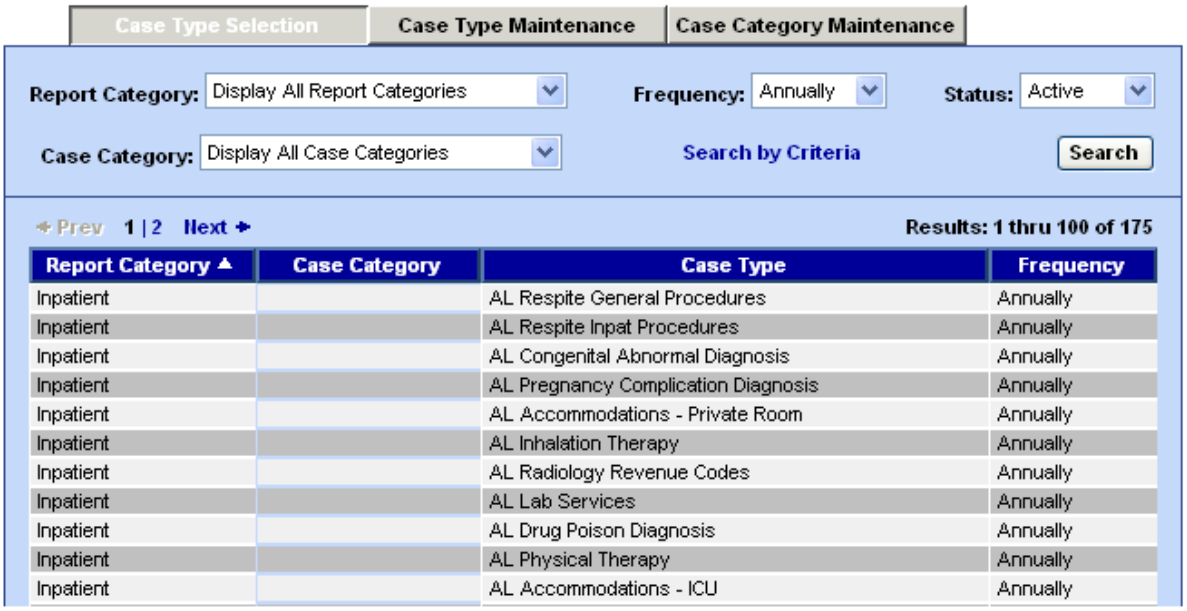
To delete an existing Case Category, highlight the Case Category and right click the mouse; then select **Delete**. A window displays to ensure you wish to delete the Case Category, select **OK**. The Case Category is deleted and removed from the list.



© 2019 DXC Technology Company. All rights reserved.

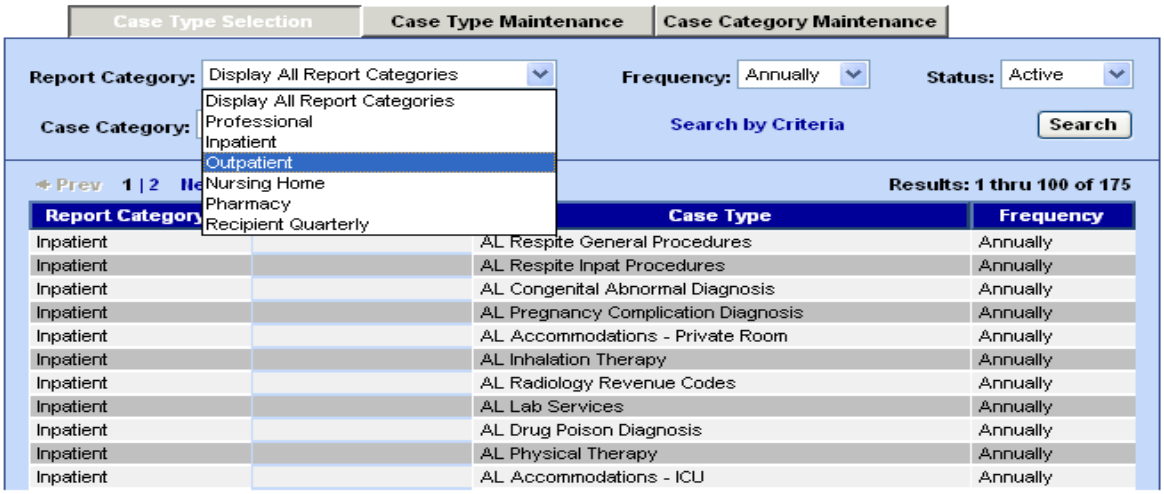
### 2.1.2 Case Type Maintenance

From the Document List window select the hyperlink for “Case Type Maintenance”. A case type is defined as data criteria used to group claims into different buckets that is used in evaluating peer groups and by the case group logic. Use the Case Type Selection window to view all Case Types or selected Case Types displayed as the result of a search. The Case Type Maintenance window allows the user to enter criteria for new Case Types or update existing ones.



#### 2.1.2.1 To Search for an Existing Case Type

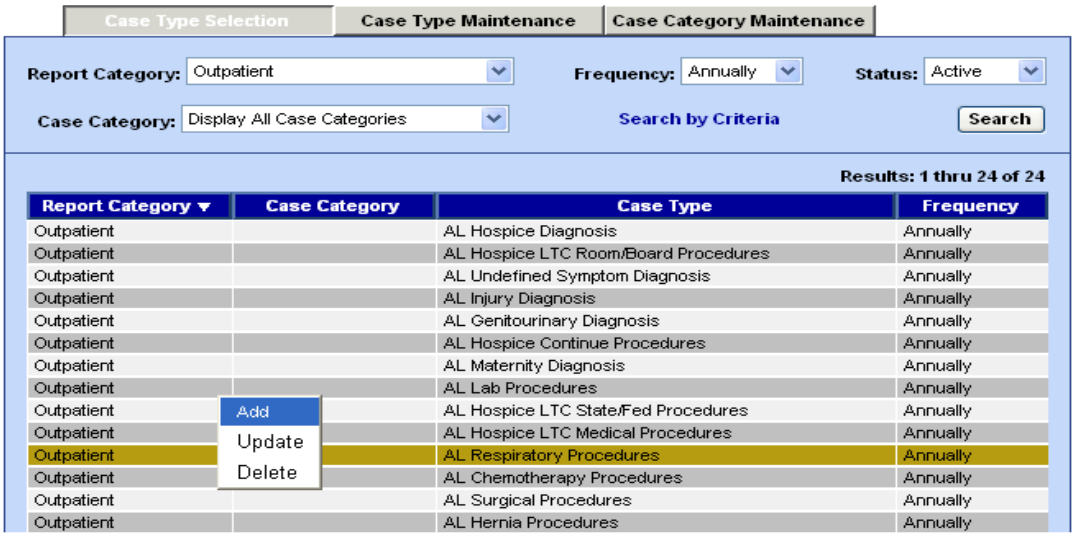
Use the drop down boxes for Report Category, Frequency, Status and Case Category to narrow the search criteria. Click the Search button. The Case Types meeting the search criteria are displayed. To change the sort order, click on the column for the desired sort. The triangle pointed down represents descending order and the triangle pointed up means ascending order.



© 2019 DXC Technology Company. All rights reserved.

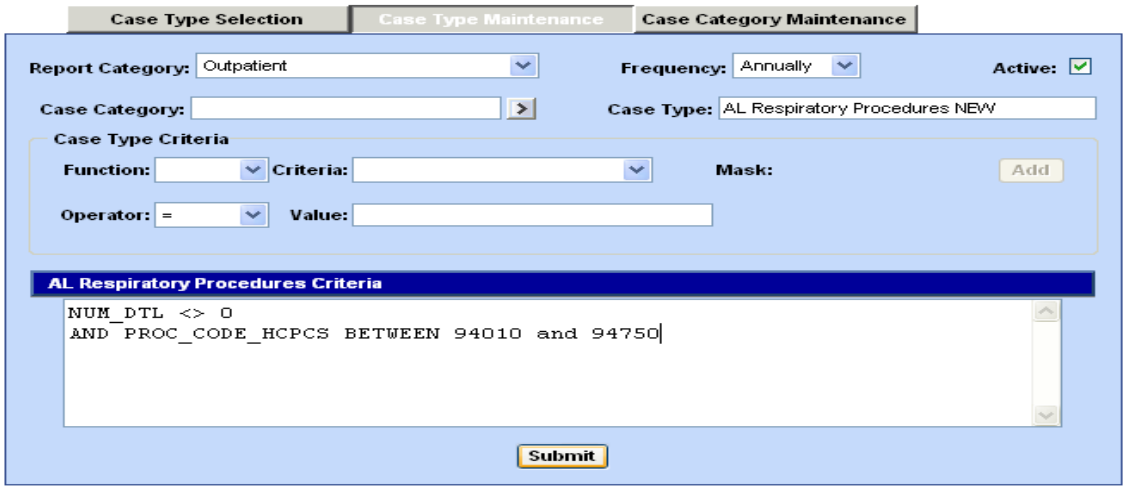
### 2.1.2.2 To Add a New Case Type

Highlight any Case Type, right click the mouse and select **Add**. To copy an existing Case Type in order to create a new one, locate and highlight the Case type. The Case Type Maintenance window is displayed.



The original Case Type selected on the Selection window is displayed, use the drop down boxes for Report Category, Frequency and Case Category to establish the correct criteria for the new Case Type. Change the Case Type name to represent the new one. The user must enter a new name and it must contain the prefix “AL – “. Use the Case Type Criteria items in the middle of the window to identify the criteria for the new Case Type. After the Case Type Criteria selections are made, select the Add button. The criteria will now be added to the white criteria box at the bottom.

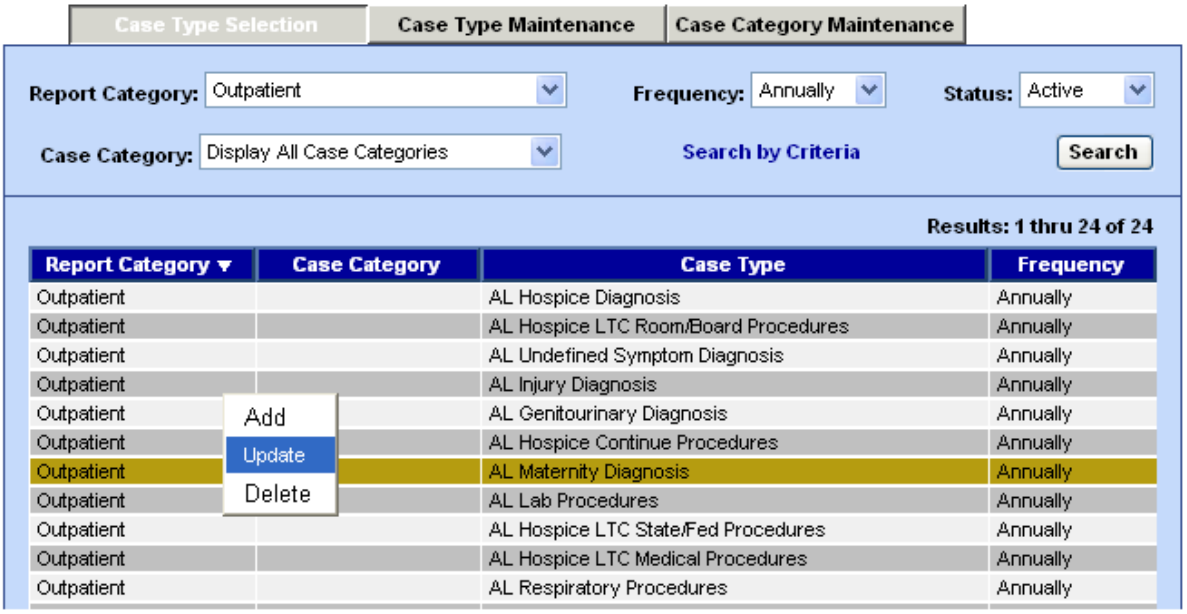
Another way to make an update is to place the cursor in the white criteria box at the bottom and type the correct conditions. NOTE: Specific field names must be used as these are database names. Select the Submit button to create the new Case Type. A message window displays to let the user know the Case Type was added.



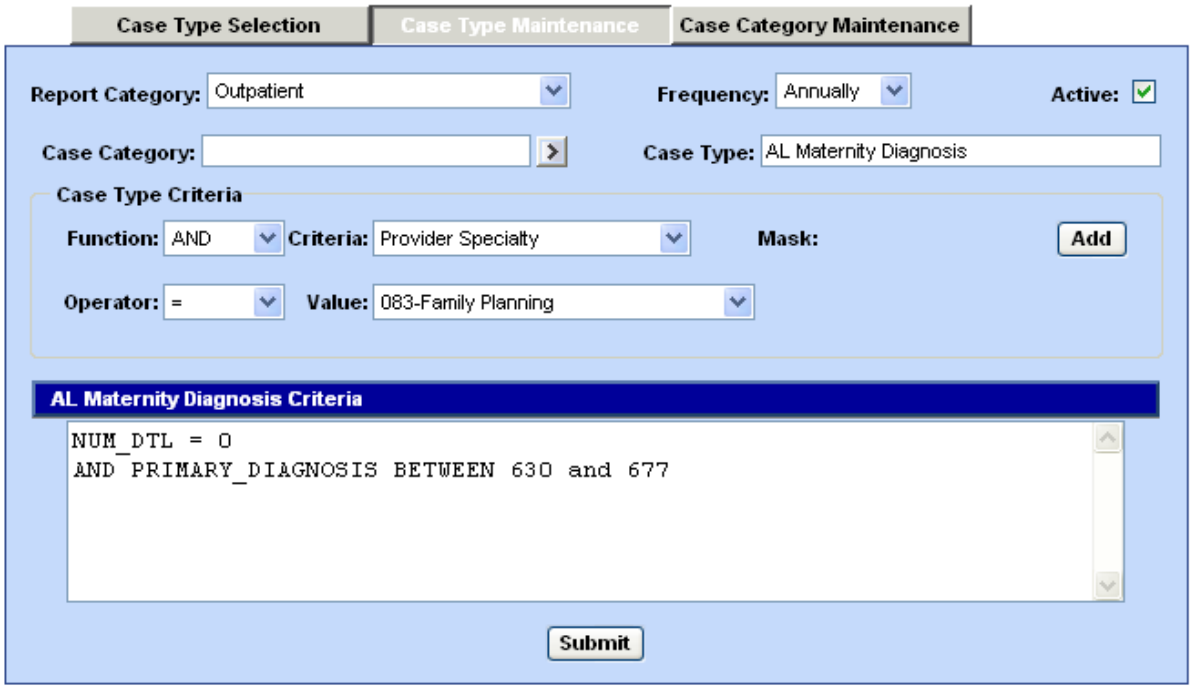
© 2019 DXC Technology Company. All rights reserved.

### 2.1.2.3 To Update a Case Type

Highlight the Case Type shown on the Case Type Selection tab, right click the mouse and select Update. Another way to select a Case Type for Update is double click on the Case Type. The criteria for the Case Type is displayed on the Case Type Maintenance window.

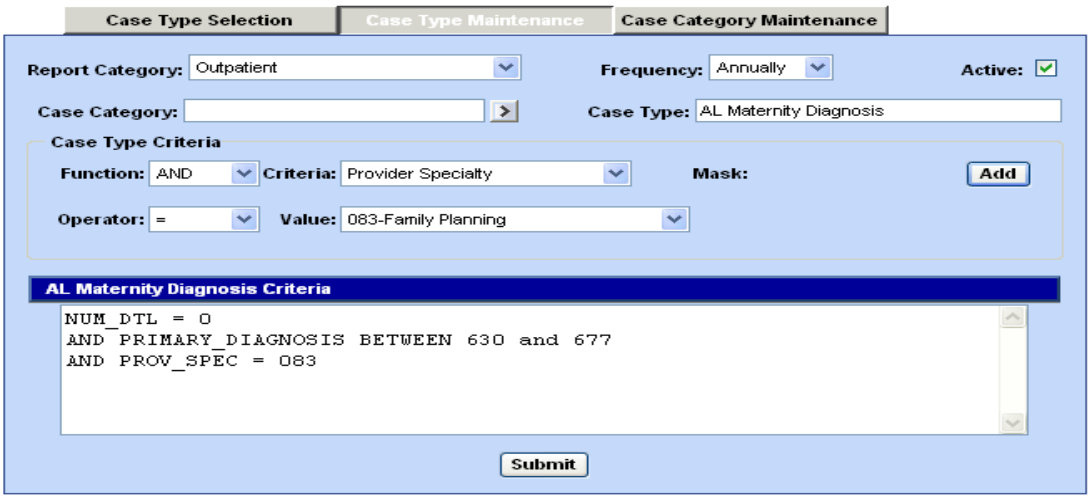


Use the drop down boxes for Report Category, Frequency and Case Category to update criteria for the Case Type.



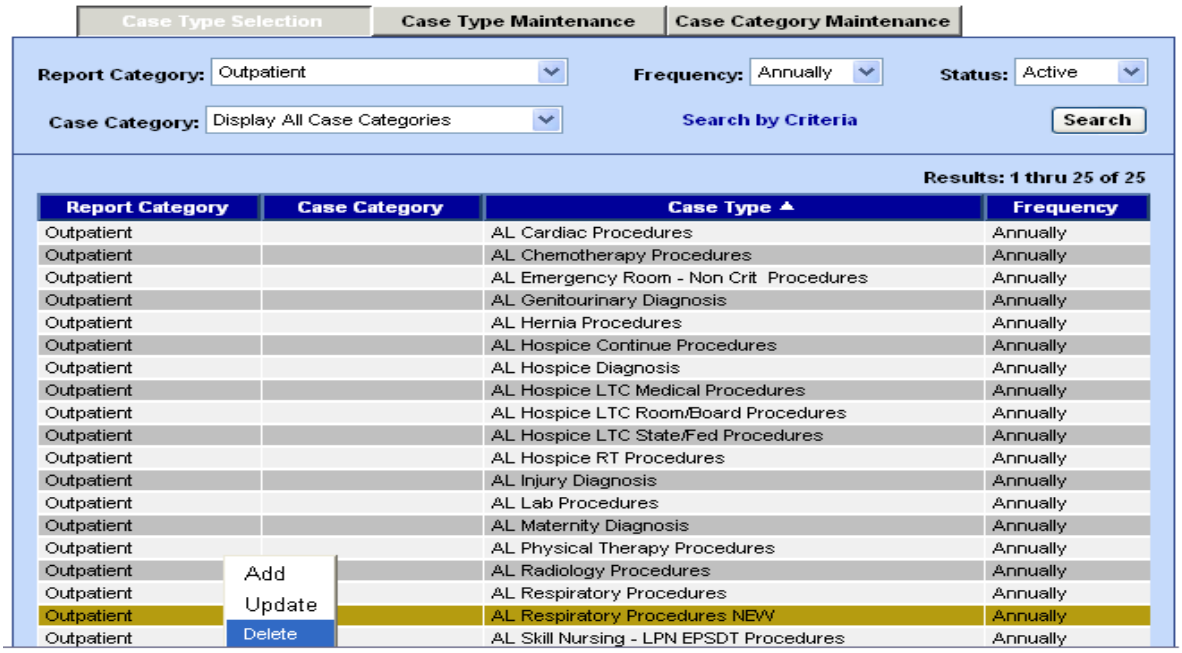
© 2019 DXC Technology Company. All rights reserved.

Use the Case Type Criteria items in the middle of the window to identify additional criteria. After the Case Type Criteria selections are made, select the Add button. The criteria will now be added to the white criteria box at the bottom. Another way to make an update is to place the cursor in the white criteria box at the bottom and type the correct conditions. NOTE: Specific field names must be used as these are database names. To remove existing conditions, highlight the condition and select the keyboard delete button. When all changes have been made select the Submit button. A message window displays to let the user know the Case Type was updated.



### 2.1.2.4 To Delete a Case Type

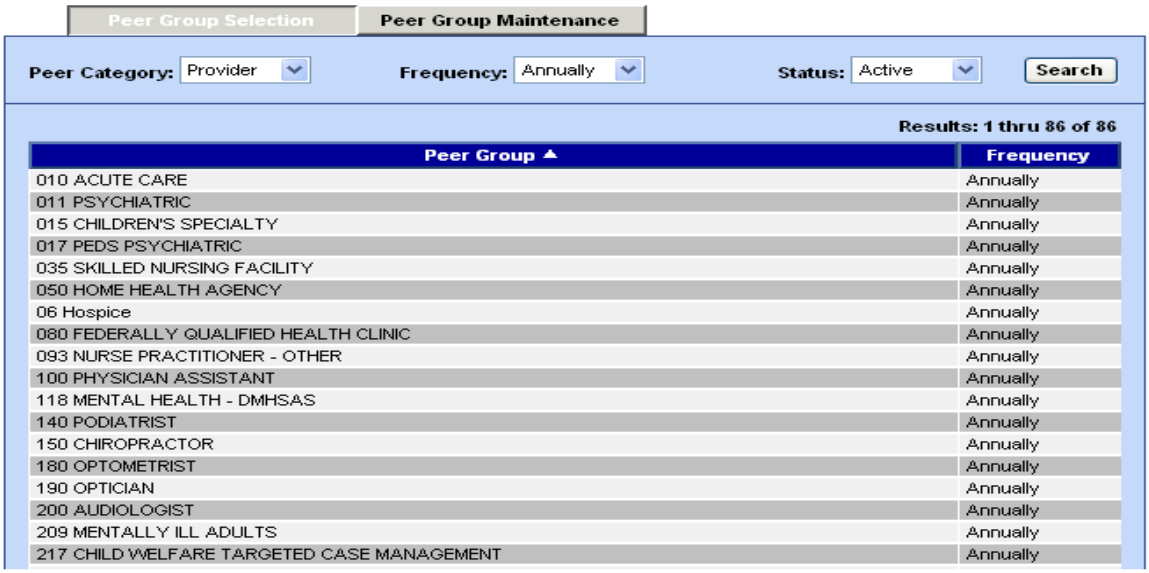
Highlight the Case Type shown on the Case Type Selection tab, right click the mouse and select **Delete**. A message window displays to ensure the Case Type selected is to be deleted, select **OK**. Another message window displays to let the user know the Case Type was deleted.



© 2019 DXC Technology Company. All rights reserved.

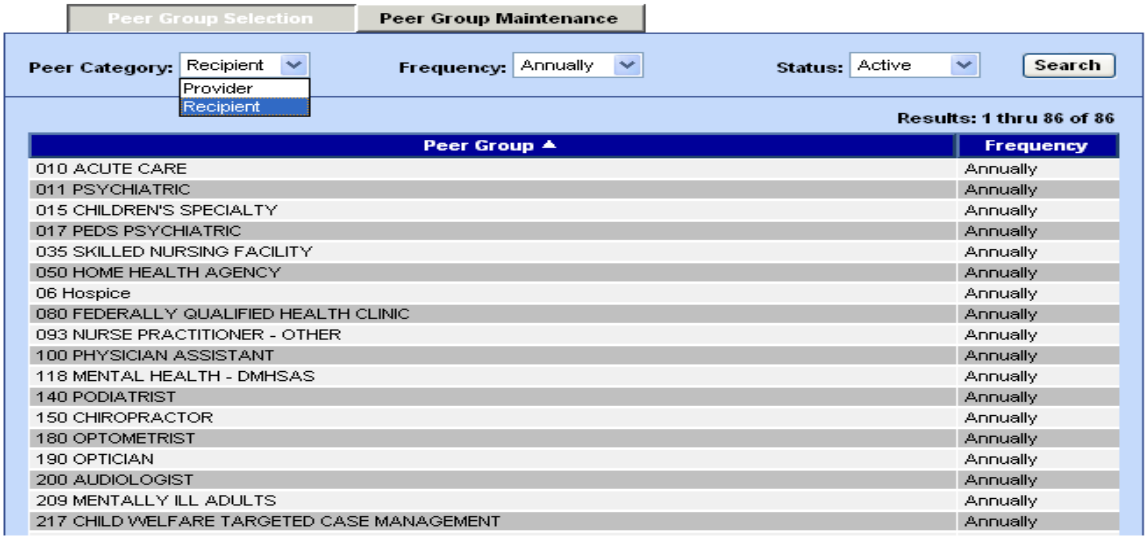
### 2.1.3 Peer Group Maintenance

From the Document List window select the hyperlink for “Peer Group Maintenance”. Peer group is defined as a grouping of providers or recipients that have similar characteristics, ( i.e. provider type or county code). Use the Peer Group Selection window to view all Peer Groups or selected Peer Groups displayed as the result of a search. The Peer Group Maintenance window allows the user to enter criteria for new Peer Groups or make updates to existing ones.



#### 2.1.3.1 To Search for an Existing Peer Group

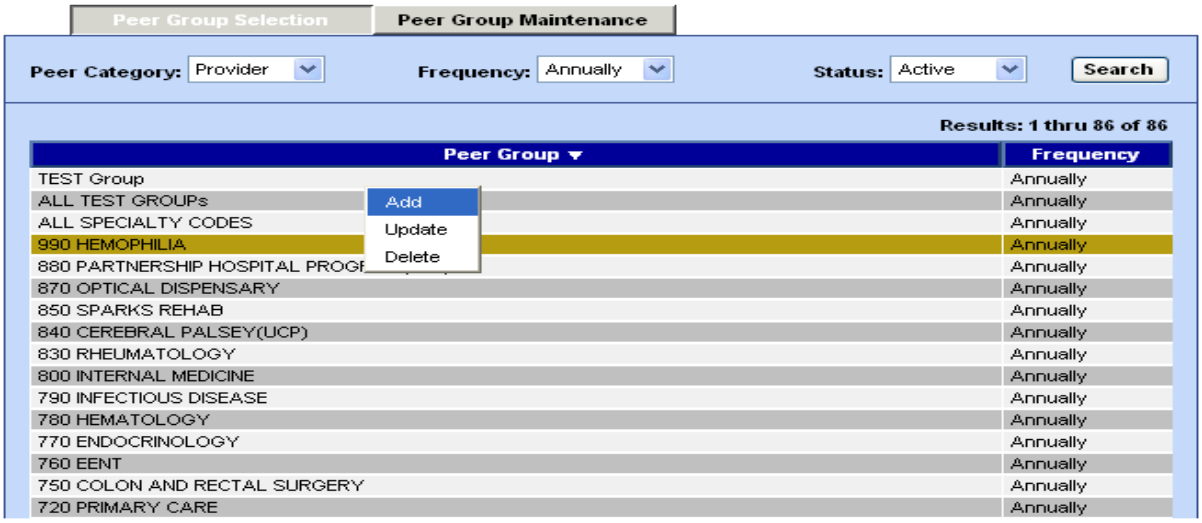
Use the drop down boxes for Peer Category, Frequency and Status to narrow the search criteria. Click the Search button. The Peer Groups meeting the search criteria are displayed. To change the sort order, click on the column for the desired sort. The triangle pointed down represents descending order and the triangle pointed up represents ascending order.



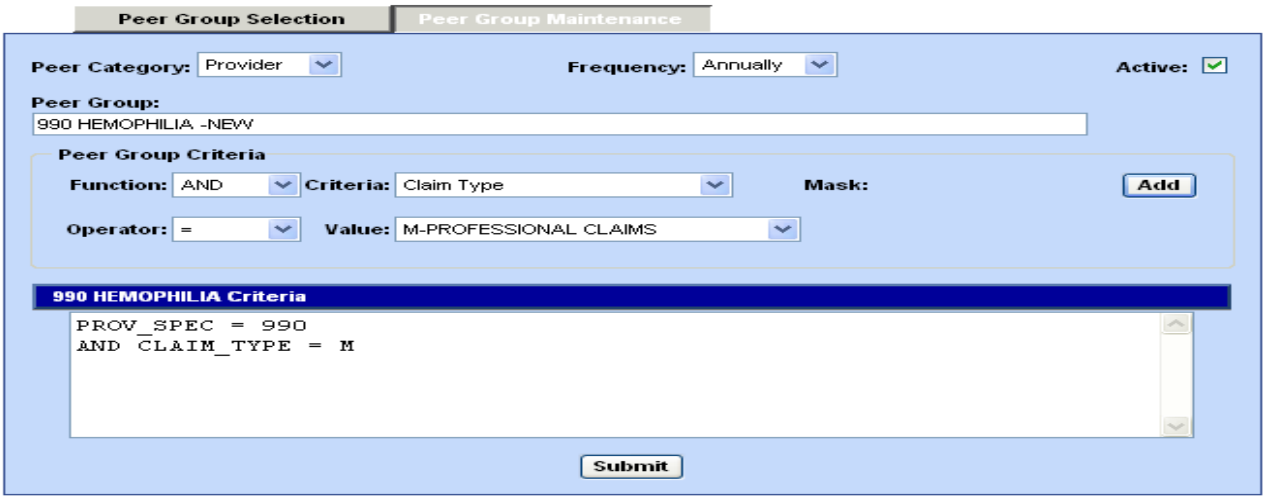
© 2019 DXC Technology Company. All rights reserved.

### 2.1.3.2 To Add a new Peer Group

Highlight any Peer Group, right click the mouse and select Add. To copy an existing Peer Group in order to create a new one, locate and highlight the Peer Group. The Peer Group Maintenance window is displayed.



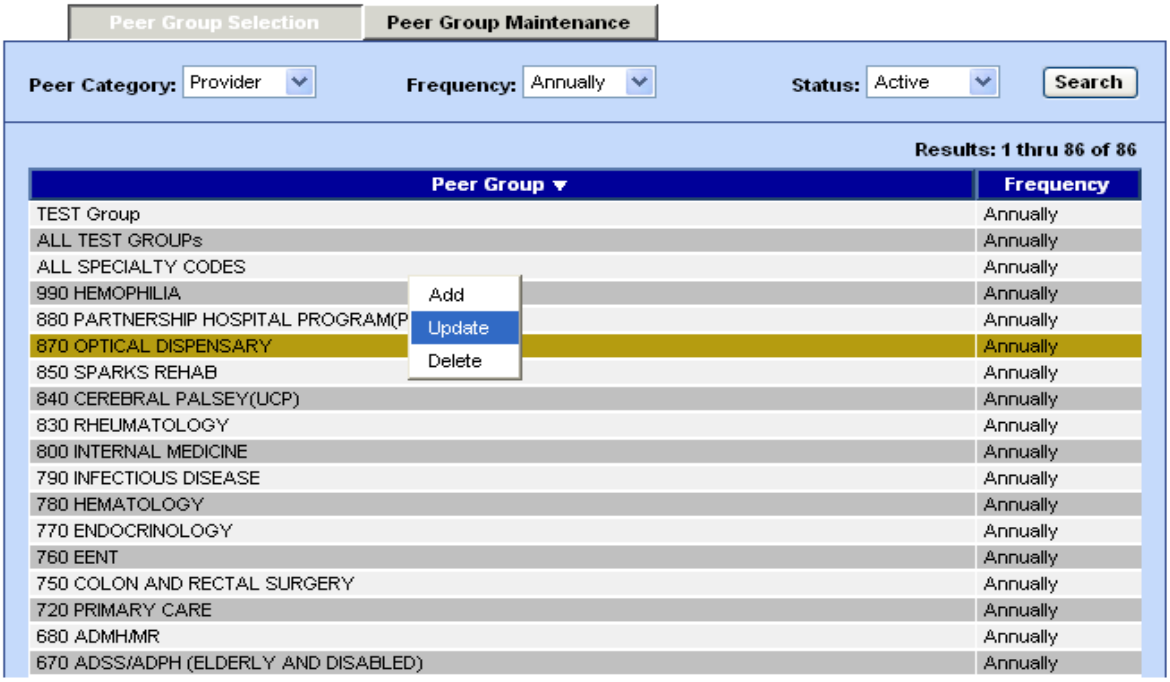
The original Peer Group selected on the Selection window is displayed, use the drop down boxes for Peer Category, Frequency and Status to establish the correct criteria for the new Peer Group. Change the Peer Group name to represent the new one. You must change the name in order for a new Peer Group to be created. Use the Peer Group Criteria items in the middle of the window to identify the criteria for the new Peer Group. After the Peer Group Criteria selections are made, select the Add button. The criteria will now be added to the white criteria box at the bottom. Another way to make an update is to place the cursor in the white criteria box at the bottom and type the correct conditions. NOTE: Specific field names must be used as these are database names. Select the Submit button to create the new Peer Group. A message window displays to let the user know the Peer Group was added.



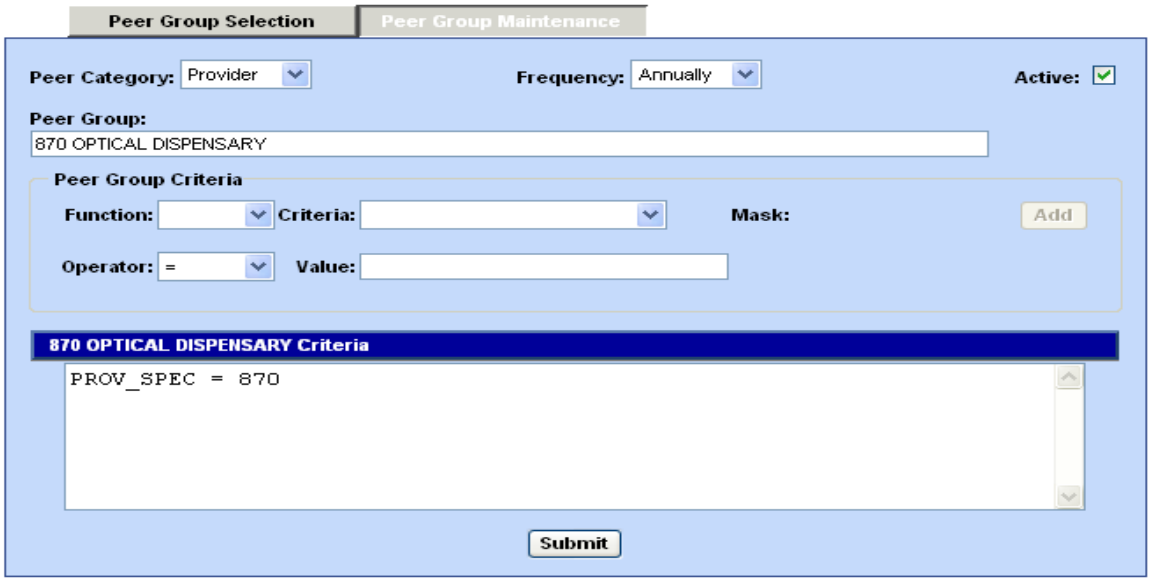
© 2019 DXC Technology Company. All rights reserved.

### 2.1.3.3 To Update a Peer Group

Highlight the Peer Group shown on the Peer Group Selection tab, right click the mouse and select Update. Another way to select a Peer Group for Update is double click on the Peer Group. The criteria for the Peer Group is displayed on the Peer Group Maintenance window.



Use the drop down boxes for Peer Category and Frequency to update criteria for the Peer Group.

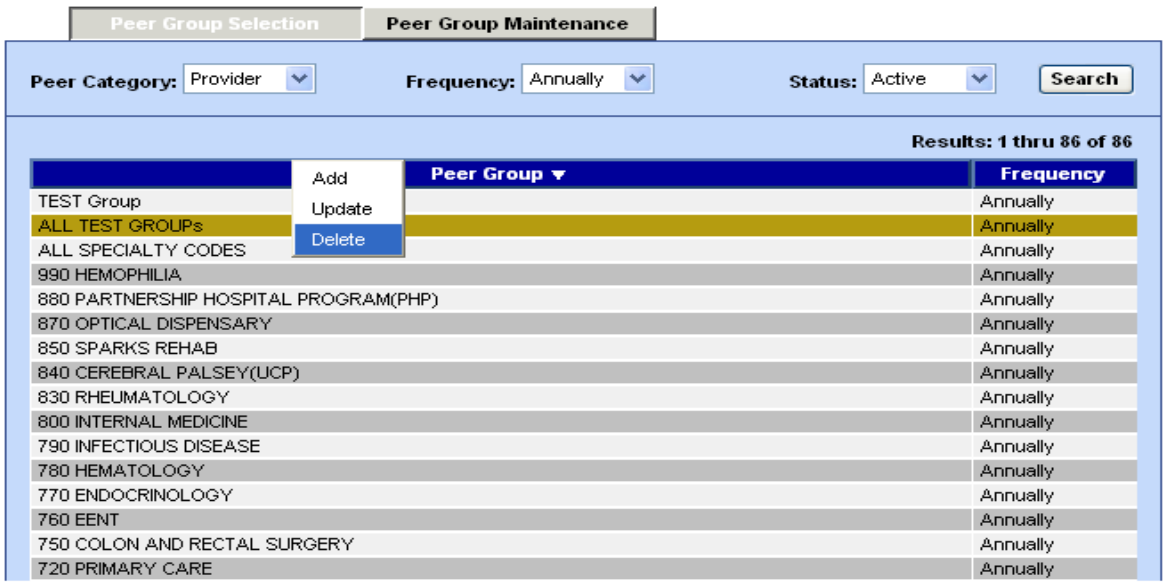


© 2019 DXC Technology Company. All rights reserved.

Use the Peer Group Criteria items in the middle of the window to identify additional criteria. After the Peer Group Criteria selections are made, select the Add button. The criteria will now be added to the white criteria box at the bottom. Another way to make an update is to place the cursor in the white criteria box at the bottom and type the correct conditions. NOTE: Specific field names must be used as these are database names. To remove existing conditions, highlight the condition and select the keyboard delete button. When all changes have been made select the Submit button. A message window displays to let the user know the Peer Group was updated.

### 2.1.3.4 To Delete a Peer Group

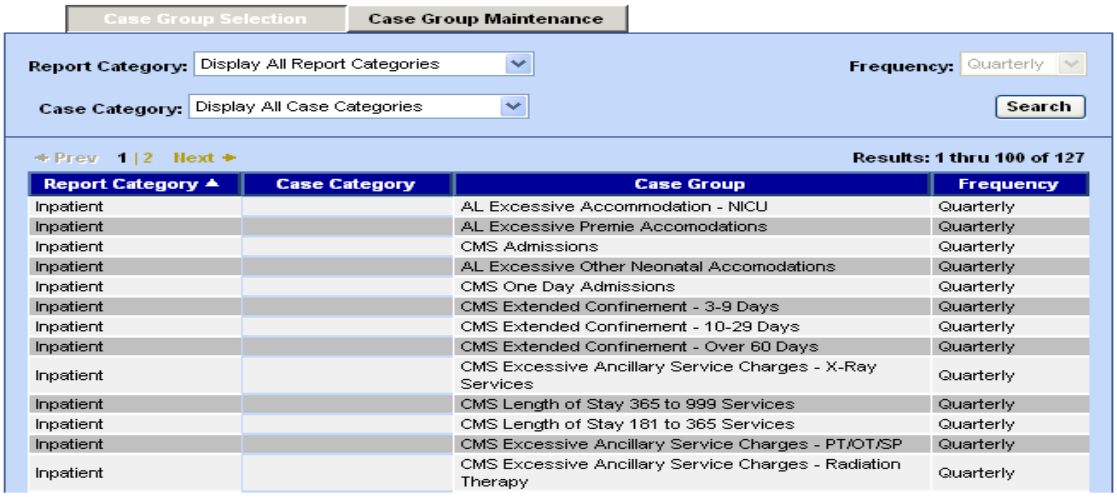
Highlight the Peer Group shown on the Peer Group Selection tab, right click the mouse and select Delete. A message window displays to ensure the Peer Group selected is to be deleted, select OK. Another message window displays to let the user know the Peer Group was deleted.



© 2019 DXC Technology Company. All rights reserved.

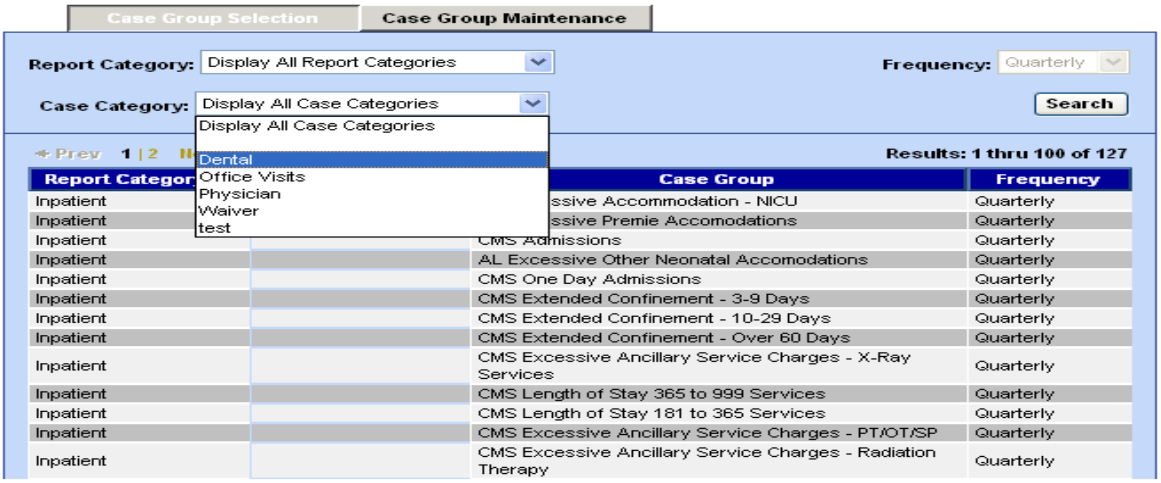
### 2.1.4 Case Group Maintenance

From the Document List window select the hyperlink for “Case Group Maintenance”. Case group is defined as a collection of case types used to define exception criteria for DSSProfiler reporting. Use the Case Group Selection window to view all Case Groups or selected Case Groups displayed as the result of a search. The Case Group Maintenance window allows the user to enter criteria for new Case Groups or make updates to existing ones. All Case Groups are associated with the quarterly Frequency so the Frequency selection is not available with Case Group Maintenance windows.



#### 2.1.4.1 To Search for an Existing Case Group

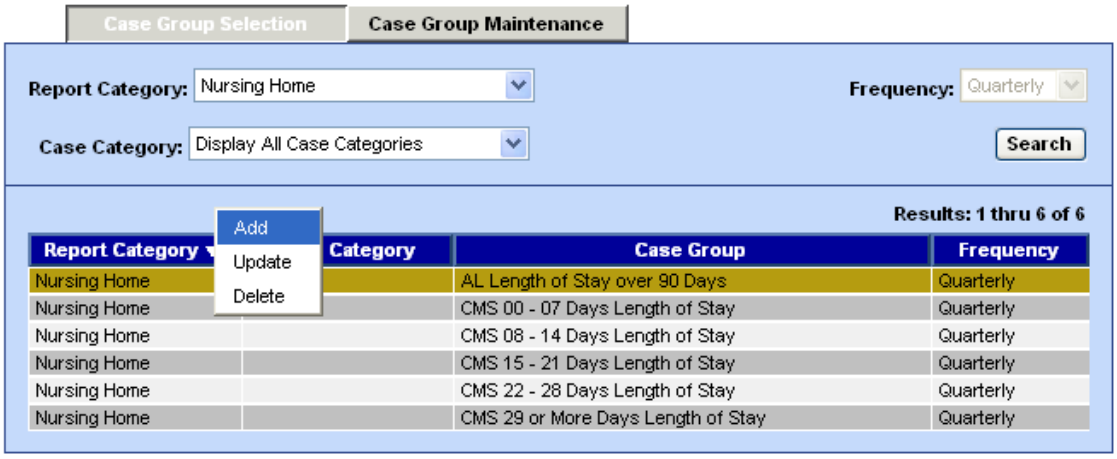
Use the drop down boxes for Report Category, and Case Category to narrow the search criteria. Click the **Search** button. The Case Groups meeting the search criteria are displayed. To change the sort order, click on the column for the desired sort. The triangle pointed down represents descending order and the triangle pointed up represents ascending order.



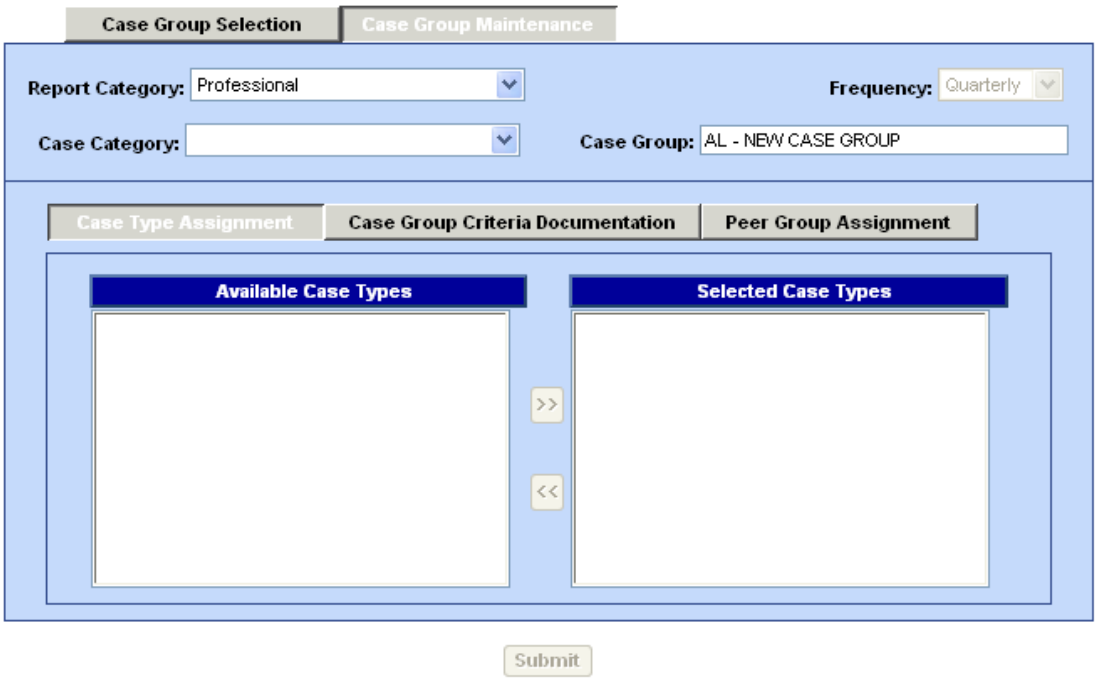
#### 2.1.4.2 To Add a New Case Group

Highlight any Case Group, right click the mouse and select **Add**. The Case Group Maintenance window is displayed.

© 2019 DXC Technology Company. All rights reserved.

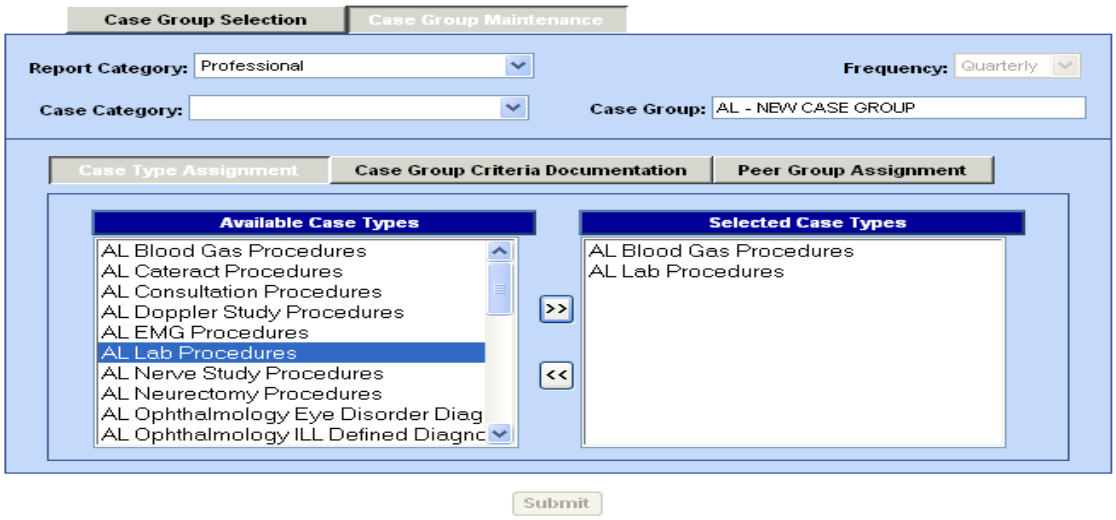


Use the drop down boxes for Report Category and Case Category to establish the correct criteria for the new Case Group. The user must enter a name and it must contain the prefix “AL – “. If the Case Types to be used in the new Case Group are associated with a specific Case Category, then select the same Case Category for the new Case Group; otherwise the list of available Case Types will not be displayed.

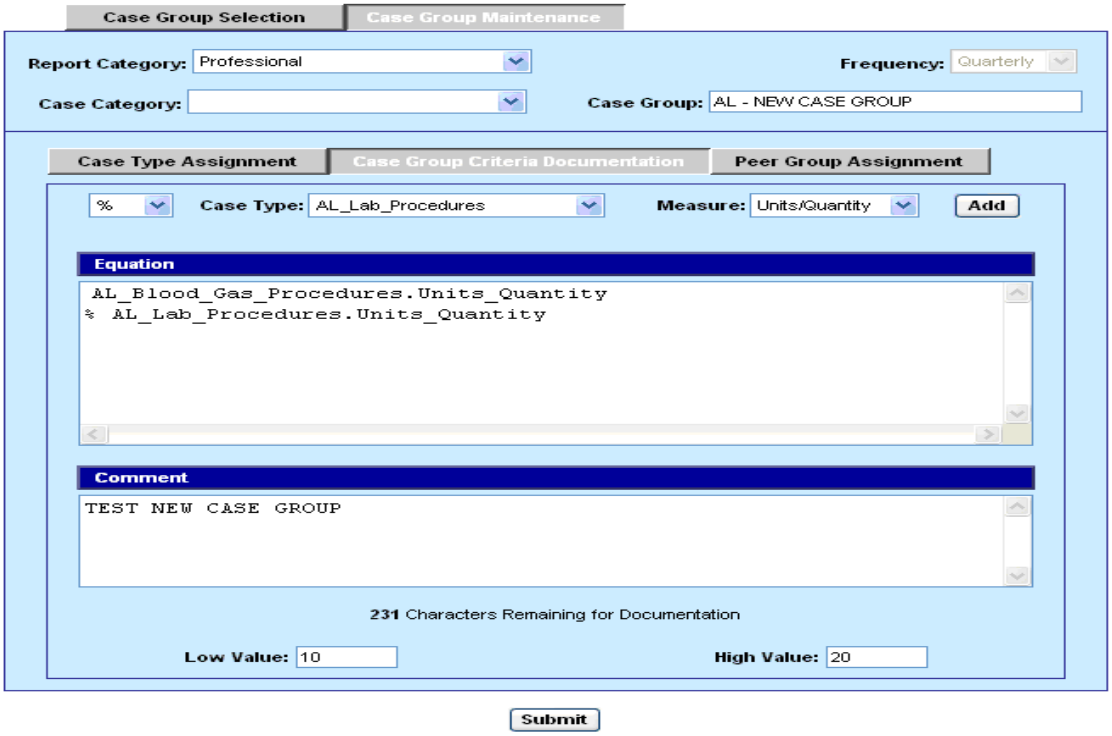


The user must assign Case Types to the Case Group and create the criteria before a Case Group can be saved. Click the mouse in the Available Case Types box for a list of Case Types. Use the >> and << buttons to select the correct Case Types to be used in the Case Group.

© 2019 DXC Technology Company. All rights reserved.

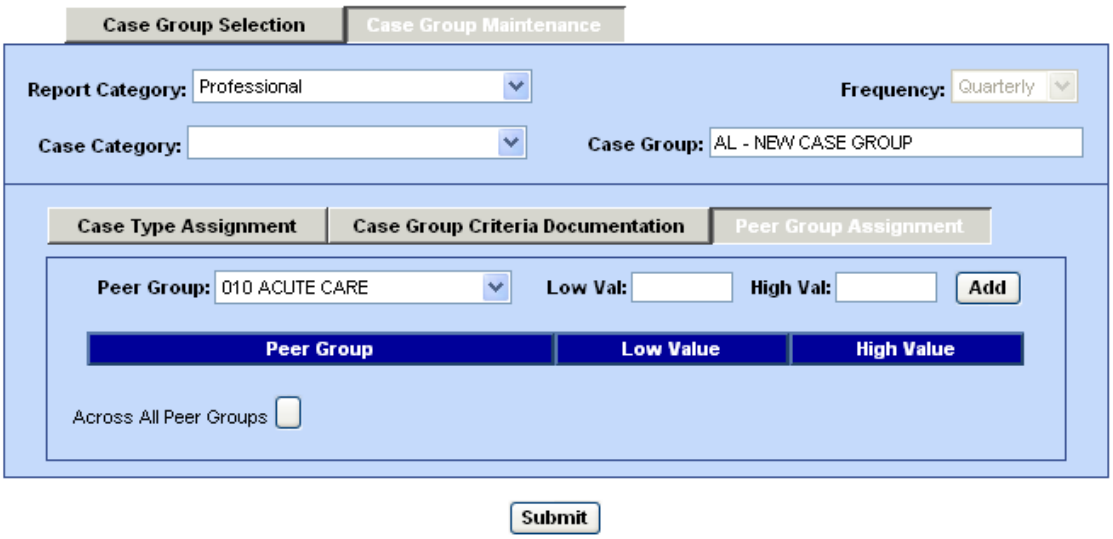


Select the Case Group Criteria Documentation tab in order to set up the equation to be used for the Case Group. Use the drop down boxes in the middle of the window to create the desired measure or equation. Select the Add button for the data to be added to the Equation box. Enter text in the Comments field and select the Low and High values to be used as default values. If the user does not need to specify a Low/High for a specific peer group, then select the Submit button to save the Case Group. A message window will display to let the user know the Case Group was added. Otherwise select the Peer Group Assignment tab.

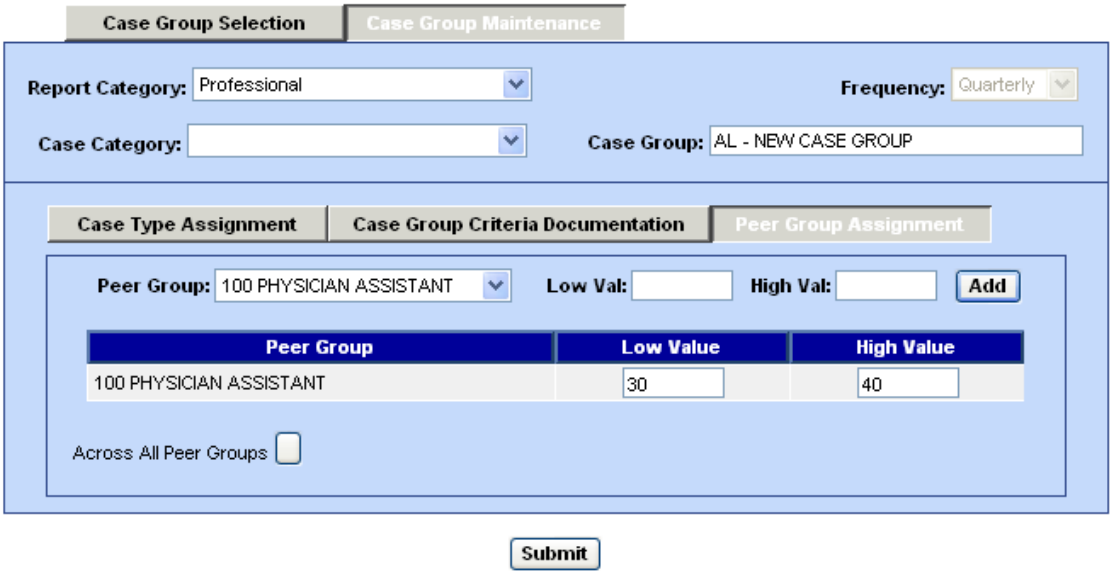


If special limits are needed for certain peer groups, the Peer Group Assignment tab can be used to establish the limits. This tab is not required. The default limits at the bottom of the Case Group Criteria Documentation tab will be used as a default for all peer groups, unless different limits are established on this tab.

© 2019 DXC Technology Company. All rights reserved.



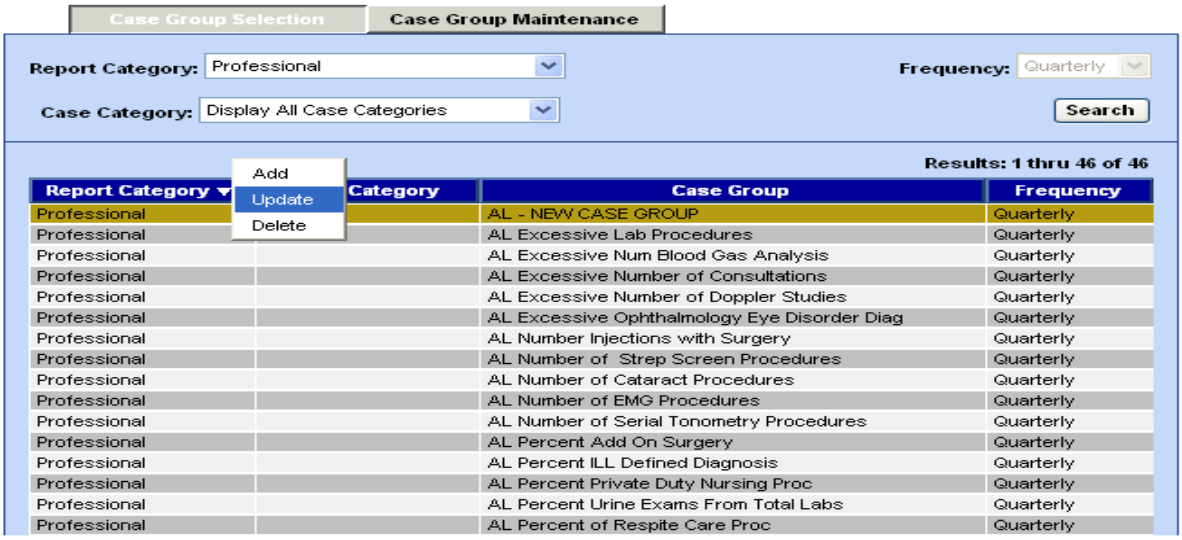
Use the drop down box to select the Peer Group. Enter the Low and High values that should apply to the selected Peer Group. Select the Add button and the limits will be added to the list at the bottom. Select the Submit button. A message window displays to let the user know the Case Group was added.



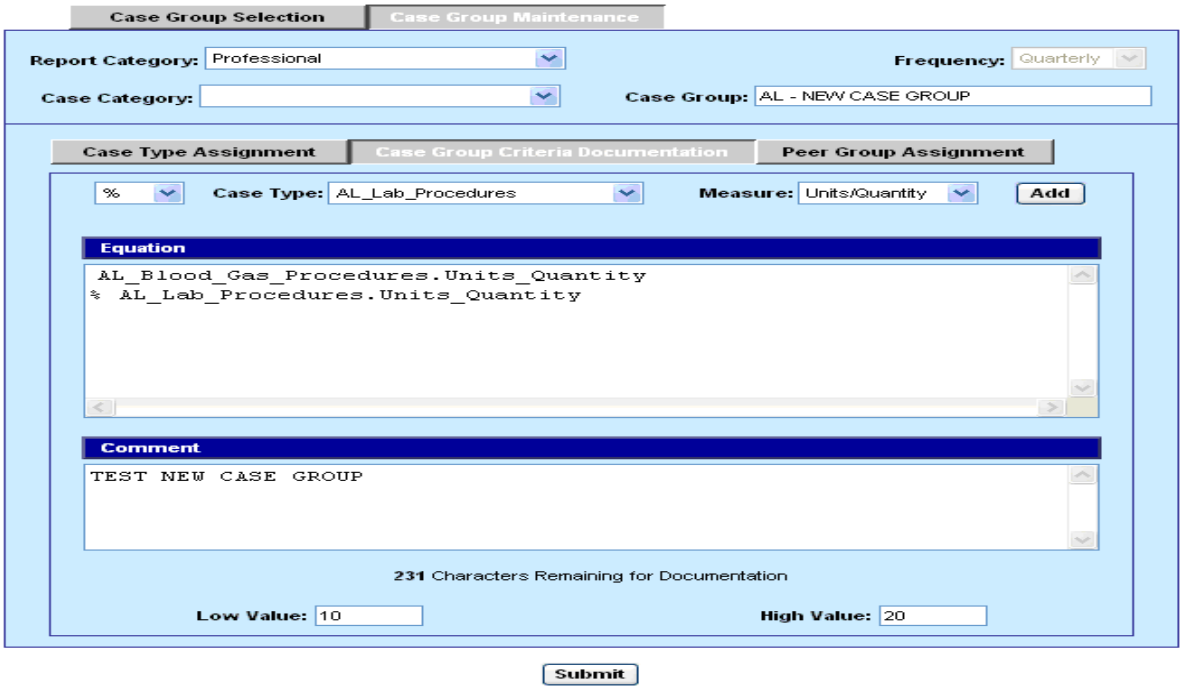
© 2019 DXC Technology Company. All rights reserved.

### 2.1.4.3 To Update a Case Group

Highlight a Case Group shown on the Case Group Selection window, right click the mouse and select Update. Another way to select a Case Group for Update is double click on the Case Group. The criteria for the Case Group is displayed on the Case Group Maintenance window.



Use the drop down boxes for Report Category and Case Category to update criteria for the Case Group. Select the Case Type Assignment tab to add or remove Case Types from the Case Group. Select the Case Group Criteria Documentation tab to update the measure or equation for the Case Group. Select the Peer Group Assignment tab to make updates to the peer group limits. Select the Submit button to save the updates. A message window displays to let the user know the Case Group was updated.



© 2019 DXC Technology Company. All rights reserved.

### 2.1.4.4 To Delete a Case Group

Highlight the Case Group shown on the Case Group Selection window, right click the mouse and select Delete. A message window displays to ensure the Case Group selected is to be deleted, select OK. Another message window displays to let the user know the Case Group was deleted.

## 2.2 Case Tracking

The Alabama Surveillance and Utilization Review (SUR) Case Tracking function replaces many of the manual operations throughout the SUR case review process with systematic approaches. Browser-based windows replace many of the manual operations such as providing auto-assignment of case reviews and online updating of case documentation. In addition, the SUR Case Tracking function allows for the viewing of imaged incoming correspondence and photocopied medical records from on-site audits.

For further details related to the SUR Case Tracking function, refer to the SUR Case Tracking User Manual.

## 2.3 Random Sample Overview

The Random Sample Application provides the ability to generate summary reports from a statistically valid random sampling process. The random sample process is initiated and accessed through browser-based windows from the Data Warehouse web site. Through this web site, users can specify if they want to sample claims for providers or recipients, and they can specify the date ranges and other filter conditions such as specific claim types or code values. The results from the sample are stored in the Data Warehouse where the results can be reported on summary web screens or from reports generated through the Data Warehouse.

The Random Sample Application includes several windows to assist the user in either pulling a random sample of claims or 100% of the claims sorting and viewing the results. It also produces spreadsheets of the claims selected, as well as sends the results to the SUR universe in the DSS. The following pages include how to access the application, describe the windows and define the elements in the spreadsheets and SUR universe.

## 2.4 Accessing the Random Sample Application

Login to DSS InfoView. On the “Navigate” side of the panel, select the “Document List” folder hyperlink. Then expand the “Public Folders” folder, and select the folder entitled “SUR-Random Sample Application”. This takes you to the “Document List” window, with only the Random Sample application hyperlinks shown. Then double-click the hyperlink “Random Sample Request”.

After clicking the hyperlink, the user is taken to the Request Information window of the Random Sample application.

### 2.4.1 Random Sample - 1 -Request Information Tab

Use the Random Sample - 1 - Request Information Tab to generate a random claim sample for a provider or a recipient. Access this page by selecting the Random Sample link from the Navigator window. Use this first tab to set up the basic information on the request such as the provider/recipient, dates and the sample size. Other tabs described later in this document include information on filtering the request.

When the random sample request is entered, press Submit to generate the random sample request. The request is saved and a batch process runs the request. The Random Sample Log tab is available to check on the status of the request.

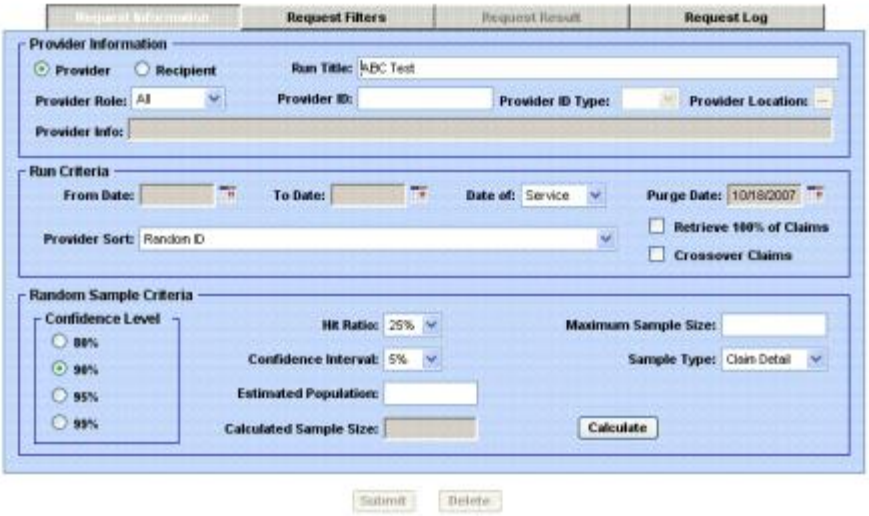
© 2019 DXC Technology Company. All rights reserved.

The page can be accessed in two different ways:

A. Open the Random Sample window and enter a provider ID and the claim criteria to restrict the results. The random sample is performed on the selected date range from at least three years plus the current year of claims data.

B. Open the Random Sample window and enter a recipient ID and the claim criteria to restrict the results. The random sample is performed on the selected date range from at least three years plus the current year of claims data.

**A**



**B**

### 2.4.2 Random Sample - 2 - Request Filters Tab

Use the Random Sample - 2 - Request Filters Tab to enter specific criteria to limit the results of the Random Sample process.

Select from the following list for a Provider random sample:

- Billed Amount;
- Claim Type;
- Diagnosis Related Group (DRG) Code;
- Internal Control Number (ICN);
- Claim Indicator (‘F’ for Fee-for-Service and/or ‘E’ for Encounters; default is both);
- District Plan Code;
- National Drug Code (NDC);
- Paid Amount;
- Place of Service;
- Primary Diagnosis Code;
- ICD Version Code (9, 0, or # for "ICD-9", "ICD-10", and "undefined" respectively);
- Primary Procedure Code;
- Provider Type;
- Provider Specialty;
- Therapeutic Class;
- Prior Authorization Number;
- Lockin Indicator;
- Allowed Amount;
- Medicare Paid Amount;
- Other Insurance Amount;
- Wrap Payment Indicator

For a Recipient random sample, the following list is available:

- Billed Amount;
- Claim Type;
- DRG Code;
- ICN;
- Claim Indicator (‘F’ for Fee-for-Service and/or ‘E’ for Encounters; default is both);
- District Plan Code;
- NDC Code;
- Paid Amount;
- Place of Service;

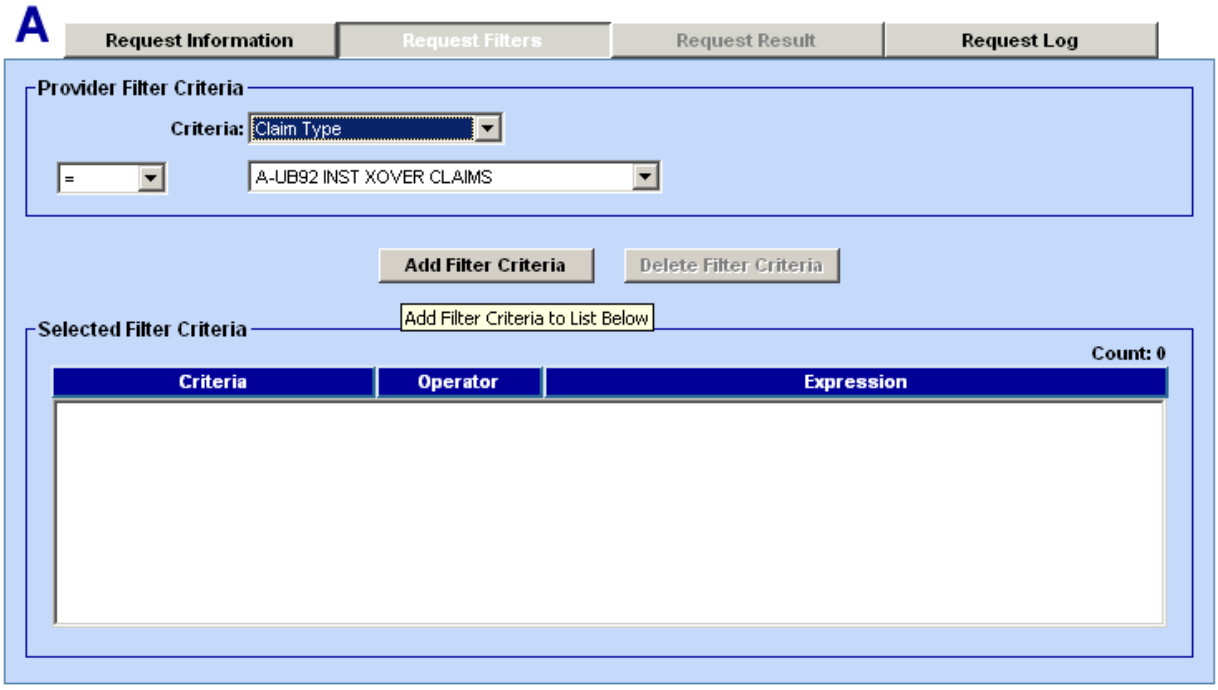
© 2019 DXC Technology Company. All rights reserved.

- Primary Diagnosis Code;
- ICD Version Code (9, 0, or # for "ICD-9", "ICD-10", and "undefined" respectively);
- Primary Procedure Code;
- Allowed Amount;
- Prior Authorization Number;
- Allowed Amount;
- Medicare Paid Amount;
- Other Insurance Amount;
- Referring Provider;
- Rendering Provider;
- Therapeutic Class;
- Wrap Payment Indicator

The user has the ability to add and delete from the list of filter condition codes.

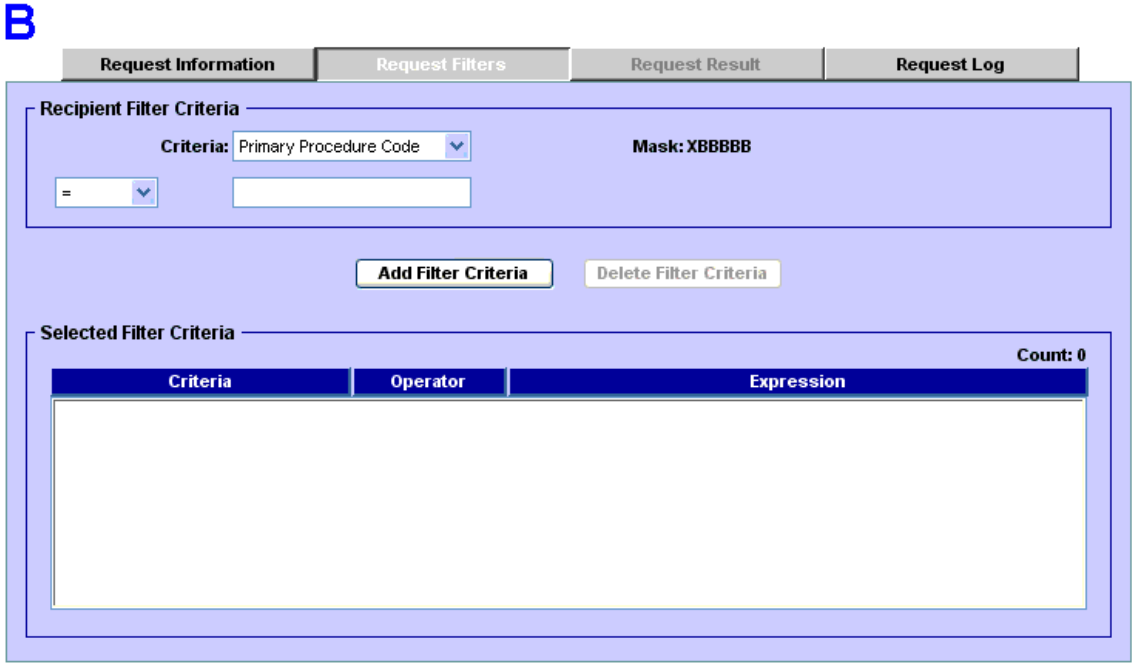
There are two layouts for this window below. Layout A is the layout if a Random Sample of a Provider is selected. Layout B is for a Recipient Random Sample. The field names have a letter in front, designating the layout on which it can be found.

#### 2.4.2.1 Random Sample - 2 - Request Filters Tab Layout A



© 2019 DXC Technology Company. All rights reserved.

### 2.4.2.2 Layout B is for a Recipient Random Sample



© 2019 DXC Technology Company. All rights reserved.

### 2.4.3 Random Sample - 3 - Request Result Tab

The Random Sample - 3 - Request Result Tab displays the Random Sample status and results. This tab displays the detail or header claim results of the Random Sample request. It displays the ICN, Detail Number (Dtl No), From Date of Service (DOS), To DOS, Amt Billed, Amt Paid, Amt MCO, Paid Date and Random ID. If the user requires more claim information, hyperlink to more claim information by clicking on the “Dtl No” associated with ICN they are interested in researching.

Two layouts for this Random Sample window are listed below. Layout A is for Provider Random Sample and layout B is for Recipient Random Sample. The field names have a letter in the front, designating the layout on which they can be found.

### 2.4.4 Random Sample - 4 - Request Log Tab

The Random Sample - 4 - Request Log tab lets users view the status of all random sample requests. A batch process runs the random sample requests and stores the results in a table for the user to view. This page is the main entry point to view all requests.

The user may also access this window directly from the Document List window by using the hyperlink ‘Random Sample Log’.

The user has the ability to click on a request to view the following:

A. Request Information: Click the request ID hyperlink to access the Request Information tab. All fields are viewed only with the exception of the Purge Date.

B. Request Result: Click the Sample Size hyperlink to access the Request Result tab, which displays the claims that meet the criteria.

## 3.3 Report Layouts and Descriptions

Some information in this section is represented in table format. In order to fit information on the page, some data field information may wrap to the next line.

Within the DSSProfiler reports is a tab labeled as, Notes. This tab contains the report information which can also be found in the narrative for each report within this manual. Example A below shows the layout and narrative of DSSProfiler report, TQ – Antibiotics 12 Months or Longer. Example B below shows the Notes tab found on this report.

Example A:

TQ – Antibiotics 12 Months or Longer

This report is used to identify recipients who have continuously been on any combination of antibiotics for 12 months prior to the date of the end of From Date of Service or longer. The report looks for standard therapeutic class codes 21, 22, 24, 25, 26, and 27.

**Alabama Medicaid Agency**

Antibiotics 12 Months or Longer

From Date of Service: 03/31/2005

User ID:
Run Date: 09/20/2006
Run Time: 5:31:57 PM

| Recipient ID | Recipient Name | USER_ID | Recipient Age | Recipient Gender | ICN | Adjusted ICN | Previous ICN | Prescriber |
|---|---|---|---|---|---|---|---|---|

No Data This Report Run

Example B:

This report is to identify recipients who have continuously been on any combination of antibiotics for 12 months prior to the From Date of service entered.

Report criteria:
Claim Type = P or Q and
Claim Status = P or V and
Latest Claims Only and
All Prescribing Provider Types and
User specified From Day of Service range and
Standard Therapeutic Class Code = 21, 22, 24, 25, 26, 27 and
Fee for Service Claim only

### 3.5.4 DSSProfiler - Dental Claim Details by Provider

Based on the user-entered date range of one year, this report lets the user drill down to the detail level for all inpatient annual case types for a given provider and service location. Additionally, the top procedures and diagnoses are displayed, as well as a list of recipients served.

The four tabs in this report are:

A. Inpatient Claim Details;

B. Recipient Listing;

C. Diagnosis Listing; and

D. Procedure Listing.

### 3.5.6 DSSProfiler - Inpatient Case Type Comparison by Peer Group

The Inpatient Case Type Comparison by Peer Group report is created in DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all providers within a peer group to determine which providers fall outside of service dollar 'norms' on a user specified service category. All information is age and gender adjusted so that differences in patient mix do not affect the results. Any of the individual case types shown in the pre-defined case types report (below) can be analyzed. Providers who have two standard deviations above or below the 'norm' for the peer group are highlighted.

This report provides a rapid method to find which providers need to be analyzed more closely at a case type level, utilizing other reports within the DSSProfiler. This report makes it easy to see, for example, which are the providers of asthma services who fall outside of the accepted 'norm' within the peer group.

The three tabs in this report are:

A. Provider Comparison;

B. Average Amount per Recipient by Age/Gender; and

C. Average Amount per Recipient All Providers by Selected Age/Gender.

A

**Alabama Medicaid Agency**

### 3.5.6.1 DSSProfiler - Inpatient Case Type Comparison by Peer Group Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Dollar Difference | Difference in the actual amount provider was paid and the amount provider was expected to receive (based on the peer group adjustment methodology). | 13 | Number (Decimal) |
| (A) Exception | Indicates providers who are 2 standard deviations above or below the "norm" for the peer group. | 1 | Character |
| (A) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A) Expected Rank | Provider's rank based on the amount provider should have been paid based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of provider's specialty peer group. | 3 | Number (Integer) |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A) Rank | Provider's rank based on the actual money paid by the program. | 3 | Number (Integer) |
| (A) Raw Rank | Provider's rank based on the amount provider was paid. | 3 | Number (Integer) |
| (A,B,C) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A,B,C) Case Type | A user defined group based on the case type created in Case Maintenance. The claim grouping should be specific to the area of service. | 100 | Character |
| (A,B,C) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A,B,C) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A,B,C) Provider Name | Provider's full name. | 50 | Character |
| (A,B,C) Provider Peer Group | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| (B) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |
| (B,C) Age Group | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64, and 65+. | 24 | Character |
| (B,C) Gender | Recipient's gender. | 1 | Character |
| (B,C) Paid Amount Per Recipient | Actual amount the provider was paid per recipient. | 13 | Number (Decimal) |
| (A,B,C) Provider ID | Provider identification number. | 15 | Character |

### 3.5.7 DSSProfiler - Inpatient Case Type Comparison by Peer Group Quarterly

Based on the user-entered date range of one quarter, this report displays and compares all providers within a quarterly inpatient peer group to determine which providers fall outside of service dollar 'norms' for a case type. All information is age and gender adjusted so that differences in patient mix do not affect the results. Providers who have two standard deviations above or below the 'norm' for the peer group are highlighted.

The three tabs in this report are:

A. Provider Comparison;

B. Average Amount per Recipient by Age/Gender; and

C. Average Amount per Recipient All Providers by Selected Age/Gender.

### 3.5.8.1 DSSProfiler - Inpatient Claim Details by Provider - FFS Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Age | The age of the recipient on the From Date of Service rounded down to a full year. | 4 | Number (Integer) |
| (A) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A) Bill Qty | Quantity billed for the service rendered. | 2 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Claim Type (CT) | Shows what type of claim was submitted. | 1 | Character |
| (A) DOB | Recipient's Date of Birth | 10 | Date (MM/DD/CCYY) |
| (A) Detail Number (Dtl#) | Claim line number. | 4 | Number (Integer) |
| (A) Diag | The primary ICD-CM diagnosis code. | 7 | Character |
| (A) Diag Desc | The primary ICD-CM diagnosis code description. | 60 | Character |
| (A) Diag 2 | The secondary ICD-CM diagnosis code. | 7 | Character |
| (A) Diag 2 Desc | The secondary ICD-CM diagnosis code description. | 60 | Character |
| (A) DRG Code and Description | Diagnosis Related Group Number assigned to the claim, and its description. | 60 | Character |
| (A) DRG Relative Weight | Relative weight for pricing DRG | 5 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) DRG Service Adjuster | This field contains the pediatric value if recipient age at admission is less than pediatric age cut-off value. Otherwise, it will be adult service adjustor | 3 | Number (Decimal) |
| (A) From Date of Service (FDOS) | Claim's first date of service. | 10 | Date (MM/DD/CCYY) |
| (A) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A) MD1 | First Modifier code for the procedure code billed. | 2 | Character |
| (A) MD1 Desc | Description for the First Modifier code of the procedure code billed. | 40 | Character |
| (A) MD2 | Second Modifier code for the procedure code billed. | 2 | Character |
| (A) MD2 Desc | Description for the Second Modifier code of the procedure code billed. | 40 | Character |
| (A) MD3 | Third Modifier code for the procedure code billed. | 2 | Character |
| (A) MD3 Desc | Description for the Third Modifier code of the procedure code billed. | 40 | Character |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A)Place of Service (POS) | Place of Service code for where services were rendered. | 2 | Number (Decimal) |
| (A) Proc | Procedure Code for the detail. | 6 | Character |
| (A) Proc Desc | Procedure Code description for the detail. | 40 | Character |
| (A) To Date of Service (TDOS) | Claim's last date of service. | 10 | Date (MM/DD/CCYY) |
| (A,B)Recipient Full Name (Recip Name) | The recipient last name and first name. The format of the name will be in: last name, first name. | 22 | Character |
| (A,B)Recipient ID (Recip ID) | Recipient Medicaid Number. | 12 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A,C) ICD Version for Diagnosis 1 | The ICD Version code for the primary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A,C) ICD Version for Diagnosis 2 | The ICD Version code for the secondary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A-D) Claim Types (prompt) | The code indicating the type of claim record the provider used for billing the rendered service. | 1 | Character |
| (A-D) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-D) Run Date | The date that the report was executed. | 10 | Date (MM/DD/CCYY) |
| (A-D) Run Time | The time that the report was executed. | 11 | Character |
| (A-D) User ID | The user that created the report. | 50 | Character |
| (A-D) Provider Base, Medicaid or NPI ID (prompt) | Lists the NPI, Medicaid, and Base ID for the attending Provider. | 63 | Character |
| (B) ICN Count | Unduplicated count of claims for the recipient within that provider. | 8 | Number (Integer) |
| (C) Diagnosis 1 - Code & Desc | The primary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 2 - Code & Desc | The secondary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 3 - Code & Desc | The third ICD-CM diagnosis code and its description. | 70 | Character |
| (C) ICD Version for Diagnosis 3 | The ICD Version code for the third ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (C) ICN Count | Unduplicated count of claims for Diagnosis codes. | 8 | Number (Integer) |
| (C,D) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |
| (D) ICN Count | Unduplicated count of claims for procedure code. | 8 | Number (Integer) |
| (D) Procedure Code & Description | Concatenate procedure code and description into one object. | 47 | Character |

### 3.5.9 DSSProfiler - Inpatient Claim Details by Provider Quarterly - FFS

Based on the user-entered date range of one quarter, this report lets the user drill down to the detail level for all inpatient quarterly case types for a given provider and service location. This report displays all detailed claims information categorized by the individual case types. Additionally, the top procedures and diagnoses are displayed, as well as a list of recipients served.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The four tabs in this report are:

A. Inpatient Claim Details;

B. Recipient Listing;

C. Diagnosis Listing; and

D. Procedure Listing.

### 3.5.9.1 DSSProfiler - Inpatient Claim Details by Provider Quarterly - FFS Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Age | The age of the recipient on the From Date of Service rounded down to a full year. | 4 | Number (Integer) |
| (A) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A) Bill Qty | Quantity billed for the service rendered. | 2 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Claim Type (CT) | Shows what type of claim was submitted. | 1 | Character |
| (A) DOB | Recipient's Date of Birth | 10 | Date (MM/DD/CCYY) |
| (A) Detail Number (Dtl#) | Claim line number. | 4 | Number (Integer) |
| (A) Diag | The primary ICD-CM diagnosis code. | 7 | Character |
| (A) Diag Desc | The primary ICD-CM diagnosis code description. | 60 | Character |
| (A) Diag 2 | The secondary ICD-CM diagnosis code. | 7 | Character |
| (A) Diag 2 Desc | The secondary ICD-CM diagnosis code description. | 60 | Character |
| (A) DRG Code and Description | Diagnosis Related Group Number assigned to the claim, and its description. | 60 | Character |
| (A) DRG Relative Weight | Relative weight for pricing DRG | 5 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) DRG Service Adjuster | This field contains the pediatric value if recipient age at admission is less than pediatric age cut-off value. Otherwise, it will be adult service adjustor | 3 | Number (Decimal) |
| (A) From Date of Service (FDOS) | Claim's first date of service. | 10 | Date (MM/DD/CCYY) |
| (A) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A) MD1 | First Modifier code for the procedure code billed. | 2 | Character |
| (A) MD1 Desc | Description for the First Modifier code of the procedure code billed. | 40 | Character |
| (A) MD2 | Second Modifier code for the procedure code billed. | 2 | Character |
| (A) MD2 Desc | Description for the Second Modifier code of the procedure code billed. | 40 | Character |
| (A) MD3 | Third Modifier code for the procedure code billed. | 2 | Character |
| (A) MD3 Desc | Description for the Third Modifier code of the procedure code billed. | 40 | Character |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A)Place of Service (POS) | Place of Service code for where services were rendered. | 2 | Number (Decimal) |
| (A) Proc | Procedure Code for the detail. | 6 | Character |
| (A) Proc Desc | Procedure Code description for the detail. | 40 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) To Date of Service (TDOS) | Claim's last date of service. | 10 | Date (MM/DD/CCYY) |
| (A,B)Recipient Full Name (Recip Name) | The recipient last name and first name. The format of the name will be in: last name, first name. | 22 | Character |
| (A,B)Recipient ID (Recip ID) | Recipient Medicaid Number. | 12 | Character |
| (A,C) ICD Version for Diagnosis 1 | The ICD Version code for the primary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A,C) ICD Version for Diagnosis 2 | The ICD Version code for the secondary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A-D) Claim Types (prompt) | The code indicating the type of claim record the provider used for billing the rendered service. | 1 | Character |
| (A-D) Quarter (prompt) | The quarter for which the report is being run. | 5 | Date (CCYYQ) |
| (A-D) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-D) Run Date | The date that the report was executed. | 10 | Date (MM/DD/CCYY) |
| (A-D) Run Time | The time that the report was executed. | 11 | Character |
| (A-D) User ID | The user that created the report. | 50 | Character |
| (A-D) Provider Base, Medicaid or NPI ID (prompt) | Lists the NPI, Medicaid, and Base ID for the attending Provider. | 63 | Character |
| (B) ICN Count | Unduplicated count of claims for the recipient within that provider. | 8 | Number (Integer) |
| (C) Diagnosis 1 - Code & Desc | The primary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 2 - Code & Desc | The secondary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 3 - Code & Desc | The third ICD-CM diagnosis code and its description. | 70 | Character |
| (C) ICD Version for Diagnosis 3 | The ICD Version code for the third ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (C) ICN Count | Unduplicated count of claims for Diagnosis codes. | 8 | Number (Integer) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (C,D) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |
| (D) ICN Count | Unduplicated count of claims for procedure code. | 8 | Number (Integer) |
| (D) Procedure Code & Description | Concatenate procedure code and description into one object. | 47 | Character |

### 3.5.10 DSSProfiler - Inpatient Disease Global View

This report is created in DSSProfiler.

The Inpatient Case Type Global View report allows you to see all other services that recipients received from a selected inpatient case type. For example, you can look at all hypertension recipients who were in an inpatient facility and view all other associated services that they had.

There are multiple tabs to this report. For workbook documentation only, the different tabs have been lettered A-G in the layout below. The field names have the corresponding letter in front, identifying the tab it can be found on. This is only to aid in verifying the report layouts. The letters are not on the actual or printed reports. For the report layouts below, only the information inside of the blue box can be found on the actual report.

The seven tabs in this report are:

A. General Health Demographics;

B. Other Professional Services;

C. Other Inpatient Services;

D. Other Outpatient Services;

E. Other Pharmacy Services;

F. Other Nursing Facility Services; and

G. Recipients.

### 3.5.10.1 DSSProfiler - Inpatient Disease Global View Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Age/Gender Mix | Bar graph that shows the actual number of recipients in each morbidity group. | 0 | Character |
| (A,G) Age Group | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64 and 65+. | 24 | Character |
| (A-F) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Character |
| (A-F) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A-F) Case Type Description | Claims groupings that were billed on the recipients within the predefined group. | 100 | Character |
| (A-F) Paid Amount | This is the total amount paid by the program for the specific claim grouping. | 13 | Number (Decimal) |
| (A-F) Percent of Recipients | Percentage of recipients in the pre-defined diagnosis group that also fall under these specific claim groupings. | 8 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-F) Recipient Count | Number of eligible recipients the provider served for this particular claim grouping. | 8 | Number (Integer) |
| (A-G) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-G) Case Type | A user defined group based on the case mix file. The claim grouping should be specific to the area of service. | 100 | Character |
| (A-G) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (G) Recipient Full Name | Links together the recipient last name and first name into one object. The format of the name will be in: last name, first name. | 22 | Character |

### 3.5.11 DSSProfiler - Inpatient Disease Quick View

This report is created in the DSSProfiler and displays recipient utilization services for selected case types with totals broken out by the number of services received. The last row gives the totals for each column.

The two tabs in this report are:

A. Inpatient Disease; and

B. Inpatient Disease By Peer Group.

### 3.5.11.1 DSSProfiler - Inpatient Disease Quick View Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Total Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A-B) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-B) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A-B) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A-B) Case Type | A user defined group based on the case type created in Case Maintenance. The claim grouping should be specific to the area of service. | 100 | Character |
| (A-B) Each Recipient Had XX Claims | This field shows how many claims each of the recipients had. | 4 | Character |
| (A-B) For Dates of Service | The dates for which the report is being run. | 20 | Date (MM/DD/CCYY) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-B) Total Claims | This is the total number of claims billed based on the number of recipients and the number of claims each recipient had. | 9 | Character |
| (A-B) Total Quantity Billed | This is the total units billed for this particular claim category. | 9 | Character |
| (A-B) Unduplicated Recipients | This is a count of all recipients that have had a service within this claim grouping. The count is unduplicated, meaning each recipient is only counted once. | 9 | Character |
| (B) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (B) Peer Group | Peer Group Code and Description. | 107 | Character |

### 3.5.12 DSSProfiler - Inpatient Distribution Analysis

This report shows totals for all inpatient case types within the selected peer group. The totals include amount paid, number of unduplicated recipients, claim counts, units and exceptions. The report also provides a rapid method to identify which case types or service categories need to be looked at more closely with other reports within the DSSProfiler. The exception count is the count of distinct providers who have more than two standard deviations from the norms compared to their peers.

The five tabs of this report are:

A. Inpatient Distribution Summary;

B. TOP 20;

C. By Age;

D. By Gender; and

E. By Age/Gender.

### 3.5.12.1 DSSProfiler - Inpatient Distribution Analysis Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Exception Count | Number of exceptions identified. An exception is defined as two standard deviations from the norm. | 8 | Number (Integer) |
| (A, C-E) Case Type Description | Claims groupings that were billed on the recipients within the predefined group. | 100 | Character |
| (A,C,D,E) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A,C,D,E) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A,C,D,E) Billed Amount per Recip | Total billed amount divided by the number of recipients. | 12 | Number (Decimal) |
| (A,C,D,E) Billed Quantity | Quantity billed. | 14 | Number (Integer) |
| (A,C,D,E) Claim Count | Number of claims the provider filed for the particular claim group. | 8 | Number (Integer) |
| (A,C,D,E) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient ( | 13 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A,C,D,E) Paid Amount per Recip | Actual amount the provider was paid per recipient. | 13 | Number (Decimal) |
| (A,C,D,E) Recip Count | Number of eligible recipients the provider served for this particular claim grouping. | 8 | Number (Integer) |
| (A,D,E) Claims per Recip | Total claim count divided by the recipient count. | 4 | Number (Integer) |
| (A-E) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-E) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-E) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |
| (A-E) Provider Peer Group | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| B) Top 20 By Number of Recipients | Graph shows Top 20 exceptions by number of recipients. | 1 | Character |
| (B) Top 20 By Paid Amound per Recipients | Graph shows Top 20 exceptions by paid amount per recipient. | 1 | Character |
| (B) Top 20 Exceptions | Graph shows Top 20 exceptions. | 1 | Character |
| (C) Average Claims per Recip | Total claim count divided by the recipient count. | 4 | Number (Integer) |
| (C,D,E) Allowed Amt Per Recip | Total allowed amount divided by the number of recipients. | 13 | Number (Decimal) |
| (C,E) Age Description | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64, and 65+. | 24 | Character |
| (D,E) Gender | Recipient's gender. | 1 | Character |

### 3.5.13 DSSProfiler - Inpatient Exception Quarterly

The Inpatient Quarterly Exception report is produced for a selected provider, provider peer group and aggregation code. This report displays the number of high exceptions for case groups that occur during each reporting period. The case groups whose calculations are above the exception high value are marked as exceptions.

#### 3.5.13.1 DSSProfiler - Inpatient Exception Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| Case Type Group | Case Type Group Code, a higher classification for the Case Type Code that corresponds to a SUR Report Line Item. | 4 | Number (Integer) |
| Exception | This column is marked with a '*' when the case group is above the exception high value. | 1 | Character |
| For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| Location Base ID | Lists the NPI, Medicaid, and Base ID for the provider. | 63 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| Peer Group Code | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| Provider Address | The address for the provider ID. | 200 | Character |
| Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |
| Provider Name | The name of the provider. | 63 | Character |
| Provider NPI ID | Lists the NPI, Medicaid, and Base ID for the provider. | 63 | Character |
| Provider Specialty | The provider specialty for the provider identification number. | 15 | Character |
| Provider Type | The provider type for the provider identification number. | 15 | Character |
| Quarter | The quarter for which the report is being run. | 5 | Date (CCYYQ) |
| Service Mcaid ID | Lists the NPI, Medicaid, and Base ID for the provider. | 63 | Character |

### 3.5.16 DSSProfiler - Inpatient Recipient Case Type Comparison by Peer Group

The Inpatient Recipient Case Type Comparison by Peer Group report is created in the DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all recipients within a peer group to determine which recipients fall outside of service dollar norms on a user specified service category. All information is age and gender adjusted so that differences in patient mix do not affect the results. Any of the individual case types shown in the pre-defined case types report (below) can be analyzed. Recipients who have two standard deviations above or below the norm for the peer group are highlighted.

This report provides a rapid method to find which recipients need to be analyzed more closely at a case type level, utilizing other reports within the DSSProfiler. This report makes it easy to see, for example, which recipients are the recipients of asthma services who fall outside of the accepted norm within the peer group.

The two tabs in the report are:

A. Recipient Comparison; and

B. Recipients Grouped by Age/Gender.

### 3.5.18 DSSProfiler - Inpatient Provider Profile

The Inpatient Provider Profile report is created in the DSSProfiler. Based on the user-entered date range of one year, this report flags any category or case type that exceeds the accepted norm within the inpatient provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and gender adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A. Provider Summary - Displays basic provider demographic information, breakdown of recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B. Inpatient Services -Tab B has two sections. The first section of this report contains a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time. This is an important graph because providers may be using a specific disease condition to attempt to receive additional payments. The second section of the report lists all case types for which the provider was reimbursed over a particular time period. This section is in chart form. The chart contains seven pieces of information about each claim grouping for the specific provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group- The peer group to which the profiled provider is being compared; and
- Aggregation Code - The code to which the profiled provider is being compared.

### 3.5.19 DSSProfiler - Inpatient Provider Profile Quarterly

The Inpatient Provider Profile Quarterly report is created in the DSSProfiler. Based on the user-entered date range of one quarter, this report flags any category or case type that exceeds the accepted norm within the inpatient provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and gender adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A. Provider Summary - Displays basic provider demographic information, breakdown of recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B. Inpatient Services -Tab B has two sections. The first section of this report contains a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time. This is an important graph because providers may be using a specific disease condition to attempt to receive additional payments. The second section of the report lists all case types for which the provider was reimbursed over a particular time period. This section is in chart form. The chart contains seven pieces of information about each claim grouping for the specific provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group - The peer group to which the profiled provider is being compared;
- Aggregation Code - The code to which the profiled provider is being compared; and
- Quarter - Quarter of the provider being profiled in the report.

### 3.5.20 DSSProfiler - Nursing Facility Case Type Comparison by Peer Group

Based on the user-entered date range of one year, this report displays and compares all providers within a nursing facility peer group to determine which providers fall outside of service dollar norms for a case type. All information is age and gender adjusted so that differences in patient mix do not affect the results. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

The tabs on this report include:

A. Provider Comparison;

B. Average Amount per Recipient by Age/Gender; and

C. Average Amount per Recipient All Providers by Selected Age/Gender.

#### 3.5.21.1 DSSProfiler - Nursing Facility Case Type Comparison by Peer Group Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient | 13 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Dollar Difference | Difference in the actual amount provider was paid and the amount provider was expected to receive (based on the peer group adjustment methodology). | 13 | Number (Decimal) |
| (A) Exception | Indicates providers who are 2 standard deviations above or below the "norm" for the peer group. | 1 | Character |
| (A) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A) Expected Rank | Provider's rank based on the amount provider should have been paid based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of provider's specialty peer group. | 3 | Number (Decimal) |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A) Rank | Provider's rank based on the actual money paid by the program. | 3 | Number (Decimal) |
| (A) Raw Rank | Provider's rank based on the amount provider was paid. | 3 | Number (Decimal) |
| (A,B,C) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A,B,C) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A,B,C) Case Type | A user defined group based on the case mix file. The claim grouping should be specific to the area of service. | 100 | Character |
| (A,B,C) Provider ID | Provider identification number. | 15 | Character |
| (A,B,C) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A,B,C) Provider Name | Provider's full name. | 50 | Character |
| (A,B,C) Provider Peer Group | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| (A,B,C) Quarter | The quarter for which the report is being run. | 5 | Date (CCYYQ) |
| (B,C) Age Group | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64, and 65+. | 24 | Character |
| (B,C) Gender | Recipient's gender. | 1 | Character |
| (B,C) Paid Amount per Recipient | Actual amount the provider was paid per recipient. | 13 | Number (Decimal) |

### 3.5.22 DSSProfiler - Nursing Facility Claim Details by Provider - FFS

Based on the user-entered date range of one year, this report lets the user drill down to the detail level for all nursing facility case types for a given provider and service location. This report displays all detailed claims information categorized by the individual case types, additionally, the top procedures and diagnoses are displayed, as well as a list of recipients served.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The tabs on this report include:

A. Nursing Facility Claim Details - Shows all the claims the provider submitted.

B. Inpatient/Outpatient Claim Details - Shows the details for the claims.

C. Recipient Listing - Lists the individual recipient ID and names.

D. Diagnosis Listing - Lists the primary, secondary, and tertiary diagnosis codes.

E. Procedure Code Listing - Lists the procedure codes and counts.

### 3.5.22.1 DSSProfiler - Nursing Facility Claim Details by Provider - FFS Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A,B) Bill Quantity | The units of service billed for payment. | 15 | Number (Decimal) |
| (A,B) Claim Type (CT) | The code indicating the type of claim record the provider used for billing the rendered service. | 1 | Character |
| (A,B) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 10 | Number (Decimal) |
| (A,B) Place of Service (POS) | A code to indicate where the service was provided. | 2 | Character |
| (B) MD1 Desc | The description associated with the first modifier. | 40 | Character |
| (B) MD3 Desc | The description associated with the third modifier. | 40 | Character |
| (B,E) Procedure Description (Proc Desc) | The description associated with the primary procedure code. | 40 | Character |
| (A,B) Age | The age of the recipient based on the FDOS of the claim and the current eligibility date of birth rounded down to a full year. | 4 | Number |
| (A,B) Allowed Amount | Amount allowed by the specific program (Medicaid, 590, and so on.) for the procedure. | 9 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A,B) Billed Amount | Amount of money requested for payment by a provider for services rendered to a recipient. | 13 | Character |
| (A,B) Covered Days | The number of days covered for the statement period of the claim. | 9 | Number (Decimal) |
| (A,B) DOB | Recipient's date of birth. | 10 | Date (MM/DD/YY) |
| (A,B) Diag 2 | The secondary ICD-CM diagnosis code. | 7 | Character |
| (A,B) Diag 2 Desc | The secondary ICD-CM diagnosis code description. | 70 | Character |
| (A,B) From Date of Service (FDOS) | The date the service was incurred. | 10 | Date (MM/DD/CCYY) |
| (A,B) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A,B) To Date of Service | Date on which the statement period on the claim ended. | 10 | Date (MM/DD/CCYY) |
| (A,B,C) Recipient Full Name | Concatenates the recipient last name and first name into one object. The format of the name will be in: last name, first name. | 39 | Character |
| (A,B,C) Recipient ID (Recip ID) | Recipient Medicaid Number | 12 | Character |
| (A,B,D) Diag | The primary ICD-CM diagnosis code. | 7 | Character |
| (A,B,D) Diag Desc | The primary ICD-CM diagnosis code description. | 60 | Character |
| (A,B,D) ICD Version for Diagnosis 1 | The ICD Version code for the primary ICD-CM payment level diagnosis code. | 1 | Character |
| (A,B,D) ICD Version for Diagnosis 2 | The ICD Version code for the secondary ICD-CM payment level diagnosis code. | 1 | Character |
| (A-E) Claim Type(s) (prompt) | The code indicating the type of claim record the provider used for billing the rendered service. | 1 | Character |
| (A-E) Provider, Base, Medicaid or NPI ID (prompt) | Provider’s ID. | 15 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-E) Run Date | The date that the report was executed. | 10 | Date (MM/DD/CCYY) |
| (A-E) Run Time | The time that the report was executed. | 11 | Character |
| (A-E) User ID | The id of the user that created the report. | 50 | Character |
| (B) Detail Number | Claim line number. | 4 | Number (Integer) |
| (B) MD1 | The first of four possible codes that may be used to supplement the procedure code. | 2 | Character |
| (B) MD2 | The second of four possible codes that may be used to supplement the procedure code. | 2 | Character |
| (B) MD2 Desc | The description associated with the second modifier. | 40 | Character |
| (B) MD3 | The third of four possible codes that may be used to supplement the procedure code. | 2 | Character |
| (B, E) Procedure code (Proc) | A code from the fee schedule to indicate the service performed. | 6 | Character |
| (C,D,E) ICN Count | Unduplicated count of claims for the recipient (C), Diagnosis code (D) or Procedure code (E). | 8 | Number (Integer) |
| (D) Diagnosis 2 - Code & Desc | The secondary ICD-CM diagnosis code and its description. | 70 | Character |
| (D) Diagnosis 3 - Code & Desc | The third ICD-CM diagnosis code and its description. | 70 | Character |
| (D) ICD Version for Diagnosis 3 | The ICD Version code for the third ICD-CM payment level diagnosis code. | 1 | Character |
| (D,E) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |

### 3.5.24 DSSProfiler - Nursing Facility Disease Quick View

This report is created in the DSSProfiler. This report displays recipient utilization services for selected case types with totals broken out by the number of services received. This report can also be used for disease management for nursing facility residents. The first row gives the totals for each column.

The tabs on this report include:

A. Nursing Facility Disease; and

B. Nursing Facility Disease by Peer Group.

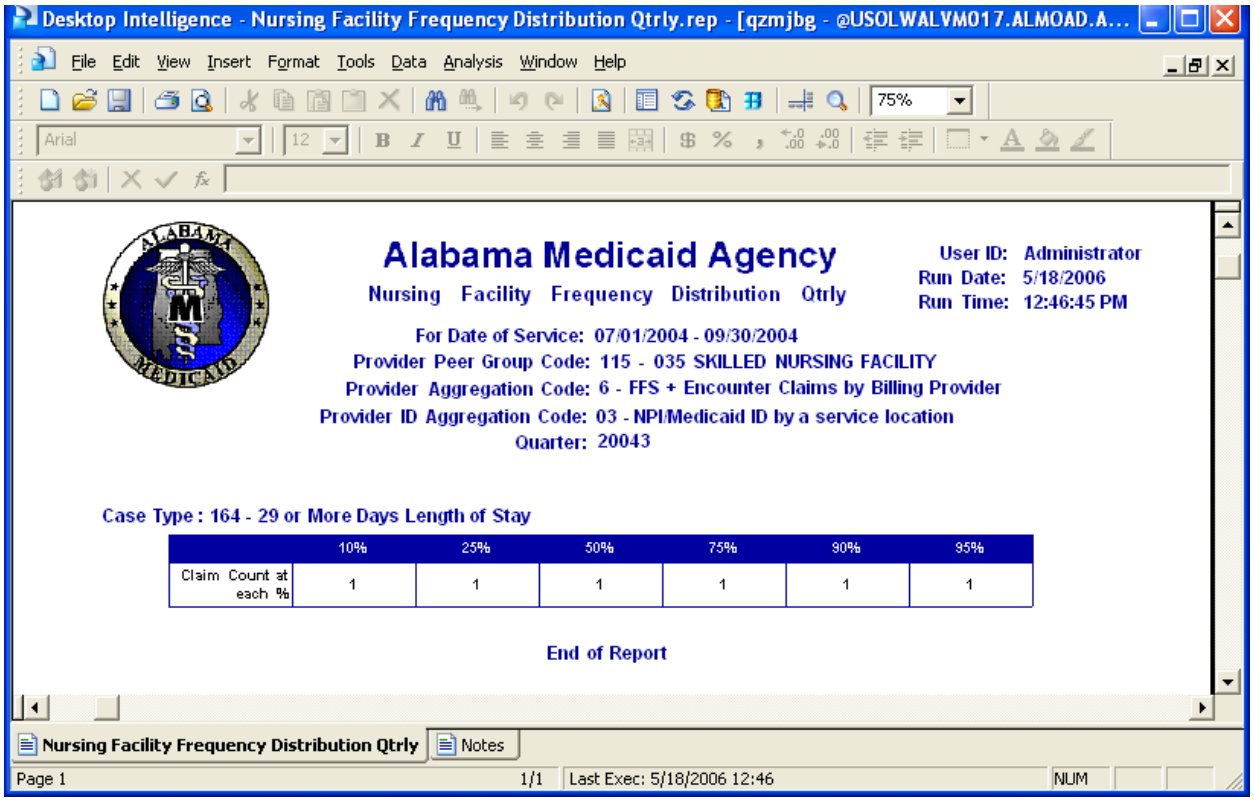
### 3.5.27 DSSProfiler - Nursing Facility Frequency Distribution Quarterly

Based on the user-entered date range of one quarter, this report displays provider claim counts by percentile for nursing facility services for the selected peer group and aggregation type. Each percentile represents a percentage of the number of providers with claims in the specific claim grouping. The percentile groups are determined by ordering providers by the number of paid claims each has for the case type and then grouping the providers into the percentiles starting with the provider with the least number of claims. The claim count displayed for each percentile represents the maximum number of claims for any provider falling in the percentile.



#### 3.5.27.1 DSSProfiler - Nursing Facility Frequency Distribution Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| 10% | Distribution of services within 10th percentile. | 4 | Number (Decimal) |
| 25% | Distribution of services within 25th percentile. | 4 | Number (Decimal) |

### 3.5.28 DSSProfiler - Nursing Facility Recipient Case Type Comparison by Peer Group

The Nursing Facility Recipient Case Type Comparison by Peer Group report is created in the DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all recipients within a peer group to determine which ones fall outside of service dollar norms for nursing home claims. All information is age and sex adjusted so that differences in patient mix do not affect the results. Individuals who have two standard deviations above the norm for the peer group are highlighted.

The tabs on this report include:

A. Recipient Comparison; and

B. Recipients Grouped by Age/Gender.

### 3.5.30 DSSProfiler - Nursing Facility Provider Profile

The Nursing Facility Provider Profile report is created in the DSSProfiler. Based on the user-entered date range of one year, this report flags any category or case type for a nursing facility provider that exceeds the accepted norm within the provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and gender adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A. Provider Summary - Displays basic provider demographic information, breakdown of recipient health status, recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B. Nursing Facility Services - The first section displays a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time.

The second section of the report lists all case types for which the provider was reimbursed over a particular time period. They include the following:

C. Professional Billing - This report lists all professional case types for which the profiled nursing facility was the billing provider;

D. Inpatient Billing - This report lists all inpatient case types for which the profiled nursing facility was the billing provider;

E. Outpatient Billing - This report lists all outpatient case types for which the profiled nursing facility was the billing provider; and

F. Pharmacy Billing - This report lists all pharmacy case types for which the profiled nursing facility was the billing provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group - the peer group to which the profiled provider is being compared; and
- Aggregation Code - the aggregation code to which the profiled provider is being compared.

### 3.5.30.1 DSSProfiler - Nursing Facility Provider Profile Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) # Claims Rank | Rank is based on the number of paid claims. | 5 | Number (Integer) |
| (A) # Units Rank | Rank based on the quantity billed. | 5 | Number (Integer) |
| (A) $ Billed Amount Actual | Rank based on the actual money billed by the provider. | 5 | Number (Decimal) |
| (A) $ Paid Amount Actual | Rank based on the actual money paid by the program in the specific time period. | 5 | Number (Decimal) |
| (A) $ Paid Amount Expected | Rank based on the amount the provider should have received based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of the provider's specialty peer group. | 5 | Number (Decimal) |
| (A) Patient Age/Gender Breakdown | Similar to the health status section. It compares the providers to their specialty peer group based on the recipients they serve. | 10 | Character |
| (A) Peer Group Size | Peer group size is the number of providers in the same peer group. The peer group is also the group by which the provider is compared on all rankings. | 5 | Number (Integer) |
| (A) Provider Information | Provider's demographic information. This includes the provider type, specialty, name, street address, city, state, zip code, and telephone number. | 200 | Character |
| (A) Recipient Rank | Rank based on the number of eligible recipients the provider served in a specific time period. | 5 | Number (Integer) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-F) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-F) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A-F) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A-B) Dollar Difference | Difference in the actual dollar amount and the expected dollar amount. This calculation also reflects how the claim groupings are ranked in this section (from the highest dollar difference to the lowest). | 13 | Number (Decimal) |
| (A-B) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A-F) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A-F) Peer Group Code | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| (A-B) Percent Difference | Percent difference is the dollar difference divided by the expected amount multiplied by 100. The percent difference shows us the variance of dollars from the expected value to the actual value in a percentage. | 8 | Number (Decimal) |
| (A-F) Provider ID | Provider's identification number. | 13 | Character |
| (A-F) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |
| (A-B) Recipient Count | Number of eligible recipients the provider served for this particular claim grouping. | 8 | Number (Integer) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Report Category Code and Description | User-defined variables used to categorize case types into service groups. | 21 | Character |
| (B-F) Case Type Code and Description | User defined group based on the case type file. The claim grouping should be specific to the area of service. | 100 | Character |
| (B) Claim Count | Number of claims the provider filed for the particular claim group. | 8 | Number (Integer) |
| (B) Billed Quantity | Quantity billed. | 8 | Number (Integer) |
| (B) Top 10 Case Type Groupings: Dollar Difference | Different in the actual dollars and the expected dollars for the top 10 claim groupings for this provider. Graph displays Top 10 case types by dollar difference. | 60 | Character |
| (A-F) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |

### 3.5.32 DSSProfiler - Outpatient Case Type Comparison by Peer Group

Based on the user-entered date range of one year, this report displays and compares all outpatient providers within a peer group to determine which providers fall outside of service dollar norms for a case type. All information is age and gender adjusted so that differences in patient mix do not affect the results. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

The tabs on this report include:

A. Provider Comparison;

B. Average Amount per Recipient by Age/Gender; and

C. Average Amount per Recipient All by Selected Age/Gender.

### 3.5.33 DSSProfiler - Outpatient Case Type Comparison by Peer Group Quarterly

The Outpatient Case Type Comparison by Peer Group report is created in the DSSProfiler. Based on the user-entered date range of one quarter, this report displays and compares all providers within a peer group to determine which providers fall outside of service dollar norms on a user specified service category. All information is age and gender adjusted so that differences in patient mix do not affect the results. Any of the individual case types shown in the pre-defined case types report (below) can be analyzed. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

This report provides a rapid method to find which providers need to be analyzed more closely at a case type level, utilizing other reports within the DSSProfiler. This report makes it easy to see, for example, which are the providers of asthma services who fall outside of the accepted 'norm' within the peer group.

There are tabs in this report:

A. Provider Comparison;

B. Average Amount per Recipient by Age/Gender; and

C. Average Amount per Recipient All by Selected Age/Gender.

### 3.5.35.1 DSSProfiler - Outpatient Claim Details by Provider Quarterly - FFS Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Age | The age of the recipient on the From Date of Service rounded down to a full year. | 4 | Number (Integer) |
| (A) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A) Bill Qty | Quantity billed for the service rendered. | 2 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Claim Type (CT) | Shows what type of claim was submitted. | 1 | Character |
| (A) DOB | Recipient's Date of Birth | 10 | Date (MM/DD/CCYY) |
| (A) Detail Number (Dtl#) | Claim line number. | 4 | Number (Integer) |
| (A) Diag | The primary ICD-CM diagnosis code. | 7 | Character |
| (A) Diag Desc | The primary ICD-CM diagnosis code description. | 60 | Character |
| (A) Diag 2 | The secondary ICD-CM diagnosis code. | 7 | Character |
| (A) Diag 2 Desc | The secondary ICD-CM diagnosis code description. | 60 | Character |
| (A) From Date of Service (FDOS) | Claim's first date of service. | 10 | Date (MM/DD/CCYY) |
| (A) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A) MD1 | First Modifier code for the procedure code billed. | 2 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) MD1 Desc | Description for the First Modifier code of the procedure code billed. | 40 | Character |
| (A) MD2 | Second Modifier code for the procedure code billed. | 2 | Character |
| (A) MD2 Desc | Description for the Second Modifier code of the procedure code billed. | 40 | Character |
| (A) MD3 | Third Modifier code for the procedure code billed. | 2 | Character |
| (A) MD3 Desc | Description for the Third Modifier code of the procedure code billed. | 40 | Character |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A) Place of Service (POS) | Place of Service code for where services were rendered. | 2 | Number (Decimal) |
| (A) Proc | Procedure Code for the detail. | 6 | Character |
| (A) Proc Desc | Procedure Code description for the detail. | 40 | Character |
| (A) To Date of Service (TDOS) | Claim's last date of service. | 10 | Date (MM/DD/CCYY) |
| (A,B) Recipient Full Name (Recip Name) | The recipient last name and first name. The format of the name will be in: last name, first name. | 22 | Character |
| (A,B) Recipient ID (Recip ID) | Recipient Medicaid Number. | 12 | Character |
| (A,C) ICD Version for Diagnosis 1 | The ICD Version code for the primary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A,C) ICD Version for Diagnosis 2 | The ICD Version code for the secondary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A-D) Claim Types (prompt) | The code indicating the type of claim record the provider used for billing the rendered service. | 1 | Character |
| (A-D) Quarter (prompt) | The quarter for which the report is being run. | 5 | Number |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-D) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-D) Run Date | The date that the report was executed. | 10 | Date (MM/DD/CCYY) |
| (A-D) Run Time | The time that the report was executed. | 11 | Character |
| (A-D) User ID | The user that created the report. | 50 | Character |
| (A-D) Provider Base, Medicaid or NPI ID (prompt) | Lists the NPI, Medicaid, and Base ID for the attending Provider. | 63 | Character |
| (B) ICN Count | Unduplicated count of claims for the recipient within that provider. | 8 | Number (Integer) |
| (C) Diagnosis 1 - Code & Desc | The primary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 2 - Code & Desc | The secondary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 3 - Code & Desc | The third ICD-CM diagnosis code and its description. | 70 | Character |
| (C) ICD Version for Diagnosis 3 | The ICD Version code for the third ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (C) ICN Count | Unduplicated count of claims for Diagnosis codes. | 8 | Number (Integer) |
| (C,D) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |
| (D) ICN Count | Unduplicated count of claims for procedure code. | 8 | Number (Integer) |
| (D) Procedure Code & Description | Concatenate procedure code and description into one object. | 47 | Character |

### 3.5.37 DSSProfiler - Outpatient Distribution Analysis

This report shows totals for all outpatient case types within the selected peer group. The totals include amount paid, number of unduplicated recipients, claim counts, units and exceptions. The report also provides a rapid method to identify which case types or service categories need to be looked at more closely with other reports within the DSSProfiler. The exception count is the count of distinct providers who have more than two standard deviations from the norms compared to their peers.

There are tabs in this report:

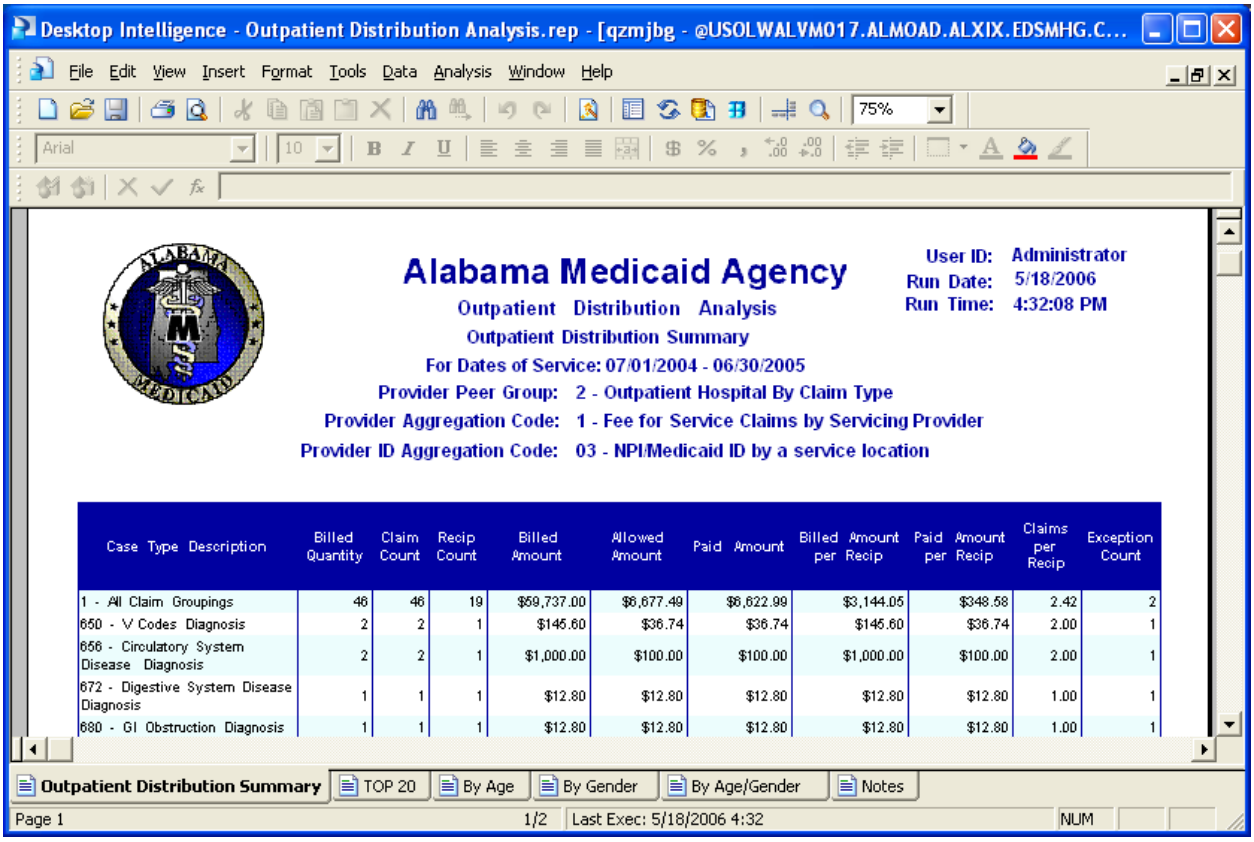
A. Outpatient Distribution Summary;

B. TOP 20;

C. By Age;

D. By Gender; and

E. By Age/Gender.



| Case Type Description | Billed Quantity | Claim Count | Recip Count | Billed Amount | Allowed Amount | Paid Amount | Billed Amount per Recip | Paid Amount per Recip | Claims per Recip | Exception Count |
|---|---|---|---|---|---|---|---|---|---|---|
| 1 - All Claim Groupings | 46 | 46 | 19 | $59,737.00 | $6,677.49 | $6,622.99 | $3,144.05 | $348.58 | 2.42 | 2 |
| 650 - V Codes Diagnosis | 2 | 2 | 1 | $145.60 | $36.74 | $36.74 | $145.60 | $36.74 | 2.00 | 1 |

### 3.5.38 DSSProfiler - Outpatient Exception Quarterly

The Outpatient Exception Quarterly report is produced for a selected provider, provider peer group and aggregation code. The report displays the number of high exceptions for case groups that occur during each reporting period. Case group calculations that are above the exception high value are marked as exceptions.

**Alabama Medicaid Agency**

Outpatient Exception Quarterly

For Dates of Service: 10/01/2004 - 09/30/2005

User ID: [redacted]
Run Date: 8/28/2006

### 3.5.41 DSSProfiler - Outpatient Recipient Case Type Comparison by Peer Group

Outpatient Recipient Case Type Comparison by Peer Group report is created in the DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all recipients within a peer group to determine which ones fall outside of service dollar norms for outpatient claims. All information is age and gender adjusted so that differences in patient mix do not affect the results. Individuals who have two standard deviations above the norm for the peer group are highlighted.

There are tabs in this report:

A. Recipient Comparison; and

B. Recipient Grouped by Age/Gender.

### 3.5.42 DSSProfiler - Outpatient Recipient Case Type Comparison by Peer Group Quarterly

Based on the user-entered date range of one quarter, this report displays and compares all providers within a peer group to determine which recipients fall outside of service dollar norms on a user specified case type. All information is age and gender adjusted so that differences in patient mix do not affect the results. Any of the individual case types shown in the pre-defined case types report can be analyzed. Recipients who have two standard deviations above or below the norm for the peer group are highlighted.

There are tabs in this report:

### 3.5.43 DSSProfiler - Outpatient Provider Profile

The Outpatient Provider Profile report is created in the DSSProfiler. Based on the user-entered date range of one year, this report flags any category or case type that exceeds the accepted norm within the outpatient provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and genders adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A. Provider Summary - Displays basic provider demographic information, breakdown of recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B. Outpatient Services - Tab B has two sections. The first section of this report contains a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time. This is an important graph because providers may be using a specific disease condition to attempt to receive additional payments. The second section of the report lists all case types for which the provider was reimbursed over a particular time period. This section is in chart form. The chart contains seven pieces of information about each claim grouping for the specific provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group - The peer group to which the profiled provider is being compared; and
- Aggregation Code is the code to which the profiled provider is being compared.

### 3.5.43.1 DSSProfiler - Outpatient Provider Profile Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Service Type | User defined group based on the service type file. The claim grouping should be specific to the area of service. | 100 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-B) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-B) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A-B) Dollar Difference | Difference in the actual dollar amount and the expected dollar amount. This calculation also reflects how the claim groupings are ranked in this section (from the highest dollar difference to the lowest). | 13 | Number (Decimal) |
| (A-B) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A-B) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-B) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A-B) Peer Group Code | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| (A-B) Percent Difference | Percent difference is the dollar difference divided by the expected amount multiplied by 100. The percent difference shows us the variance of dollars from the expected value to the actual value in a percentage. | 8 | Number (Decimal) |
| (A-B) Provider ID | Provider identification number. | 15 | Character |
| (A-B) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |
| (A-B) Recip Count | Number of eligible recipients the provider served for this particular claim grouping. | 8 | Number (Integer) |
| (B) Case Type | User defined group based on the case type file. The claim grouping should be specific to the area of service. | 100 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (B) Claim Count | Number of claims the provider filed for the particular claim group. | 8 | Number (Integer) |
| (B) Quantity | Quantity billed. | 8 | Number (Integer) |

### 3.5.44 DSSProfiler - Outpatient Provider Profile Quarterly

The Outpatient Provider Profile Quarterly report is created in the DSSProfiler. Based on the user-entered date range of one quarter, this report flags any category or case type that exceeds the accepted norm within the outpatient provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and gender adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A. Provider Summary - Displays basic provider demographic information, breakdown of recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B. Outpatient Services - Tab B has two sections. The first sections of this report contain a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time. This is an important graph because providers may be using a specific disease condition to attempt to receive additional payments. The second section of the report lists all case types for which the provider was reimbursed over a particular time period. This section is in chart form. The chart contains seven pieces of information about each claim grouping for the specific provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group - the peer group to which the profiled provider is being compared;
- Aggregation Code is the code to which the profiled provider is being compared; and
- Quarter - Quarter of the provider being profiled in the report.

### 3.5.45 DSSProfiler - Pharmacy Case Type Comparison by Peer Group

Based on the user-entered date range of one year, this report displays and compares all pharmacy providers within a peer group to determine which providers fall outside of service dollar norms for a case type. All information is age and gender adjusted so that differences in patient mix do not affect the results. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

There are tabs in this report:

A. Provider Comparison;

B. Average Amount per Recipient by Age/Gender; and

C. Average Amount per Recipient All Providers by Selected Age/Gender.

### 3.5.46 DSSProfiler - Pharmacy Case Type Comparison by Peer Group Quarterly

The Pharmacy Case Type Comparison by Peer Group report is created in the DSSProfiler. Based on the user-entered date range of one quarter, this report displays and compares all providers within a peer group to determine which providers fall outside of service dollar norms on a user specified service category. All information is age and gender adjusted so that differences in patient mix do not affect the results. Any of the individual case types shown in the pre-defined case types report (below) can be analyzed. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

There are tabs in this report:

A. Provider Comparison;

B. Average Amount per Recipient by Age/Gender; and

C. Average Amount per Recipient All Providers by Selected Age/Gender.

### 3.5.46.1 DSSProfiler - Pharmacy Case Type Comparison by Peer Group Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the service. | 13 | Number (Decimal) |
| (A) Dollar Difference | Difference in the actual amount provider was paid and the amount provider was expected to receive (based on the peer group adjustment methodology). | 13 | Number (Decimal) |
| (A) Exception | Indicates providers who are 2 standard deviations above or below the "norm" for the peer group. | 1 | Character |
| (A) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A) Expected Rank | Provider's rank based on the amount provider should have been paid based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of Provider's specialty peer group. | 3 | Number (Integer) |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A) Rank | Provider's rank based on the actual money paid by the program. | 3 | Number (Integer) |
| (A) Raw Rank | Provider's rank based on the amount Provider was paid. | 3 | Number (Integer) |
| (A,B,C) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A,B,C) Case Type | User defined group based on the case type file. The claim grouping should be specific to the area of service. | 100 | Character |
| (A,B,C) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A,B,C) Provider ID | Provider identification number. | 15 | Character |
| (A,B,C) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations | 40 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| | and 03 NPI/Medicaid ID by service location. | | |
| (A,B,C) Provider Name | Provider's full name. | 50 | Character |
| (A,B,C) Quarter | The quarter for which the report is being run. | 5 | Date (CCYYQ) |
| (A.B.C) Provider Peer Group | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| (B) Age Group | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64, and 65+. | 24 | Number (Integer) |
| (B,C) Gender | Recipient's gender. | 1 | Character |
| (B,C) Paid Amount per Recipient | Actual amount the provider was paid per recipient. | 13 | Number (Decimal) |
| (B) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |
| (C) Age | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64, and 65+. | 24 | Number (Integer) |

### 3.5.47.1 DSSProfiler - Pharmacy Claim Details by Provider Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) NDC | The national drug code for the drug dispensed. | 11 | Character |
| (A) AHFS | Identifies the pharmacological therapeutic category of the drug product according to the American Hospital Formulary Service (AHFS) classification systems. | 8 | Number |
| (A) AHFS Therapeutic Class Description | Text description of the American Hospital Formulary Service (AHFS) classification | 55 | Character |
| (A) Age | The age of the recipient on the From Date of Service rounded down to a full year. | 4 | Number |
| (A) Allowed Amount | The allowed amount of money the Medicaid program billed on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Claim Type (CT) | Shows what type of claim was submitted. | 1 | Character |
| (A) DEA | Drug Enforcement Administration Code denotes the degree of potential abuse and Federal control of a drug. It is subject to change by Federal regulation. The current code list is: 0, 1, 2, 3, 4, 5. | 1 | Number |
| (A) Detail Number (Dtl#) | Detail number on the claim. | 4 | Number (Integer) |
| (A) Dispense Qty | Number of units of a drug dispensed to a member. The type of unit is expressed in Drug Form Code. | 10 | Number |
| (A) Dispensed Dte | Date the prescription was dispensed by the provider. | 10 | Date (MM/DD/CCYY) |
| (A) GCN | Generic Code Number (GCN) is a unique 5 digit number representing the generic formulation. The GCN is specific to generic ingredient combination, route of administration, and drug strength, across all dosage forms. The GCN is the same across manufacturers and/or package sizes. The number by itself has no significance, but is useful for online computer applications such as generic substitution. | 5 | Character |
| (A) GPI | Generic Product Indicator (GPI) distinguishes a product either as a generic drug product (1) or a more expensive branded drug product (2). | 5 | Character |
| (A) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A) NDC Description | Description/name of the prescription dispensed. | 35 | Character |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient ( | 13 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Place of Service (POS) | Place of Service code for where services were rendered. | 2 | Number |
| (A,B) Recipient Full Name (Recip Name) | Concatenates the recipient last name and first name into one object. The format of the name will be in: last name, first name. | 22 | Character |
| (A,B) Recipient ID (Recip ID) | Recipient Medicaid Number. | 12 | Character |
| (A-C) Provider Base, Medicaid or NPI ID | Provider's ID. | 13 | Character |
| (A-C) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (C)Diagnosis 1 - Code & Desc | Concatenates the National Drug Code (NDC) and the description. | 63 | Character |
| (C) ICN Count | Unduplicated count of claims for NDC listed. | 8 | Number (Integer) |
| (C) NDC Code & Desc | National Drug Code. and NDC Name/Description | 49 | Character |
| (C) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |

### 3.5.48.1 DSSProfiler - Pharmacy Claim Details by Provider Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) NDC | The national drug code for the drug dispensed. | 11 | Character |
| (A) AHFS | Identifies the pharmacological therapeutic category of the drug product according to the American Hospital Formulary Service (AHFS) classification systems. | 8 | Number |
| (A) AHFS Therapeutic Class Description | Text description of the American Hospital Formulary Service (AHFS) classification | 55 | Character |
| (A) Age | The age of the recipient on the From Date of Service rounded down to a full year. | 4 | Number |
| (A) Allowed Amount | The allowed amount of money the Medicaid program billed on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Claim Type (CT) | Shows what type of claim was submitted. | 1 | Character |
| (A) DEA | Drug Enforcement Administration Code denotes the degree of potential abuse and Federal control of a drug. It is subject to change by Federal regulation. The current code list is: 0, 1, 2, 3, 4, 5. | 1 | Number |
| (A) Detail Number (Dtl#) | Detail number on the claim. | 4 | Number (Integer) |
| (A) Dispense Qty | Number of units of a drug dispensed to a member. The type of unit is expressed in Drug Form Code. | 10 | Number |
| (A) Dispensed Dte | Date the prescription was dispensed by the provider. | 10 | Date (MM/DD/CCYY) |
| (A) GCN | Generic Code Number (GCN) is a unique 5 digit number representing the generic formulation. The GCN is specific to generic ingredient combination, route of administration, and drug strength, across all dosage forms. The GCN is the same across manufacturers and/or package sizes. The number by itself has no significance, but is useful for online computer applications such as generic substitution. | 5 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) GPI | Generic Product Indicator (GPI) distinguishes a product either as a generic drug product (1) or a more expensive branded drug product (2). | 5 | Character |
| (A) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A) NDC Description | Description/name of the prescription dispensed. | 35 | Character |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A) Place of Service (POS) | Place of Service code for where services were rendered. | 2 | Number |
| (A,B) Recipient Full Name (Recip Name) | Concatenates the recipient last name and first name into one object. The format of the name will be in: last name, first name. | 22 | Character |
| (A,B) Recipient ID (Recip ID) | Recipient Medicaid Number. | 12 | Character |
| (A-C) Provider Base, Medicaid or NPI ID | Provider's ID. | 13 | Character |
| (A-C) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-C) Quarter | The quarter for which the report is being run. | 5 | Number |
| (C)Diagnosis 1 - Code & Desc | Concatenates the National Drug Code (NDC) and the description. | 63 | Character |
| (C) ICN Count | Unduplicated count of claims for NDC listed. | 8 | Number (Integer) |
| (C) NDC Code & Desc | National Drug Code and its Name/Description | 49 | Character |
| (C) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |

### 3.5.50 DSSProfiler - Pharmacy Distribution Analysis

The Pharmacy Distribution Analysis report is created in the DSSProfiler. This report shows totals for all pharmacy case types within the selected peer group. The totals include amount reimbursed; amount billed; and number of unduplicated recipients, claim counts, units and exceptions.

This report provides a rapid method to identify which case types or service categories need to be looked at more closely with other reports within the DSS Profiler.

There are five tabs in this report:

A. Pharmacy Distribution Summary;

B. Top 20;

C. By Age;

D. By Gender; and

E. By Age/Gender.

### 3.5.51 DSSProfiler - Pharmacy Exception Quarterly

The Pharmacy Exception Quarterly report is produced for a selected provider, provider peer group and aggregation code. The report displays the number of high exceptions for case groups that occur during each reporting period. The case groups whose calculations that are above the exception high value are marked as exceptions.

### 3.5.54 DSSProfiler - Pharmacy Recipient Case Type Comparison by Peer Group

The Pharmacy Recipient Case Type Comparison by Peer Group report is created in the DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all recipients within a peer group to determine which providers fall outside of service dollar norms on a user specified service category. All information is age and gender adjusted so that differences in patient mix do not affect the results. Any of the individual case types shown in the pre-defined case types report (below) can be analyzed. Recipients who have two standard deviations above or below the "norm" for the peer group are highlighted. This report provides a rapid method to find which recipients need to be analyzed more closely at a case type level by utilizing other reports within the DSSProfiler. This report makes it easy to see, for example, which recipients are the recipients of asthma services who fall outside of the accepted norm within the peer group.

There are two tabs in this report:

A. Recipient Comparison; and

B. Recipients Grouped by Age/Gender

### 3.5.56 DSSProfiler - Pharmacy Provider Profile

The Pharmacy Provider Profile report is created in the DSSProfiler. Based on the user-entered date range of one year, this report flags any category or case type that exceeds the accepted norm within the pharmacy provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and gender adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A. Provider Summary - Displays basic provider demographic information, breakdown of recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B. Pharmacy Facility Services - Tab B has two sections. The first section of this report contains a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time. This is an important graph because providers may be using a specific disease condition to attempt to receive additional payments. The second section of the report lists all case types for which the provider was reimbursed over a particular time period. This section is in chart form. The chart contains seven pieces of information about each claim grouping for the specific provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group - the peer group to which the profiled provider is being compared; and
- Aggregation Code is the code to which the profiled provider is being compared.

### 3.5.56.1 DSSProfiler - Pharmacy Provider Profile Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Service Type | User defined group based on the service type file. The claim grouping should be specific to the area of service. | 100 | Character |
| (A-B) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-B) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A-B) Dollar Difference | Difference in the actual dollar amount and the expected dollar amount. This calculation also reflects how the claim groupings are ranked in this section (from the highest dollar difference to the lowest). | 13 | Number (Decimal) |
| (A-B) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A,B) For Dates of Service | Starting and Ending range of service date selection criteria. | 10 | Date (MM/DD/CCYY) |
| (A-B) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A-B) Peer Group Code | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |

### 3.5.58 DSSProfiler - Professional Case Type Comparison by Peer Group

Based on the user-entered date range of one year, this report displays and compares all professional providers within a peer group to determine which providers fall outside of service dollar norm for a case type. All information is age and gender adjusted so that differences in patient mix do not affect the results. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

There are three tabs in this report:

A. Provider Comparison;

B. Average Amount per Recipient by Age/Gender; and

C. Average Amount per Recipient All Providers by Selected Age/Gender

### 3.5.59 DSSProfiler - Professional Case Type Comparison by Peer Group Quarterly

Based on the user-entered date range for one quarter, this report displays and compares all providers within a peer group to determine which providers range appears outside of the service dollar norms for a case type. All information is age and gender adjusted so that different patient mixes do not affect the results. Providers with two standard deviations above or below the norm for the peer group are highlighted.

There are three tabs in this report:

A. Provider Comparison shows providers who fall outside the norm for the peer group;

B. Average Amount per Recipient by Age/Gender shows the age break out for the recipients; and

C. Average Amount per Recipient All Providers by Selected Age/Gender shows the recipients for each age group

A

### 3.5.59.1 DSSProfiler - Professional Case Type Comparison by Peer Group Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Allowed Amount | The amount of money allowed to the Medicaid program billed on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Dollar Difference | Difference in the actual amount provider was paid and the amount Provider was expected to receive (based on the peer group adjustment methodology). | 13 | Number (Decimal) |
| (A) Exception | Indicates providers who are 2 standard deviations above or below the "norm" for the peer group. | 1 | Character |
| (A) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A) Expected Rank | Provider's rank based on the amount Provider should have been paid based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of Provider's specialty peer group. | 3 | Number (Integer) |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A) Rank | Provider's rank based on the actual money paid by the program. | 3 | Number (Integer) |
| (A) Raw Rank | Provider's rank based on the amount Provider was paid. | 3 | Number (Integer) |
| (A,B,C) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A,B,C) Case Type | User defined group based on the case type file. The claim grouping should be specific to the area of service. | 100 | Character |
| (A,B,C) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A,B,C) Provider ID | Provider identification number. | 8 | Character |
| (A,B,C) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations | 40 | Character |

### 3.5.61 DSSProfiler - Professional Claim Details by Provider Quarterly - FFS

The Professional Details by Provider reports are created in the DSSProfiler. Based on the user-entered date range of one quarter, this report lets the user tab down to the detail level for all professional case type categories within the system. This report displays all detailed claims information categorized by the individual case types. Additionally, the top procedures and diagnoses are displayed, as well as a list of recipients served. The DSSProfiler has similar reports that drill down for Professional Referrals, Inpatient, Outpatient, Nursing Facility and Pharmacy claims activity.

The detail reports are very helpful for additional analysis on exceptions or comparing the provider's claims with the medical records.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The tabs on this report include:

A. Professional Claim Details - Shows all the claims the provider submitted;

B. Recipient Listing - Lists the individual recipients;

C. Diagnosis Listing - Lists the diagnosis codes on all claims reported; and

D. Procedure Listing - Lists the individual procedure, number of ICNs and number of recipients.

| (A) Diag 2 Desc | The secondary ICD-CM diagnosis code description. | 60 | Character |
| (A) From Date of Service (FDOS) | Claim's first date of service. | 10 | Date (MM/DD/CCYY) |
| (A) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A) MD1 | First Modifier code for the procedure code billed. | 2 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) MD1 Desc | Description for the First Modifier code of the procedure code billed. | 40 | Character |
| (A) MD2 | Second Modifier code for the procedure code billed. | 2 | Character |
| (A) MD2 Desc | Description for the Second Modifier code of the procedure code billed. | 40 | Character |
| (A) MD3 | Third Modifier code for the procedure code billed. | 2 | Character |
| (A) MD3 Desc | Description for the Third Modifier code of the procedure code billed. | 40 | Character |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A) Place of Service (POS) | Place of Service code for where services were rendered. | 2 | Number (Decimal) |
| (A) Proc | Procedure Code for the detail. | 7 | Character |
| (A) Proc Desc | Procedure Code description for the detail. | 40 | Character |
| (A) To Date of Service (TDOS) | Claim's last date of service. | 10 | Date (MM/DD/CCYY) |
| (A) Wrap Ind | Wrap Payment Indicator | 1 | Character |
| (A,B) Recipient Full Name (Recip Name) | The recipient last name and first name. The format of the name will be in: last name, first name. | 22 | Character |
| (A,B) Recipient ID (Recip ID) | Recipient Medicaid Number. | 12 | Character |
| (A,C) ICD Version for Diagnosis 1 | The ICD Version code for the primary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A,C) ICD Version for Diagnosis 2 | The ICD Version code for the secondary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A-D) Claim Types (prompt) | The code indicating the type of claim record the provider used for billing the rendered service. | 1 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-D) Quarter (prompt) | The quarter for which the report is being run for. | 5 | Number (Integer) |
| (A-D) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-D) Run Date | The date that the report was executed. | 10 | Date (MM/DD/CCYY) |
| (A-D) Run Time | The time that the report was executed. | 11 | Character |
| (A-D) User ID | The user that created the report. | 50 | Character |
| (A-D) Provider Base, Medicaid or NPI ID (prompt) | Lists the NPI, Medicaid, and Base ID for the attending Provider. | 63 | Character |
| (B) ICN Count | Unduplicated count of claims for the recipient within that provider. | 8 | Number (Integer) |
| (C) Diagnosis 1 - Code & Desc | The primary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 2 - Code & Desc | The secondary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 3 - Code & Desc | The third ICD-CM diagnosis code and its description. | 70 | Character |
| (C) ICD Version for Diagnosis 3 | The ICD Version code for the third ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (C) ICN Count | Unduplicated count of claims for Diagnosis codes. | 8 | Number (Integer) |
| (C,D) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |
| (D) ICN Count | Unduplicated count of claims for procedure code. | 8 | Number (Integer) |
| (D) Procedure Code & Description | Concatenate procedure code and description into one object. | 47 | Character |

### 3.5.62 DSSProfiler - Professional Disease Global View

This set of reports is created in DSSProfiler.

This report allows you to view the services that recipients received from a selected case type. For example, you can observe diabetic or asthmatic recipients and view the associated services that they received.

There are multiple tabs to this report. For workbook documentation only, the different tabs have been lettered A-G in the layout below. The field names have the corresponding letter in front, identifying the tab it can be located. This is only to aid in verifying the report layouts. The letters are not on the actual or printed reports.

The seven tabs in this report are:

A. General Health Demographics shows the age and gender mix;

B. Other Professional Services shows the general health demographics;

C. Other Inpatient Services shows other professional services;

D. Other Outpatient Services shows other inpatient services;

E. Other Pharmacy Services shows other pharmacy services;

F. Other Nursing Facility Services shows other nursing facility services; and

G. Recipients shows the list of recipients by age groups

#### 3.5.62.1 DSSProfiler - Professional Disease Global View Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Age/Gender Mix | Bar graph that illustrates the number of recipients for each age group and gender mix. This graph shows the distribution of recipients based on age and gender. | 0 | Character |
| (A-F) Allowed Amount | The amount of money allowed to the Medicaid program billed on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A-F) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A-F) Case Type Description | Claims groupings that were billed on the recipients within the predefined group. | 100 | Character |
| (A-F) Paid Amount | Amount the program paid on the claim grouping of recipients in the predefined diagnosis group. | 13 | Number (Decimal) |
| (A-F) Percent of Recipients | Percentage of recipients in the pre-defined diagnosis group that also fall under these specific claim groupings. | 8 | Character |
| (A-F) Recipient Count | Number of eligible recipients the provider served for this particular claim grouping. | 8 | Character |
| (A-G) Aggregation Code | Aggregation Code and Description. | 107 | Character |
| (A-G) Case Type | User defined group based on the case type file. The claim grouping should be specific to the area of service. | 100 | Character |
| (A-G) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (G) Age Group | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64 and 65+. | 24 | Character |
| (G) Recipient Full Name | Recipient's full name. | 22 | Character |
| (G) Recipient ID | Recipient Medicaid Number. | 12 | Character |

### 3.5.63 DSSProfiler - Professional Disease Quick View

This report is created in the DSSProfiler. This report displays recipient utilization services for selected case types with totals listed by the number of services received. This report can also be used for disease management. The first row gives the totals for each column.

There are two tabs in this report:

A. Professional Disease shows recipient utilization for the case type; and

B. Professional Disease by Peer Group shows recipient utilization for each peer group.

### 3.5.64 DSSProfiler - Professional Distribution Analysis

The Professional Distribution Analysis reports are created in the DSSProfiler. This report provides the totals for all professional case types within the selected peer group. The totals include amount paid, number of unduplicated recipients, claim counts, units and exceptions. The report also provides a rapid method to identify which case types or service categories need to be observed more closely with other reports within the DSSProfiler.

The tabs in this report include:

A. Professional Distribution Summary shows professional distribution summary for different case types;

B. Professional Services Distribution top 20 shows the top 20 case types with exceptions, by number of recipients and by paid amount per recipient;

C. Professional Services Distribution by Age shows information for the age groups for each case type;

D. Professional Services Distribution by Gender shows information for the gender for each case type; and

E. Professional Services Distribution by Age/Gender shows information for the gender and age groups for each case type.

### 3.5.68 DSSProfiler - Professional Recipient Case Type Comparison by Peer Group

The Professional Recipient Case Type Comparison by Peer Group report is created in the DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all recipients within a peer group to determine which recipients fall outside of service dollar norm on a user specified service category. All information is age and gender adjusted so that differences in patient mix do not affect the results. Any of the individual case types shown in the pre-defined case types report (below) can be analyzed. Recipients who have two standard deviations above or below the norm for the peer group are highlighted.

This report provides a rapid method to find which recipients need to be analyzed more closely at a case type level, utilizing other reports within the DSSProfiler. This report makes it easy to see, for example, which recipients are the recipients of asthma services who fall outside of the accepted norm within the peer group.

The tabs in this report include:

A. Recipient Comparison shows which recipients fall outside the norm for the peer group; and

B. Recipients Grouped by Age/Gender shows recipients for the gender and age groups.

### 3.5.70 DSSProfiler - Professional Provider Profile

The Professional Provider Profile report is created in the DSSProfiler. Based on the user-entered date range of one year, this report flags any category or case type that exceeds the accepted norm within the professional provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and gender adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A. Provider Summary - Displays basic provider demographic information, breakdown on recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B. Professional Services - Tab B has two sections. The first sections of this report contain a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time. This is an important graph because providers may be using a specific disease condition to attempt to receive additional payments. The second section of the report lists all case types for which the provider was reimbursed over a particular time period. This section is in chart form. The chart contains seven pieces of information about each claim grouping for the specific provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group - The peer group to which the profiled provider is being compared; and
- Aggregation Code - The code to which the profiled provider is being compared.

### 3.5.70.1 DSSProfiler - Professional Provider Profile Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) $ Billed Amount Actual | Rank based on the actual money billed by the provider. | 5 | Number (Decimal) |
| (A) # Claims Rank | Rank is based on the number of paid claims. | 5 | Number (Integer) |
| (A) # Units Rank | Rank based on the quantity billed. | 5 | Number (Integer) |
| (A) $ Paid Amount Actual | Rank based on the actual money paid by the program in the specific time period. | 5 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) $ Paid Amount Expected | Rank based on the amount the provider should have received based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of the provider's specialty peer group. | 5 | Number (Decimal) |
| (A) Patient Age/Gender Breakdown | This section compares the providers to their specialty peer group based similar to the health status section. It compares the providers to their specialty peer group based on the recipients they serve. | 10 | Character |
| (A) Peer Group Size | Peer group size is the number of providers in the same peer group. The peer group is also the group by which the provider is compared on all rankings. | 5 | Number (Integer) |
| (A) Provider Information | Provider's demographic information. This includes the provider type, specialty name, street address, city, state, zip code, and telephone number. | 200 | Character |
| (A) Recipient Rank | Rank based on the number of eligible recipients the provider served in a specific time period. | 5 | Number (Integer) |
| (A) Service Type | User defined group based on the service type file. The claim grouping should be specific to the area of service. | 100 | Character |
| (A,B) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A,B) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A,B) Dollar Difference | Difference in the actual dollar amount and the expected dollar amount. This calculation also reflects how the claim groupings are ranked in this section (from the highest dollar difference to the lowest). | 13 | Number (Decimal) |
| (A,B) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A,B) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A,B) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A,B) Peer Group Code | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping | 20 | Character |

### 3.5.72 DSSProfiler - Professional Referrals Case Type Comparison by Peer Group

The Professional Referrals Case Type Comparison by Peer Group report is created within the DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all providers within a peer group to determine which providers fall outside of service dollar norm on a user specified service category. All information is age and gender adjusted so that differences in patient mix do not affect the results. Any of the individual case types shown in the pre-defined case types report (below) can be analyzed. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

There are three tabs in this report.

A. Provider Comparison shows providers that fall outside the norm for the peer group;

B. Average Amount per Recipient by Age/Gender shows averages and recipient count for the gender and age groups for each provider; and

C. Average Amount per Recipient All Providers by Selected Age/Gender shows a lists of providers within the gender and age groups.

### 3.5.73 DSSProfiler - Professional Referrals Case Type Comparison by Peer Group Quarterly

Based on the user-entered date range of one quarter, this report displays and compares all providers within a peer group to determine which providers fall outside of service dollar norm for a case type. All information is age and gender adjusted so that differences in patient mix do not affect the results. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

There are three tabs in this report:

A. Provider Comparison shows providers that fall outside the norm for the peer group;

B. Average Amount per Recipient by Age/Gender shows averages and recipient count for the gender and age groups for each provider; and

C. Average Amount per Recipient All Providers by Age/Gender shows a lists of providers within the gender and age groups.

### 3.5.73.1 DSSProfiler - Professional Referrals Case Type Comparison by Peer Group Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific provider. | 13 | Number (Decimal) |
| (A) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A) Dollar Difference | Difference in the actual amount provider was paid and the amount Provider was expected to receive (based on the peer group adjustment methodology). | 13 | Number (Decimal) |
| (A) Exception | Indicates providers who are 2 standard deviations above or below the "norm" for the peer group. | 1 | Character |
| (A) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Expected Rank | Provider's rank based on the amount Provider should have been paid based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of Provider's specialty peer group. | 3 | Number (Integer) |
| (A) Paid Amount | Actual amount the provider was paid. | 13 | Character |
| (A) Rank | Provider's rank based on the actual money paid by the program. | 3 | Number (Integer) |
| (A) Raw Rank | Provider's rank based on the amount Provider was paid. | 3 | Number (Integer) |
| (A,B,C) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A,B,C) Case Type | Claims groupings that were billed on the recipients within the predefined group. | 100 | Character |
| (A.B,C) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A,B,C) Provider ID | Provider identification number. | 15 | Character |
| (A,B,C) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |
| (A,B,C) Provider Peer Group | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| (A,B,C) Quarter | The quarter for which the report is being run. | 5 | Date (CCYYQ) |
| (A,C) Provider Name | Provider's full name. | 50 | Character |
| (B) Recipient Count | An unduplicated count of recipients. | 6 | Number (Integer) |
| (B,C) Age Group | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64 and 65+. | 24 | Character |
| (B,C) Gender | Recipient's gender. | 1 | Character |
| (B,C) Paid Amount per Recipient | Actual amount the provider was paid per recipient. | 13 | Number (Decimal) |

### 3.5.74 DSSProfiler - Professional Referral Claim Details by Provider - FFS

The Professional Referral Claim Details by Provider report is created in the DSSProfiler. Based on the user-entered date range of one year, this report lets the user drill down to the detail level for all case type categories within the system. The Professional Referrals report displays all detailed claims information categorized by the individual case types. Additionally, the top procedures and diagnoses are displayed, as well as a list of recipients served.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The tabs in this report include:

A. Professional Referral Claim Details - Shows all the claims the provider submitted;

B. Recipient Listing - Lists the individual recipient ID and names;

C. Diagnosis Listing - Lists the primary, secondary, and tertiary diagnosis codes; and

D. Procedure Listing – Lists the individual procedure, number of ICNs and number of recipients.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) From Date of Service (FDOS) | Claim's first date of service. | 10 | Date (MM/DD/CCYY) |
| (A) ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| (A) MD1 | First Modifier code for the procedure code billed. | 2 | Character |
| (A) MD1 Desc | Description for the First Modifier code of the procedure code billed. | 40 | Character |
| (A) MD2 | Second Modifier code for the procedure code billed. | 2 | Character |
| (A) MD2 Desc | Description for the Second Modifier code of the procedure code billed. | 40 | Character |
| (A) MD3 | Third Modifier code for the procedure code billed. | 2 | Character |
| (A) MD3 Desc | Description for the Third Modifier code of the procedure code billed. | 40 | Character |
| (A) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A) Place of Service (POS) | Place of Service code for where services were rendered. | 2 | Number (Decimal) |
| (A) Proc | Procedure Code for the detail. | 6 | Character |
| (A) Proc Desc | Procedure Code description for the detail. | 40 | Character |
| (A) To Date of Service (TDOS) | Claim's last date of service. | 10 | Date (MM/DD/CCYY) |
| (A) Wrap Ind | Wrap Payment Indicator | 1 | Character |
| (A,B) Recipient Full Name (Recip Name) | The recipient last name and first name. The format of the name will be in: last name, first name. | 22 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A,B) Recipient ID (Recip ID) | Recipient Medicaid Number. | 12 | Character |
| (A,C) ICD Version for Diagnosis 1 | The ICD Version code for the primary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A,C) ICD Version for Diagnosis 2 | The ICD Version code for the secondary ICD-CM payment level diagnosis code. (9=ICD-9; 0=ICD-10; #=N/A) | 1 | Character |
| (A-D) Claim Types (prompt) | The code indicating the type of claim record the provider used for billing the rendered service. | 1 | Character |
| (A-D) Quarter (prompt) | The quarter for which the report is being run for. | 5 | Number (Integer) |
| (A-D) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-D) Run Date | The date that the report was executed. | 10 | Date (MM/DD/CCYY) |
| (A-D) Run Time | The time that the report was executed. | 11 | Character |
| (A-D) User ID | The user that created the report. | 50 | Character |
| (A-D) Provider Base, Medicaid or NPI ID (prompt) | Lists the NPI, Medicaid, and Base ID for the attending Provider. | 63 | Character |
| (B) ICN Count | Unduplicated count of claims for the recipient within that provider. | 8 | Number (Integer) |
| (C) Diagnosis 1 - Code & Desc | The primary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 2 - Code & Desc | The secondary ICD-CM diagnosis code and its description. | 70 | Character |
| (C) Diagnosis 3 - Code & Desc | The third ICD-CM diagnosis code and its description. | 70 | Character |

### 3.5.76 DSSProfiler - Professional Referral Distribution Analysis

This report shows totals for all professional referral case types within the selected peer group. The totals include amount paid, number of unduplicated recipients, claim counts, units and exceptions. The report also provides a rapid method to identify which case types, or service categories, need to be looked at more closely with other reports within the DSSProfiler. The exception count is the count of distinct providers who have more than two standard deviations from the norm compared to their peers.

There are five tabs in this report:

A. Professional Referral Distribution Summary shows professional distribution summary for different case types;

B. TOP 20 shows the top 20 case types with exceptions, by number of recipients and by paid amount per recipient;

C. By Age shows information for the age groups for each case type;

D. By Gender shows information for the gender for each case type; and

E. By Age/Gender shows information for the gender and age groups for each case type.

### 3.5.79 DSSProfiler - Professional Referral Frequency Distribution Quarterly

Based on the user-entered date range of one quarter, this report displays provider claim counts for professional referral services by percentile for the selected peer group and aggregation type. Each percentile represents a percentage of the number of providers within the specific claim grouping. The percentile groups are determined by ordering providers, by the number of paid claims each has for the case type, and then grouping the providers into the percentiles starting with the provider with the least number of claims. The claim count displayed for each percentile represents the maximum number of claims for any provider falling in the percentile.

### 3.5.80 DSSProfiler - Professional Referral Provider Profile

The Professional Referral Provider Profile report is created in the DSSProfiler. Based on the user-entered date range of one year, this report flags any category or case type that exceeds the accepted norm within the professional provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and gender adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A Provider Summary - Displays basic provider demographic information, breakdown of recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B Professional Referral - Tab B has two sections. The first sections of this report contain a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time. This is an important graph because providers may be using a specific disease condition to attempt to receive additional payments. The second section of the report lists all case types for which the provider was reimbursed over a particular time period. This section is in chart form. The chart contains seven pieces of information about each claim grouping for the specific provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group - The peer group to which the profiled provider is being compared; and
- Aggregation Code - The code to which the profiled provider is being compared.

### 3.5.80.1 DSSProfiler - Professional Referral Provider Profile Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Service Type | User defined group based on the service type file. The claim grouping should be specific to the area of service. | 100 | Character |
| (A-B) # Claims Rank | Rank is based on the number of paid claims. | 5 | Number (Integer) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-B) # Units Rank | Rank based on the quantity billed. | 5 | Number (Integer) |
| (A-B) $ Billed Amount Actual | Rank based on the actual money billed by the provider. | 5 | Number (Integer) |
| (A-B) $ Paid Amount Actual | Rank based on the actual money paid by the program in the specific time period. | 5 | Number (Integer) |
| (A-B) $ Paid Amount Expected | Rank based on the amount the provider should have received based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of the provider's specialty peer group. | 5 | Number (Integer) |
| (A-B) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-B) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Integer) |
| (A-B) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A-B) Dollar Difference | Difference in the actual dollar amount and the expected dollar amount. This calculation also reflects how the claim groupings are ranked in this section (from the highest dollar difference to the lowest). | 13 | Number (Decimal) |
| (A-B) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A-B) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-B) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A-B) Patient Age/Gender Breakdown | Similar to the health status section. It compares the providers to their specialty peer group based on the recipients they serve. | 10 | Character |
| (A-B) Peer Group Code | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-B) Peer Group Size | Peer group size is the number of providers in the same peer group. The peer group is also the group by which the provider is compared on all rankings. | 5 | Number (Integer) |
| (A-B) Percent Difference | Percent difference is the dollar difference divided by the expected amount multiplied by 100. The percent difference shows us the variance of dollars from the expected value to the actual value in a percentage. | 8 | Number (Decimal) |
| (A-B) Provider ID | Provider identification number. | 15 | Character |
| (A-B) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |
| (A-B) Provider Information | Provider's demographic information. This includes the provider name, street address, city, state, zip code, and telephone number. | 200 | Character |
| (A-B) Recip Count | Number of eligible recipients the provider served for this particular claim grouping. | 8 | Number (Integer) |
| (A-B) Recipient Rank | Rank based on the number of eligible recipients the provider served in a specific time period. | 5 | Number (Integer) |
| (B) Case Type | User defined group based on the case type file. The claim grouping should be specific to the area of service. | 100 | Character |
| (B) Claim Count | Number of claims the provider filed for the particular claim group. | 8 | Number (Integer) |
| (B) Quantity | Quantity billed. | 8 | Number (Integer) |
| (B) Top 10 Case Types | Different in the actual dollars and the expected dollars for the top 10 claim groupings for this provider. Graph displays Top 10 case types by dollar difference. | 60 | Character |
| (A) NPI ID | National provider identification number. | 13 | Character |
| (A) Mcaid ID | Medicaid provider identification number. | 13 | Character |
| (A) Base ID | Provider identification number. | 13 | Character |
| (A) Name | The provider's name. | 45 | Character |
| (A) Type | The provider type for the provider identification number. | 15 | Character |
| (A) Specialty | The provider specialty for the provider identification number. | 15 | Character |

### 3.5.81 DSSProfiler - Professional Referral Provider Profile Quarterly

The Professional Referral Provider Quarterly Profile report is created in the DSSProfiler. This report flags any category or case type that exceeds the accepted norm within the professional provider's peer group. Each category can be analyzed to identify services that are driving the total exception. All categories are age and gender adjusted so that the comparisons take into account the recipient mix of the individual provider.

The tabs on this report include:

A Provider Summary - Displays basic provider demographic information, breakdown of recipient age/gender distribution, the provider's general service profile and a comparison of recipient age/gender to the provider's peers; and

B Professional Referral - Tab B has two sections. The first sections of this report contain a graph that illustrates the top 10 case types. The case types are user defined based on the case type file. These top 10 case types are the top 10 services for which the provider received reimbursement over a specific period of time. This is an important graph because providers may be using a specific disease condition to attempt to receive additional payments. The second section of the report lists all case types for which the provider was reimbursed over a particular time period. This section is in chart form. The chart contains seven pieces of information about each claim grouping for the specific provider.

**Report Prompts (Search Criteria):**

- Provider ID - ID of the provider being profiled in the report;
- Provider Peer Group - The peer group to which the profiled provider is being compared;
- Aggregation Code - The code to which the profiled provider is being compared; and
- Quarter - Quarter of the provider being profiled in the report.

### 3.5.82 DSSProfiler - Provider Peer Group Comparison

The Peer Group Comparison report is created in the DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all providers within a peer group to determine which providers fall outside of service dollar norm. All information is age and gender adjusted so that differences in patient mix do not affect the results. This report can look at professional service totals, professional referral totals, inpatient totals, outpatient referral totals and pharmacy totals. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

This report provides a rapid method to find which providers need to be analyzed more closely utilizing other reports within the DSSProfiler. The tabs in this report include:

A. Compare by Dollar Difference - contains information that is essential in comparing providers within the same specialty group;

B. Compare by Percent Difference - similar to the previous, except the difference is expressed as a percent;

C. Data - shows the raw data for all of the equations used in the compare by dollar difference report and the compare by percent difference report; and

D. Other Rankings - shows four rankings for the providers in this particular specialty group.

**Report Prompts (Search Criteria):**

- Provider Peer Group - The peer group to which the profiled provider is being compared;
- Aggregation Code - Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. Claims can be further aggregated by billing or servicing provider where the servicing provider is the performing, referring, attending or prescribing provider, depending on the claim type; and
- Report Category - User-defined variables used to categorize case types into service groups.

### 3.5.82.1 DSSProfiler - Provider Peer Group Comparison Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Dollar Difference from Expected | Difference in the actual amount provider was paid and the amount provider was expected to receive (based on the ACG adjustment methodology). | 13 | Number (Integer) |
| (A-B) Each * 10% difference | Each * represents a 10% Difference From Center Line. | 1 | Character |
| (A-B,D) Number of Standard Deviations | Represents the number of standard deviations that the provider's dollar difference was from the expected. | 8 | Number (Integer) |
| (A-C) Rank | Recipient's rank based on the actual money paid by the program. | 3 | Number (Integer) |
| (A-C) Exp Rank | Provider's rank based on the amount provider should have been paid based on the Adjusted Clinical Grouping (ACG) adjustment methodology and comparison of Provider's specialty peer group. | 3 | Number (Integer) |
| (A-D) Provider ID Aggregation Code | This code was added as part of NPI. The values are 01 - Base ID all service locations; 02 - NPI ID all service locations and 03 NPI/Medicaid ID by service location. | 40 | Character |
| (A-D) Report Category | User-defined variables used to categorize case types into service groups. | 21 | Character |
| (A-D) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-D) For Date of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-D) Provider ID | Provider identification number. | 15 | Character |
| (A-D) Provider Name | Provider's full name. | 50 | Character |
| (A-D) Provider Peer Group | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| (A-D) Raw Rank | Provider's rank based on the amount Provider was paid. | 3 | Number (Integer) |
| (A-D) Report Category | User-defined variables used to categorize case types into service groups. | 50 | Character |
| (B) Percent Difference from Expected | Percentage number that is the difference in the actual amount provider was paid and the amount provider was expected to receive (based on the ACG adjustment methodology). | 7 | Number (Integer) |
| (C) Allowed Amount | The allowed amount of money the Medicaid program can pay on this particular grouping of claims for this specific recipient. | 13 | Number (Integer) |
| (C)Billed Amount | Amount the provider billed for the services. | 13 | Number (Integer) |
| (C) Dollar Difference | Difference in the actual amount provider was paid and the amount provider was expected to receive (based on the ACG adjustment methodology). | 13 | Number (Integer) |
| (C) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (C) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (C) Percent Difference | Percent number representing the difference in the actual amount provider was paid and the amount provider was expected to receive (based on the ACG adjustment methodology). | 8 | Number (Decimal) |
| (C) Recip Count | Number of eligible recipients the provider served for this particular claim grouping. | 8 | Number (Integer) |
| (D) Claim Rank | Number of claims rank is based on Number of claims provider billed. | 3 | Number (Integer) |

### 3.5.83 DSSProfiler - Provider Peer Group Comparison Quarterly

The Peer Group Comparison Quarterly report is created in the DSSProfiler. Based on the user-entered date range of one quarter, this report displays and compares all providers within a peer group to determine which providers fall outside of service dollar norm. All information is age and gender adjusted so that differences in patient mix do not affect the results. This report can look at professional service totals, professional referral totals, inpatient totals, outpatient referral totals and pharmacy totals. Providers who have two standard deviations above or below the norm for the peer group are highlighted.

This report provides a rapid method to find which providers need to be analyzed more closely utilizing other reports within the DSSProfiler. The tabs in this report include:

A. Compare by Dollar Difference - contains information that is essential in comparing providers within the same specialty group;

B. Compare by Percent Difference - similar to the previous, except the difference is expressed as a percent;

C. Data - shows the raw data for all of the equations used in the compare by dollar difference report and the compare by percent difference report; and

D. Other Rankings - shows four rankings for the providers in this particular specialty group.

**Report Prompts (Search Criteria):**

- Provider Peer Group - The peer group to which the profiled provider is being compared;
- Aggregation Code - Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. Claims can be further aggregated by billing or servicing provider where the servicing provider is the performing, referring, attending or prescribing provider, depending on claim type;
- Report Category - User-defined variables used to categorize case types into service groups; and
- Quarter - The quarter for which the report is being run. In the field description section, the fields are listed according to which tab they are found.

### 3.5.84 DSSProfiler – Recipient Claim Details - FFS

Based on the user-entered date range of one year, this report shows claim details for a recipient who has been profiled. The detailed claims information is categorized by the individual case types applied to the recipient's claims. Additionally, procedures and diagnoses are displayed, as well as a list of billing and performing providers.

The detail reports are very helpful for additional analysis on individual recipients.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The report contains five tabs:

A. The Inpatient Details tab holds claim details for inpatient claims;

B. The Professional Details tab holds claim details for professional and dental claims;

C. The Nursing Facility Details tab holds claim details for nursing facility claims;

D. The Pharmacy Details tab holds claim details for pharmacy claims; and

E. The Outpatient Details tab holds claim details for outpatient claims.

**Search criteria:**

- Recipient ID as specified in the user prompt; and
- Claims Indicator as specified in the user prompt.

### 3.5.85 DSSProfiler – Recipient Claim Details Quarterly - FFS

Based on the user-entered date range of one quarter, this report shows claim details for a recipient who has been profiled. The claims are broken out by claim type and case type. The Professional Details tab includes claim details for professional or dental claims. The Outpatient Details tab included outpatient claim details. The Inpatient Details tab includes inpatient claim details. The Pharmacy Details tab includes drug claim details. Nursing Facility tab includes nursing facility claim details.

The detail reports are very helpful for additional analysis on individual recipients.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The report contains five tabs:

A. The Professional Details tab holds claim details for professional and dental claims;

B. The Outpatient Details tab holds claim details for outpatient claims;

C. The Inpatient Details tab holds claim details for inpatient claims;

D. The Pharmacy Details tab holds claim details for pharmacy claims; and

E. The Nursing Facility Details tab holds claim details for nursing facility claims.

**Search criteria:**

- Recipient ID as specified in the user prompt; and
- Claims Indicator as specified in the user prompt.

### 3.5.86 DSSProfiler - Recipient Exception Quarterly

The Recipient Exception Profile QTR report is created in the DSSProfiler. This report shows recipient exception trending for a period of 12 months by quarter.

The report contains six tabs:

A. The Inpatient tab holds claim details for inpatient claims;

B. The Nursing Facility tab holds claim details for nursing facility claims;

C. The Outpatient tab holds claim details for outpatient claims;

D. The Pharmacy tab holds claim details for pharmacy claims;

E. The Professional tab holds claim details for professional and dental claims; and

F. The Professional Referrals tab holds claim details for professional referral related claims.

### 3.5.86.1 DSSProfiler - Recipient Exception Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-F) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-F) Calculation | Calculation to find case groups above the exception high. | 14 | Number (Decimal) |
| (A-F) Case Type Group Display | Case Type Group Code, a higher classification for the Case Type Code that corresponds to a SUR Report Line Item. | 4 | Number (Integer) |
| (A-F) Exception | This column is marked with a '*' when the case group is above the exception high value. | 1 | Character |
| (A-E) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-F) Peer Group Code | User-defined criteria that will group providers and recipients to be compared against other providers and recipients within the same peer group. Typical provider peer grouping variables are provider type or provider specialty. The most common recipient peer grouping is the recipient aid category. | 20 | Character |
| (A-F) Quarter | The quarter for which the report is being run. | 5 | Date (CCYYQ) |

### 3.5.87 DSSProfiler - Recipient Frequency Distribution

The Recipient Frequency Distribution report is created in the DSSProfiler. Based on the user-entered date range of one year, this report shows for each inpatient, pharmacy, nursing facility, professional services, professional referrals and outpatient case types, peer grouping, the distribution of services within the 10th, 25th, 50th, 75th, 90th and 95th percentiles based on the number of recipients reported within a case type, peer grouping.

The report contains five tabs:

A. The Inpatient tab holds claim details for inpatient claims;

B. The Pharmacy tab holds claim details for pharmacy claims;

C. The Nursing Facility tab holds claim details for nursing facility claims;

D. The Professional Services tab holds claim details for professional and dental claims;

E. The Professional Referrals tab holds claim details for professional referrals; and

F. The Outpatient tab holds claim details for outpatient claims.

### 3.5.88 DSSProfiler - Recipient Frequency Distribution Quarterly

Based on the user-entered date range of one quarter, this report displays recipient claim counts for each claim type service by percentile for the selected peer groups and aggregation types. Each percentile represents a percentage of the number of recipients with claims in the specific case type grouping. The percentile groups are determined by ordering recipients by the number of paid claims each has for the case type and then grouping the recipients into the percentiles starting with the recipient with the least number of claims. The claim count displayed for each percentile represents the maximum number of claims for any recipient falling in the percentile.

The report contains six tabs:

A. The Inpatient tab holds claim details for inpatient claims;

B. The Pharmacy tab holds claim details for pharmacy claims;

C. The Nursing Facility tab holds claim details for nursing facility claims;

D. The Professional Services tab holds claim details for professional and dental claims;

E. The Professional Referrals tab holds claims details for professional referral related claims; and

F. The Outpatient tab holds claim details for outpatient claims.

### 3.5.89 DSSProfiler - Recipient Peer Group Comparison

The Recipient Peer Group Comparison report is created in the DSSProfiler. Based on the user-entered date range of one year, this report displays and compares all recipients within a peer group to determine which recipients fall outside of service dollar norms. All information is age and gender adjusted so that differences in patient mix do not affect the results. This report can look at professional service totals, professional referral totals, inpatient referral totals, outpatient referrals and pharmacy totals. Recipients who have two standard deviations above or below the norm for the peer group are highlighted.

This report provides a rapid method to find which recipients need to be analyzed more closely utilizing other reports within the DSSProfiler.

The tabs in this report include:

A. Compare by Dollar Difference - Contains information that is essential in comparing recipients within the same group;

B. Compare by Percent Difference - Similar to the previous, except the difference is expressed as a percent; and

C. Data - Shows the raw data for all of the equations used in the compare by dollar difference report and the compare by percent difference report.

### 3.5.90 DSSProfiler - Recipient Peer Group Comparison Quarterly

Based on the user-entered date range of one quarter, this report displays and compares all recipients within a peer group to determine which recipients fall outside of service dollar norms. All information is age and gender adjusted so that differences in patient mix do not affect the results. This report can look at professional service, inpatient referrals, outpatient referrals and pharmacy totals. Recipients who have two standard deviations above or below the norm for the peer group are highlighted.

The tabs in this report include:

A. Compare by Dollar Difference - Contains information that is essential in comparing recipients within the same group;

B. Compare by Percent Difference - Similar to the previous, except the difference is expressed as a percent; and

C. Individual Recipient Information - Shows the raw data for all of the equations used in the compare by dollar difference report and the compare by percent difference report.

### 3.5.91 DSSProfiler - Recipient Profile

This report is created in the DSSProfiler. Based on the user-entered date range of one year, the Recipient Profile displays the aggregated case type categories for the selected recipients. This report makes it easier to see the types of services that a recipient is utilizing without the need for looking at the claim detail level. This report shows all case types including professional, inpatient, outpatient, nursing facility and pharmacy services.

There are multiple tabs on this report. For workbook documentation only, the different tabs have been lettered A-F in the layout below. The field names have the corresponding letter in front identifying the tab it can be found on. This is only to aid in verifying the report layouts. The letters are not on the actual or printed reports. For the report layouts below, only the information inside of the blue box can be found on the actual report.

The six tabs in this report are:

A. Recipient Demographics/Totals;

B. Professional Services;

C. Inpatient Services;

D. Outpatient Services;

E. Pharmacy Services; and

F. Nursing Facility Services.

### 3.5.92 DSSProfiler - Recipient Profile Quarterly

Based on the user-entered date range of one quarter, this report shows a claim summary for a recipient that has been profiled. The first tab shows totals by claim type. There are also tabs for each claim type which show totals by case type.

The six tabs in this report are:

A. Recipient Demographics/Totals;

B. Professional Services;

C. Inpatient Services;

D. Outpatient Services;

E. Pharmacy Services; and

F. Nursing Facility Services.

### 3.5.92.1 DSSProfiler - Recipient Profile Quarterly Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A) Age Group | Age range, which the recipient is grouped into. There are six age groups, 00-05, 06-17, 18-20, 21-34, 35-64, and 65+. | 24 | Character |
| (A) Birth Date | Recipient's date of birth. | 8 | Date (MM/DD/CCYY) |
| (A) Dollar Difference | Difference in the actual amount provider was paid and the amount Provider was expected to receive (based on the peer group adjustment methodology). | 13 | Number (Decimal) |
| (A) Expected Amount | Amount provider was expected to receive based on the peer group adjustment methodology. | 13 | Number (Decimal) |
| (A) Gender | Recipient's gender. | 1 | Character |
| (A) Percent Difference | Difference in the actual amount provider was paid and the amount Provider was expected to receive (based on the peer group adjustment methodology). | 13 | Number (Decimal) |
| (A) Recipient Name | Links together the recipient last name and first name into one object. The format of the name will be in: last name, first name. | 22 | Character |
| (A) Report Category Code Description | User-defined variables used to categorize case types into service groups. | 50 | Character |
| (A-F) Claim Count | Number of claims the provider filed for the particular claim group. | 8 | Number (Integer) |
| (A-F) Quantity | Quantity billed in the particular claim group for the recipient. | 8 | Number (Integer) |
| (A-F) Aggregation Code | Indicates the level of aggregation for claims by providers or recipients. Claims can be aggregated by FFS, Encounters or Both. | 50 | Character |
| (A-F) Allowed Amount | The allowed amount of money the Medicaid program billed on this particular grouping of claims for this specific recipient. | 13 | Number (Decimal) |
| (A-F) Billed Amount | Amount the provider billed for the services. | 13 | Number (Decimal) |
| (A-F) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-F) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (A-F) Quarter | The quarter for which the report is being run. | 5 | Date (CCYYQ) |
| (A-F) Recipient ID | Recipient Medicaid Number. | 12 | Character |

### 3.5.93 ETG Descriptions

This ETG Descriptions report contains code values and descriptions for ETG major practice categories, ETG number, and ETG episode types. This is a static report based on the code table values, and other than any ETG software changes, the data in this report will not change.

There are multiple tabs to this report. For workbook documentation only, the different tabs have been lettered A-C in the layout below. The field names have the corresponding letter in front, identifying the tab on which it can be found. This is only to aid in verifying the report layouts. The letters are not on the actual or printed reports. For the report layouts below, only the information inside of the blue box can be found on the actual report.

The eight tabs in this report are:

A. ETGs By Major Processing Category;

B. ETGs By ETG Number & Description; and

C. ETG Episode Types.

## ETG Descriptions

### ETG Episode Types

| Episode Type | Episode Type Description |
|---|---|
| 0 | 0 - Complete Episode. |
| 1 | 1 - A full year episode which has at least one anchor record within the episode's clean period from the end of the claims data range. |
| 2 | 2 - A full year episode which has at least one anchor record within the episode's clean period from the beginning of the claims data range. |
| 3 | 3 - A full year episode which has both an anchor record within the episode clean period from the beginning of the database, and another anchor record within the clean period from the end of the claims data range. |
| 4 | 4 - An episode < 1 year with a clean start. |
| 5 | 5 - An episode < 1 year with a clean finish. |
| 6 | 6 - An episode < 1 year with neither a clean start nor a clean finish. |
| 7 | 7 - Incomplete annual episode, only applies to chronic episodes. |
| 8 | 8 - A record which was not grouped to an episode. This includes records with "Ongoing Rx Therapy" and Ungroupable ETG. This value may also occur for some pregnancy records. |
| 9 | 9 - Orphan ancillary service, not grouped to an episode. |

### 3.5.94 ETG Details - FFS

The ETG Details report breaks the Episode Treatment Groups (ETGs) down to the major category levels. It displays the average episode cost, the average amount per recipient, total episodes, total recipients and total dollars.

This report contains a prompt that allows the report user to enter a specific warrant date or a range of warrant dates to extract the claim's data.

There are multiple tabs to this report. For workbook documentation only, the different tabs have been lettered A-H in the layout below. The field names have the corresponding letter in front, identifying the tab on which it can be found. This is only to aid in verifying the report layouts. The letters are not on the actual or printed reports. For the report layouts below, only the information inside of the blue box can be found on the actual report.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The eight tabs in this report are:

A. Details By ETG;

B. Details By Recipient;

C. Details By Servicing Provider;

D. Recipient Totals;

E. Provider Totals;

F. Procedure Totals;

G. Diagnosis Totals; and

H. NDC Totals.

### 3.5.94.1 ETG Details - FFS Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-C) Wrap Ind | Wrap Payment Indicator | 1 | Character |
| (A,B,C,G) ICD | The ICD Version code for the primary ICD-CM payment level diagnosis code. | 1 | Character |
| (A,C,D) Recipient Full Name | Links together the recipient last name and first name into one object. The format of the name will be in: last name, first name. | 22 | Character |
| (A,C,D) Recipient ID | The recipient's Medicaid identification number. | 12 | Character |
| (A,D-H) Subclass | This field further describes the ETG number. | 3 | Character |
| (A,D-H) Subclass Description | The description of the subclass; for example: ETG Number 669001 is Skin trauma, subclass 000 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, w/o surgery", and subclass 001 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, *with* surgery". | 225 | Character |
| (A-C) Allowed Amount | The allowed amount for the detail. | 11 | Number (Decimal) |
| (A-C) Billed Amount | The billed amount for the detail. | 11 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-C) Buyin Medicare A | Medicare Buy-in in which recipient is participating in Part A. | 5 | Character |
| (A-C) Buyin Medicare B | Medicare Buy-in in which recipient is participating in Part B. | 5 | Character |
| (A-C) Claim Detail Status | The claim's status code. | 1 | Character |
| (A-C) Claim ICN | The claim's identification number. | 13 | Character |
| (A-C) Claim Indicator | Indicates whether the claim is a Fee-for-Service (FFS) or an Encounter claim. | 1 | Character |
| (A-C) Claim Type & Description | Shows what type of claim was submitted and the description. | 53 | Character |
| (A-C) Date First Service | The claim's first date of service. | 10 | Date (MM/DD/CCYY) |
| (A-C) Date Last Service | The claim's last date of service. | 10 | Date (MM/DD/CCYY) |
| (A-C) Detail Number | Detail number on the claim. | 3 | Number (Integer) |
| (A-C) DRG Code and Description | Diagnosis Related Group Number assigned to the claim, and its description. | 30 | Character |
| (A-C) DRG Relative Weight | Relative weight for pricing DRG | 5 | Number (Decimal) |
| (A-C) DRG Service Adjuster | This field contains the pediatric value if recipient age at admission is less than pediatric age cut-off value. Otherwise, it will be adult service adjustor | 3 | Number (Decimal) |
| (A-C) Episode Type & Description | Episode Type and the associated description. | 229 | Character |
| (A-H) ETG Number & Description | The selected ETG Number and its description. | 234 | Character |
| (A-C) Program Code & Description | State aid category. | 55 | Character |
| (A-C) Recip Age | The recipient's age. | 3 | Number (Integer) |
| (A-C) Recip County & Description | Recipient's county of residence and the associated description. | 38 | Character |
| (A-C) Revenue Code & Description | The revenue code on a detail and the associated description. | 77 | Character |
| (A-C, E) Provider ID - Referring/Attending/Prescribing | Lists the NPI, Medicaid, and Base ID for the provider. | 63 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-C, E) Provider ID - Billing | Lists the NPI, Medicaid, and Base ID for the provider. | 63 | Character |
| (A-C, E) Provider ID - Rendering | Lists the NPI, Medicaid, and Base ID for the provider. | 63 | Character |
| (A-C, F) Procedure Code & Description | Procedure code on the detail and its description. | 49 | Character |
| (A-C, H) NDC Code & Description | The National Drug Code for a drug claim and its name/description | 49 | Character |
| (A-C,G) Primary Diagnosis Code & Description | Primary diagnosis code and its description. | 70 | Character |
| (A-H) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-H) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient. | 11 | Number (Decimal) |
| (D-H) Total Paid Amount | The paid (warrant) amount including the State share amount. | 11 | Number (Decimal) |
| (F-H) Number of Claims | Unduplicated count of ICNs. | 8 | Number (Integer) |
| (F-H) Number of Providers | The count of providers for the associated line. | 8 | Number (Integer) |
| (F-H) Number of Recipients | Unduplicated count of recipient IDs. | 8 | Number (Integer) |
| (F-H) Percent of All Claims | Count of ICN divided by total of all ICNs. | 8 | Number (Decimal) |
| (F-H) Percent of All Providers | The count of procedures for the provider divided by the count of all providers. | 13 | Number (Integer) |
| (F-H) Percent of All Recipients | Count of recipient id divided by total of all recipients. | 8 | Number (Integer) |

### ETG Distribution Analysis Episode Type - FFS

The ETG Distribution Analysis Episode Type report provides totals and averages for ETG Episode Types. This includes allowed amount, number of unduplicated recipients, episodes and the number of exceptions for episodes and recipients.

The Episode Type field of each record (also included in the summary record for the episode) indicates the completeness of the record's episode; see Episode Types in the Appendix for more details.

Episode Treatment Groups (ETGs) are basic illness classifications, similar in structure to Diagnosis Related Groupings (DRGs). ETGs provide a medically meaningful statistical unit representing a complete episode of care assessed on a series of clinical and statistical algorithms.

The reports combine routinely collected inpatient, outpatient and ancillary claims data into mutually exclusive and exhaustive categories. ETGs successfully provide a unit of analysis for creating provider profiling, demand analysis and disease management strategies. The DSS Episode Treatment Grouper (or ETG Profiler) allows ETG reporting. The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The report contains three tabs:

A. ETG Distribution Analysis by ETG;

B. ETG Distribution Analysis by Major Practice Category (MPC); and

C. ETG Distribution Analysis Episode Type.

### 3.5.96 ETG Episode Cross Reference - FFS

The ETG Episode Cross Reference report provides cross reference episode information to determine if one type of disease condition is related to other episode types (for example, do asthmatics have prevalence for diabetes?) Combining episodes provides a comprehensive image of the health of recipients.

Episode Treatment Groups (ETGs) are basic illness classifications, similar in structure to Diagnosis Related Groupings (DRGs). ETGs provide a medically meaningful statistical unit representing a complete episode of care based on a series of clinical and statistical algorithms. The reports combine routinely collected inpatient, outpatient and ancillary claims data into mutually exclusive and exhaustive categories.

ETGs successfully provide a unit of analysis for the creation of provider profiling, demand analysis and disease management strategies. The DSS Episode Treatment Grouper (or ETG Profiler) allows ETG reporting. The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters. This date range is displayed in the header of the report.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The report contains two tabs:

A. ETG Overview - Contains an overview of the top ETGs by recipient count and the top ETGs by episode count; and

B. ETG Episodes - Contains all ETGs with the counts and amounts for each.

### 3.5.97 ETG Recipient Comparison - FFS

The ETG Recipient Comparison report flags recipients with total cost per episode or per recipient that is two or more standard deviations from the norm for a given episode type. The report provides a comparison of recipient's ETG information by episode type, for a selected ETG.

Episode Treatment Groups (ETGs) are basic illness classifications similar in structure to Diagnosis Related Groupings (DRGs). ETGs provide a medically meaningful statistical unit representing a complete episode of care based on a series of clinical and statistical algorithms. The report combines routinely collected inpatient, outpatient and ancillary claims data into mutually exclusive and exhaustive categories.

ETGs provide a unit of analysis for the creation of provider profiling, demand analysis and disease management strategies. The DSS Episode Treatment Grouper (or ETG Profiler) allows ETG reporting. The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters. The ETG Recipient Comparison report flags recipients with total cost per episode of two or more standard deviations from the norm. The report allows comparing recipients ETG information by episode type for a selected ETG.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

### 3.5.97.1 ETG Recipient Comparison - FFS Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| Difference in Episode Cost: 2 std dev = $0 | Difference Episode Cost value which is two standard deviations (2 std dev) from the 'norm'. Provider Amount per Episode minus Global Amt per Episode. Calculation: The amount allowed for a given provider per Episode minus the global amount allowed per provider and Episode. | 11 | Number (Decimal) |
| Difference Recipient Cost: 2 std dev = $0 | Difference Recipient Cost value which is two standard deviations from the 'norm'. Provider Amount per Recipient minus Global Amount per Recipient. Calculation: The amount allowed for a given recipient per Episode minus the global amount allowed per recipient and Episode. 2 Std Dev (Difference Recipient Cost) | 11 | Number (Decimal) |
| Episode Count | Unduplicated count of episodes. | 8 | Number (Integer) |
| Episode Type & Description | Episode Type and description. | 229 | Character |
| ETG Number (prompt) & Description | The selected Episode Treatment Group (ETG) code and its description. | 234 | Character |
| For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| Global Paid Amount per Episode | Total amount for all providers divided by the number of episodes. | 11 | Number (Decimal) |
| Global Paid Amount per Recipient | The grand total of all paid amount per recipient. | 13 | Number (Decimal) |
| Paid Amount Per Episode | The total paid amount divided by the episode count. | 13 | Number (Decimal) |
| Paid Amount Per Recipient | Actual amount the provider was paid per recipient. | 13 | Number (Decimal) |
| Recipient ID | The recipient's identification number. | 12 | Character |
| Recipient Full Name | The recipient's full name. | 43 | Character |
| Subclass | This field further describes the ETG number. | 3 | Character |
| Subclass Description | The description of the subclass; for example: ETG Number 669001 is Skin trauma, subclass 000 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, w/o surgery", and subclass 001 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, *with* surgery". | 225 | Character |

### ETG Recipient Details - FFS

The ETG Recipient Details report shows selected recipient's detail claims information. Episode Treatment Groups (ETGs) are basic illness classifications, similar in structure to Diagnosis Related Groupings (DRGs). ETGs provide a medically meaningful statistical unit representing a complete episode of care based on a series of clinical and statistical algorithms. The report combines routinely collected inpatient, outpatient and ancillary claims data into mutually exclusive and exhaustive categories. ETGs provide a unit of analysis for the creation of provider profiling, demand analysis and disease management strategies. The DSS Episode Treatment Grouper (or ETG Profiler) allows ETG reporting. The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters. The details are grouped into episode types, which provide a method of viewing specific billing patterns and practices of providers that help to determine what steps may be required to improve the health of recipients or reduce the cost of the services.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters. The DSS Episode Treatment Grouper (or ETG Profiler) allows ETG reporting.

The report contains eight tabs:

A. Recipient Overview;

B. Details by ETG;

C. Details by Servicing Provider;

D. Provider Totals;

E. ETG Totals;

F. Procedure Totals;

G. Diagnosis Totals; and

H. NDC Totals.

### ETG Recipient Summary - FFS

The ETG Recipient Summary report rapidly displays all of the selected recipients' episodes in graphical and numeric format to assist in the identification of anomalies in service or practice. Episode Treatment Groups (ETGS) are basic illness classifications, similar in structure to Diagnosis Related Groupings (DRGs). Based on a series of clinical and statistical algorithms, ETGs provide a medically meaningful statistical unit representing a complete episode of care. ETGs combine all routinely collected inpatient, outpatient and ancillary claims data into mutually exclusive and exhaustive categories. ETGs successfully provide a unit of analysis for the creation of provider profiling, demand analysis and disease management strategies. The Episode Treatment Grouper (or ETG Profiler) allows for reporting on ETGs. The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters.

There are multiple tabs to this report. For workbook documentation only, the different tabs have been lettered A-D in the layout below. The field names have the corresponding letter in front, identifying the tab on which it can be found. This is only to aid in verifying the report layouts. The letters are not on the actual or printed reports. For the report layouts below, only the information inside of the blue box can be found on the actual report.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The four tabs in this report are:

A. Episodes and Costs for Recipient;

B. Recipient Summary Global Comparison;

C. Summary by ETG; and

D. Summary ETG Details by Major Practicing Category (MPC).

### 3.5.100 ETG Provider Comparison - FFS

The ETG Provider Comparison report flags providers with total cost per episode or per recipient that is two or more standard deviations from the norm for a given episode type. The report provides a comparison of provider's ETG information by episode type for a selected ETG.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

Episode Treatment Groups (ETGs) are basic illness classifications, similar in structure to Diagnosis Related Groupings (DRGs). ETGs provide a medically meaningful statistical unit representing a complete episode of care based on a series of clinical and statistical algorithms. The reports combine routinely collected inpatient, outpatient and ancillary claims data into mutually exclusive and exhaustive categories. ETGs successfully provide a unit of analysis for the creation of provider profiling, demand analysis and disease management strategies. The DSS Episode Treatment Grouper (or ETG Profiler) allows ETG reporting. The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters.

### 3.5.100.1 ETG Provider Comparison - FFS Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| Difference in Episode Cost: 2 std dev = $0 | Difference Episode Cost value which is two standard deviations (2 std dev) from the 'norm'. Provider Amount per Episode minus Global Amt per Episode. Calculation: The amount allowed for a given provider per Episode minus the global amount allowed per provider and Episode. | 11 | Number (Decimal) |
| Difference Recipient Cost: 2 std dev = $0 | Difference Recipient Cost value which is two standard deviations from the 'norm'. Provider Amount per Recipient minus Global Amount per Recipient. Calculation: The amount allowed for a given recipient per Episode minus the global amount allowed per recipient and Episode. 2 Std Dev (Difference Recipient Cost) | 11 | Number (Decimal) |
| Episode Count | Unduplicated count of episodes. | 8 | Number (Integer) |
| Episode Type and Description | Episode Type and description. | 229 | Character |
| ETG Number (prompt) & Description | The selected ETG Number and its description. | 234 | Character |
| For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| Global Allowed Amount per Episode | Paid amount per episode. | 11 | Number (Decimal) |
| Global Allowed Amount per Recipient | The allowed amount per recipient. | 11 | Number (Decimal) |
| Paid Amount Per Episode | The total paid amount divided by the episode count. | 13 | Number (Decimal) |
| Paid Amount Per Recipient | Actual amount the provider was paid per recipient. | 13 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| Provider Full Name | The provider's full name. | 50 | Character |
| Provider ID | The provider's identification number. | 9 | Character |
| Recipient Count | The number of eligible recipients the provider served for this particular claim grouping. | 6 | Number (Integer) |
| Subclass | This field further describes the ETG number. | 3 | Character |
| Subclass Description | The description of the subclass; for example: ETG Number 669001 is Skin trauma, subclass 000 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, w/o surgery", and subclass 001 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, *with* surgery". | 225 | Character |
| Totals | The sum of episode amounts. | 13 | Number (Decimal) |

### 3.5.101 ETG Provider Details - FFS

The ETG Provider Details report shows detailed information for a selected provider. The details are grouped into episode type, which provides a convenient method of viewing specific billing patterns and practices of the provider. This information helps to determine what steps may be required to improve the health of recipients or reduce the cost of the services. Episode Treatment Groups (ETGs) are basic illness classifications, similar in structure to Diagnosis Related Groupings (DRGs). ETGs provide a medically meaningful statistical unit representing a complete episode of care based on a series of clinical and statistical algorithms.

The report combines routinely collected inpatient, outpatient and ancillary claims data into mutually exclusive and exhaustive categories. ETGs provide a unit of analysis for the creation of provider profiling, demand analysis and disease management strategies. The DSS Episode Treatment Grouper (or ETG Profiler) allows ETG reporting. The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

The report contains eight tabs:

A. Provider Overview;

B. Details by ETG;

C. Details by Recipient;

D. Recipient Totals;

E. ETG Totals;

F. Procedure Totals;

G. Diagnosis Totals; and

H. NDC Totals.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-H) (Provider) Type | The provider type code and description. | 55 | Character |
| (A-H) (Provider ) Specialty | The specialty and description for the provider. | 56 | Character |
| (A-H) Address (City, State, Zip) | The provider's city, state, and ZIP code. | 46 | Character |
| (A-H) Address (Street) | The provider's street address. | 62 | Character |
| (B) Servicing Provider Address (City, State, Zip) | The servicing provider's city, state, and ZIP code. | 46 | Character |
| (B) Servicing Provider Address (Street) | The servicing provider's street address. | 62 | Character |
| (D,F,G,H) Totals | The sum of episode amounts. | 13 | Number (Integer) |
| (B-H) Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| (B-D, F-H) Claim ICN | The claim's identification number. | 13 | Character |
| (B-D, F-H) Recipient Full Name | Recipient Full name, including first, middle initial and last name. | 39 | Character |
| (B-D, F-H) Recipient ID | The recipient's Medicaid identification number. | 11 | Character |
| (B,C,H) NDC & Description | National Drug Code is comprised of a 5-Character numeric labeler code, a 4-Character numeric product code, and a 2-Character numeric package code. It identifies a drug, its labeler, and the package size of a product, and is used for pricing and prior authorization. The description is a combination of the drug name appearing on the package label, the strength description and the dosage form description. | 49 | Character |
| (B,C,F) Procedure Code & Description | The procedure code for the detail and the associated description. | 49 | Character |
| (B,C) Billed Amount | The billed amount for the detail. | 11 | Character |
| (B,C) Allowed Amount | The allowed amount for the detail. | 11 | Character |
| (B,C) Buy-In Medicare A | Medicare Buy-in in which recipient is participating in Part A. | 5 | Character |
| (B,C) Buy-In Medicare B | Medicare Buy-in in which recipient is participating in Part B. | 5 | Character |
| (B,C) DRG Code and Description | Diagnosis Related Group Number assigned to the claim, and its description. | 30 | Character |
| (B,C) DRG Relative Weight | Relative weight for pricing DRG | 5 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (B,C) DRG Service Adjuster | This field contains the pediatric value if recipient age at admission is less than pediatric age cut-off value. Otherwise, it will be adult service adjustor | 3 | Number (Decimal) |
| (B,C) Provider ID-Rendering | Lists the NPI, Medicaid, and Base ID for the rendering provider. | 63 | Character |
| (B,C) Revenue Code & Description | Revenue code and description. | 77 | Character |
| (B,C,G) ICD | The ICD Version code for the primary ICD-CM payment level diagnosis code. | 1 | Character |
| (B,C,G) Primary Diagnosis Code & Description | The primary ICD-CM diagnosis description. | 70 | Character |
| (B,C) Claim Type Code & Description | Shows what type of claim was submitted. | 54 | Character |
| (B,C) Episode Type & Description | Episode Type and the associated description. | 229 | Character |
| (B,C) Recip Age | The recipient's age. | 3 | Number (Integer) |
| (B,C) Recip County Description | Recipient's county of residence and the associated description. | 38 | Character |
| (B,C) Claim Indicator | Indicates whether the claim is a Fee-for-Service (FFS) or an Encounter claim. | 1 | Character |
| (B,C) Program Code Description | State aid category. | 6 | Character |
| (B,C) Provider ID Billing | Lists the NPI, Medicaid, and Base ID for the billing provider. | 63 | Character |
| (B,C) Provider ID-Referring/Attending/Prescribing | Lists the NPI, Medicaid, and Base ID for the provider. | 63 | Character |
| (B,C) Detail Number | Detail number on the claim. | 2 | Number (Integer) |
| (B,C) Claim Detail Status | The claim's status code. | 1 | Character |
| (B,C) Date First Service | The claim's first date of service. | 10 | Date (MM/DD/CCYY) |
| (B,C) Date Last Service | The claim's last date of service. | 10 | Date (MM/DD/CCYY) |
| (B,C,F,G,H) Subclass | This field further describes the ETG number. | 3 | Character |
| (B,C) Wrap Ind | Wrap Payment Indicator | 1 | Character |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (B,C,F,G,H) Subclass Description | The description of the subclass; for example: ETG Number 669001 is Skin trauma, subclass 000 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, w/o surgery", and subclass 001 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, *with* surgery". | 225 | Character |

### 3.5.102 ETG Provider Summary - FFS

This report is run through the Episode Treatment Grouper (ETG). This breaks the ETGs down to the provider level.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

There are multiple tabs to this report. For workbook documentation only, the different tabs have been lettered A-D in the layout below. The field names have the corresponding letter in front, identifying the tab on which it can be found. This is only to aid in verifying the report layouts. The letters are not on the actual or printed reports. For the report layouts below, only the information inside of the blue box can be found on the actual report.

The four tabs in this report are:

A. Episodes and Costs for Provider;

B. Provider Summary Global Comparison;

C. Summary By ETG; and

D. Summary ETG Details By Major Practicing Category (MPC).

### 3.5.102.1 ETG Provider Summary - FFS Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| (A-D) (Provider) Specialty | The specialty and description for the provider. | 63 | Character |
| (A-D) (Provider) Type | The provider type code and description. | 50 | Character |
| (A-D) Address (City, State, Zip) | The provider's city, state, and ZIP code. | 25 | Character |
| (A-D) Address (Street) | The provider's street address. | 30 | Character |
| (A-D) Base ID | The Base identification number of the provider. | 13 | Character |
| (A-D) For Dates of Service | Starting and Ending range of service date selection criteria. | 20 | Date (MM/DD/CCYY) |
| (A-D) Medicaid ID | Medicaid identification number for the provider. | 13 | Character |
| (A-D) Name | The provider's name. | 50 | Character |
| (A-D) NPI ID | The National Provider Identification number of the provider. | 10 | Character |
| (B) Global Cost per Recipient | Total amount paid / unduplicated recipient count. | 7 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (B,D) Provider Average Cost per Recipient | Total amount paid per recipient. | 11 | Number (Decimal) |
| (B) Subclass | This field further describes the ETG number. | 3 | Character |
| (B) Subclass Description | The description of the subclass; for example: ETG Number 669001 is Skin trauma, subclass 000 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, w/o surgery", and subclass 001 is "except burn & open wound - foot & ankle, w/o complication, w/o comorbidity, *with* surgery". | 225 | Character |
| (C) Average Episode Cost | Total amount paid /episode cost. | 11 | Number (Decimal) |
| (C) Total Episodes | The episode count for the ETG. | 6 | Number (Integer) |
| (C) Average Amount per Recipient | Total amount paid / unduplicated recipient count. | 11 | Number (Decimal) |
| (C) Total Recipients | The unduplicated recipient count for the ETG. | 6 | Number (Integer) |
| (C) Total Dollars | The summed total of all paid amounts. | 11 | Number (Decimal) |
| (C)Percentage | Percentage of paid amount identified in the previous report column. | 8 | Number (Decimal) |
| (C) ETG Number & Description | The ETG number and its description. | 234 | Character |
| (C,D) Ancillary Inpatient Paid | Ancillary Inpatient paid amount. | 11 | Number (Decimal) |
| (C,D) Ancillary Outpatient Paid | Ancillary Outpatient paid amount. | 11 | Number (Decimal) |
| (C,D) Facility Paid | Facility paid amount. | 11 | Number (Decimal) |
| (C,D) Medical Services Paid | Medical paid amount. | 11 | Number (Decimal) |
| (C,D) RX Paid | Prescription paid amount. | 11 | Number (Decimal) |
| (C,D) Surgery Paid | Surgery paid amount. | 11 | Number (Decimal) |
| (D) Recip Count | Number of eligible recipients the provider served for this particular claim grouping. | 8 | Number (Integer) |
| (D) Episode Count | The episode count for the ETG. | 6 | Number (Integer) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| (D) Total Amount Billed | The total amount billed for the ETG. | 11 | Number (Decimal) |
| (D) Total Amount Paid | The total amount paid for the ETG. | 11 | Number (Decimal) |
| (D) Global Allowed Amount per Recip | The allowed amount per recipient. | 11 | Number (Decimal) |
| (D) Dollar Difference | The difference between the paid and allowed amount. | 7 | Number (Decimal) |
| (D) Percent Difference | The difference between the paid and allowed amount expressed as a percent. | 3 | Number (Decimal) |

### 3.5.103 ETG Summary - FFS

The ETG Summary report breaks the Episode Treatment Groups (ETGs) down to the major category levels. It displays the average episode cost, the average amount per recipient, total episodes, total recipients and total dollars.

For this particular version of the report, only FFS (Fee-for-Service) claims are used.

ETGs are basic illness classifications, similar in structure to Diagnosis Related Groupings (DRGs). Based on a series of clinical and statistical algorithms, ETGs provide a medically meaningful statistical unit representing a complete episode of care. ETGs combine all routinely collected inpatient, outpatient and ancillary claims data into mutually exclusive and exhaustive categories. ETGs successfully provide a unit of analysis for the creation of provider profiling, demand analysis and disease management strategies. The Episode Treatment Grouper (or ETG Profiler) allows for reporting on ETGs. The reports are produced quarterly with 24 months of data exclusive of the two most recent quarters.

The ETG Summary report contains two tabs. The first tab contains brief information for every ETG major processing category. The second tab allows the report user to drill down by major processing category, ETG description and episode type to view individual ETGs. The report in the second tab presents the data in chart and tabular format. A report user can select the ETG processing category, ETG description and episode type they want to see by using the drop down boxes at the top of the report.

There are multiple tabs to this report. For workbook documentation only, the different tabs have been lettered A-B in the layout below. The field names have the corresponding letter in front, identifying the tab on which it can be found. This is only to aid in verifying the report layouts. The letters are not on the actual or printed reports. For the report layouts below, only the information inside of the blue box can be found on the actual report.

The two tabs in this report are:

A. Summary By ETG; and

B. Summary ETG Details By Major Practicing Category (MPC).

### 3.5.104 TQ - Facility Visits Exception

The Facility Visits Exception Report displays the exception professional claims submitted by a provider meeting the defined criteria for the report.

The SURS Certification Requirement met by this report:

- Physicians and other practitioners having instances of frequent multiple visits on a single day to many recipients at the same facility or location. The requirement of 'frequent' is determined by the analyst reviewing the report.

**Search Criteria:**

- Claim Type = M or B;
- Paid Claims Only;
- Latest Claims Only;
- Exclude Wrap Payments;
- Procedure Code between 99221 and 99223 or 99231 and 99233 or 99381 and 99387 or 99391 and 99397;
- Date of Services - Date range specified by the user in the prompt; and
- Multiple Visits - Specified by the user. It is the number of visits per day by a provider to one or more recipients at the same facility or location.

### 3.5.104.1 TQ - Facility Visits Exception Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| Billing Provider Medicaid ID | Lists the NPI, Medicaid, and Base ID for the billing Provider. | 13 | Character |
| Billing Provider Name | The name associated with the billing provider ID. | 50 | Character |
| Claim Indicator | Indicates whether the claim is a Fee-for-Service (FFS) or an Encounter claim. | 1 | Character |
| Claim Type | A code to indicate the type of medical assistance invoice used by the provider to bill OMAP for the rendered service. | 1 | Character |
| District Plan Code | The Managed Care plan code assigned to the claim. For example:ZZZ=Medicaid | 3 | Character |
| Encounter Amount | Amount that *would have been* sent to a provider for payment for services rendered to a recipient (using Encounter “what-if" amount). | 10 | Number (Decimal) |
| Facility Provider Medicaid ID | Lists the NPI, Medicaid, and Base ID for the Provider. | 13 | Character |
| Facility Provider Name | The name associated with the organization or person. | 50 | Character |
| From Date of Service Date | The date the service was incurred. | 10 | Date (MM/DD/CCYY) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| Paid Amount | Amount sent to a provider for payment for services rendered to a recipient | 13 | Number (Decimal) |
| Payment Date | The date the claim was paid. | 10 | Number (Integer) |
| Provider Medicaid ID | Lists the NPI, Medicaid, and Base ID for the provider. | 13 | Character |
| Provider Name | Name of the Provider. | 25 | Character |
| Primary Procedure Code and Description | The primary procedure code and its description. | 49 | Character |
| RCO Paid Amount | Amount sent to a provider for payment for services rendered to a recipient (by RCO). | 10 | Number (Decimal) |
| Recipient ID | The unique number assigned to the recipient. | 12 | Character |
| Recipient Name | Full name of the recipient on the claim. | 32 | Character |
| Multiple Visits | User prompt to enter the limit of visits for the report data to be displayed. | 2 | Character |
| To Date of Service Date | Date on which the statement period on the claim ended. | 10 | Date (MM/DD/CCYY) |

### 3.5.106 TQ – Home Hospital Conflict

This report identifies recipients receiving services from different user selected provider types on the same or overlapping dates of service. The user can enter Billing Provider Type code(s) and date of service range.

A - Overlapping Recipient Services Report is sorted by Date of First Service.

A claim is considered to overlap another claim if all of the following criteria are met: Same recipient or dates of service ranges overlap on any day except the admission and discharge date on the inpatient.

Other criteria: No voided claims; Paid Claims only; Exclude Family Planning Claims

#### 3.5.111.1 TQ – Inpatient – Related Readmissions Field Descriptions

| Field | Description | Length | Data Type |
|---|---|---|---|
| Adjust/Void Code | A code to indicate whether the record is for a debit or credit and adjustment. | 1 | Character |
| Adjusted ICN | Unique control number assigned to a claim when it has been adjusted in the system, blank if this is a non-adjusted claim. | 13 | Number (Integer) |
| Claims Indicator (s) | Indicates whether the claim is a Fee-for-Service (FFS) or an Encounter claim (E). | 1 | Character |
| Admission Date | Date recipient was admitted. | 10 | Date (MM/DD/CCYY) |
| Claim Type | Shows what type of claim was submitted. | 1 | Character |
| Detail Number | Detail number on the claim. | 63 | Number (Integer) |
| Discharge Date | Date that the recipient was discharged by the provider for inpatient care, outpatient services or start of care. | 10 | Date (MM/DD/CCYY) |
| District Plan Code | The Managed Care plan code assigned to the claim. For example:ZZZ=Medicaid | 3 | Character |
| DRG Code and Description | Diagnosis Related Group Number assigned to the claim, and its description. | 60 | Character |
| DRG Relative Weight | Relative weight for pricing DRG | 5 | Number (Decimal) |

© 2019 DXC Technology Company. All rights reserved.

| Field | Description | Length | Data Type |
|---|---|---|---|
| DRG Service Adjuster | This field contains the pediatric value if recipient age at admission is less than pediatric age cut-off value. Otherwise, it will be adult service adjustor | 3 | Number (Decimal) |
| Encounter Amount | Amount that *would have been* sent to a provider for payment for services rendered to a recipient (using Encounter “what-if" amount). | 10 | Number (Decimal) |
| From Dates of Service within | Claim's first date of service. | 13 | Number (Integer) |
| ICN | Unique control number assigned to the invoice to indicate its date of receipt. The format is RRYYJJJBBBSSS where RR is the claim region; YY is the last two digits of the calendar year the claim was received; JJJ is the Julian date of claim receipt; BBB is the batch number; and SSS is the sequence number of the invoice within the batch. | 13 | Character |
| NDC Code & Description | National Drug Code is comprised of a 5-Character numeric labeler code, a 4-Character numeric product code, and a 2-Character numeric package code. It identifies a drug, its labeler, and the package size of a product, and is used for pricing and prior authorization. The description is a combination of the drug name appearing on the package label, the strength description and the dosage form description. | 49 | Character |
| Paid Amount | Amount sent to a provider for payment for services rendered to a recipient This is the amount paid by Medicaid, after TPL, copay, etc have been subtracted. | 9 | Number (Integer) |
| Previous ICN | ICN from the legacy system | 13 | Character |
| Performing Provider IDs | Lists the NPI, Medicaid, and Base ID for the performing Provider. | 63 | Character |
| Performing Provider Name | Name of the provider. | 25 | Character |
| Readmission Alert | Indicates a possible readmission within 7 days. | 29 | Character |
| RCO Paid Amount | Amount sent to a provider for payment for services rendered to a recipient (by RCO). | 10 | Number (Decimal) |
| Recipient Full Name | Name of the recipient. | 13 | Number (Integer) |

### 3.5.113 TQ – Delayed Surgery Summary

This report lists all inpatient claims containing a surgical code where the surgical date is greater than the from date of service. This report ranks the claims based on the number of days a surgery was delayed. The delayed surgery count is calculated by determining the days between the from date of service and the surgical procedure date.

The report contains 3 report tabs:

A. The Delayed Surgery Provider List - Displays a list of providers and the delayed surgery claim count. The order is descending by delayed surgery claim count;

B. The Delayed Surgery Detail Report by Provider - Used to view a specific provider found in the Delayed Surgery Provider List. This gives you a quick view (drill) into the claims for a specific provider. Also, if you want to print the report, but don't want to print all of the other providers, use this tab to get only the selected provider; and

C. The Delayed Surgery Detail Report - All Providers displays the claims for all providers found in the Delayed Surgery Provider List tab. Use this report tab when you want to look at all of the providers' claim information at the same time.

This report is used to meet the following SUR Certification Requirement:

- Inpatient Hospitals having instances of: Frequently delayed surgery per recipient; and
- Frequently delayed surgeries are identified for billing providers having more than 3 claims with surgeries being delayed, based on the surgical procedure date, for more than 1 day from the from date of service on the claim.

**Report criteria:**

- Inpatient Claims Only;
- Paid Claims Only;
- From Date of Service Range prompt; and
- Surgical Procedure Date from the From Date of Service greater than 1 (one).

### 3.5.115 TQ – Drug – Recipients w-mult Pharmacies-Prescribers

The Drug - Recipients w/mult Pharmacies-Prescribers report shows recipients who visited five or more different pharmacies and obtained prescriptions from five or more prescribers in a given quarter. Note: The report layout displays the report columns being split into multiple sections. This has been done to allow for easy viewing in iTRACE and printing of the Design System Document (DSD). The actual reports in BusinessObjects will be presented in the standard report format.
