#### FY 2015 Medicaid Funding Analysis Benefit Payments and Administrative Costs (in millions)

### Hospital Reimbursement

- Hospitals are paid on a per diem basis for inpatient claims and fee schedule for outpatient claims.
- These claim payments are less than costs.
- Hospitals are also paid supplemental payments (access payments) to increase the reimbursement for the difference between claim payments and costs.
- CMS approves this process and related amounts annually.
- Claim payments are made as they are incurred, supplemental payments are made quarterly.

# **Hospital Funding**

## FY 2015 State Share Sources

## Hospital Funding FY 2015

- Private hospitals pay provider tax 5.5% of total net patient revenues – not just Medicaid revenue
  - \$258 million
- Public/state hospitals pay state share of their invoices through Intergovernmental Transfers (IGTs)
  - \$235 million
- Public/state hospitals also provide additional state share through Certified Public Expenditures (CPEs)
  - \$152 million

## Summary

- Hospitals are self funded
- Medicaid is vital to the hospital system in Alabama, particularly to the two hospitals for children
- Provider contributions have allowed Medicaid to maximize federal matching dollars to the extent possible so that General Fund dollars have not been needed to fund hospitals for many years
- Medicaid is vital to the health care system of Alabama
