NON-Residential Setting Self-Assessment

The Alabama Department of Mental health (DMH) has adopted a Non-Residential HCBS Setting-Specific Self-Assessment tool to address the Centers for Medicare and Medicaid Services (CMS) Home and Community-Based Services (HCBS) Settings Rule. CMS requires states to evaluate current HCBS settings to determine current level of provider and setting compliance with the HCBS Settings Rule and to provide a framework to assist providers with the steps necessary to reach full compliance. All Non-Residential Settings serving waiver participants must be in full compliance with the HCBS Settings Rule by **March, 2022** in order to receive HCBS Waiver funding after this time. **Providers must complete ONE Non-Residential Self-Assessment for each setting/location where HCBS waiver services are provided. If more than one service is provided at a specific setting/location, provider must complete a separate Non-Residential Self-Assessment for each service.** Send questions to HCBS@mh.alabama.gov.

Please read the instructions for completing this Setting-Specific Non-Residential Self-Assessment before beginning!!

Definitions

Setting Type

Facility-based: Facility-based settings include, but are not limited to: (1) a setting that provides people with disabilities work and daytime activities primarily with other people with disabilities; (2) congregate settings populated exclusively or primarily by people with disabilities and staff that support them.

Service Types

Adult Day Services: Day services programs provide regularly scheduled, individualized skill development activities for participants. Services are typically provided in a non-residential setting. Day services include services primarily intended for adults with disabilities. Program goals may include developing/enhancing participant skills for social interaction, communication, or community integration. Day services must have a training component providing service above the level of basic supervision. Services are typically provided up to five hours per day, up to five days per week outside the home of the participant. Services may occur in a single physical environment or multiple environments or in the community at large. Community-based services take place in the community (and not in a facility) where interaction with people without disabilities could occur. Facility-based services take place in a facility, such as a certified day program, or prevocational center.

Prevocational Services: Prevocational services involve the provision of learning and work experiences where a participant can develop general, non-job-task-specific strengths, and skills that contribute to employability in paid employment in integrated, community settings. Services are expected to occur over a defined period of time as determined by the participant in the ongoing participant-centered planning process and only until integrated community employment can be obtained. Services are expected to specifically involve strategies that enhance a participant's employability in integrated, community settings. Competitive employment and/or supported employment are considered successful outcomes of prevocational services. Prevocational services should enable each participant to attain the highest possible wage and work which is in the most integrated setting and matched to the participant's interests, strengths, priorities, abilities, and capabilities. Services are intended to develop and teach general skills that lead to employment including but not limited to: ability to communicate effectively with supervisors, co-workers and customers; generally accepted community workplace conduct and dress; ability to follow directions; ability to attend to tasks; workplace problem solving skills and strategies; general workplace safety and mobility training. Individuals receiving this service should be on a "pathway to employment" as documented in the person-centered plan.

Public Institution: The CMS definition of public institution under the HCBS Settings Rule is the existing definition under 42 C.F.R. § 435.1010: "Public Institution" means an institution that is the responsibility of a governmental unit or over which a governmental unit exercises administrative control. For purposes of this regulation, a public institution is an inpatient facility that is financed and operated by a county, state, municipality, or other unit of government. A privately owned nursing facility is not a public institution.

Section B - The HCBS Settings Rule identifies settings that are presumed to have institutional qualities and, therefore, may not meet the rule's requirements and require "Heightened Scrutiny" process to determine whether they meet the rule requirements. This non-residential self-assessment assists the state in identifying settings that will required "Heightened Scrutiny" to determine whether they meet the rule requirements.
